Brad,

Please see attached revision, which updates the tank table, the site map and pages 1 & 2 of the permit. Get back to me if I need to provide additional explanation. I tried my best to amend the site map into something you can work with. Please refer to the tank table on the last page of the draft permit for the proposed contents. Once the facility goes into permitting with the county for installation, I will make sure the plans are updated accordingly as proper as-built plans.

As far as the SPCC, I attached the revised Section 7.

Did I miss anything that needs additional response?
