Hazardous Waste Regulation

DATE:

December 7, 1989

SUBJECT: Safety Kleen - Tallahassee; FLD 982 133 159; HO37-171747; Tank

Certification Included with Permit Application.

I have reviewed the tank certification section of the permit application for the subject permit and offer one comment. On page 2 of the Project Observation Report No. 4 done by Wishmeirer & Associates under the heading Dirty Solvent Line from Dirty Pump to Dumpsters, the pressure test results indicate the dumpster connection hoses could not hold the 85 psi test pressure. The engineer ended up testing only the hard piping and not the flexible piping. The Department will need to know, before accepting the tank certification section, if all piping (flexible and hard) passed the pressure tests.
