RE: Addendum to Minor Modification Submitted on 19 March 1996 to
Terminate Aqueous Brake Cleaner Waste
Safety-Kleen Corporation
Sanford Facility; FLD 984171165
Additional Request to Terminate 30 Gallon Paint Waste Drums

Dear Ms. McGehee:

Safety-Kleen Corporation is submitting this minor modification to its Sanford Operating Permit Application to request permission to terminate 30 gallon paint waste. The paint waste in the 30 gallon drums is similar to the paint waste in 16 gallon drums (waste codes are identical). Our permit allows us to terminate the 16 gallon drums at the Sanford Branch. Currently the 30 gallon drums are handled as transfer waste. Safety-Kleen would like to handle both drum sizes in a similar manner.

If possible we would like to include this request with the above referenced request submitted on 19 March 1996. Four copies of this permit modification addendum have been enclosed to include in your copies of our permit application. If you have any questions concerning this modification request, please call me at (904) 576-5979.

Sincerely,

Richard R. Morris
Environmental Health & Safety Manager
