RE: Bulking Aqueous Brake Cleaner Waste
Stream and Terminating Paint Waste (30 Gallon)

Dear Mr. Morris:

The Department approves Safety Kleen's request dated March 19, 1996 for a minor permit modification to terminate the aqueous brake cleaner at the Sanford Branch. The spent aqueous brake cleaner will be added to the 20,000 gallon spent solvent tank via the wet dumpster at the Return & Fill dock. The aqueous brake cleaner has the associated waste codes D006 and D039 and presently is handled in 5 gallon plastic fiber containers.

The Department also approves the Addendum to the Minor Modification dated March 25, 1996 requesting permission to terminate the 30 gallon size drums of paint waste at the Sanford Branch. In the past, the 30 gallon containers were handled as FRS waste while the 16 gallon containers were terminated at the facility.

The above modification is pursuant to Rule 62-730.290, F.A.C., and becomes effective today. All other sections of the permit remain as issued. This letter must be attached to Safety Kleen's permit and becomes a part of that permit. Also, all information submitted for the modification of the permit becomes part of the permit application.
