

November 19, 1991

Mr. Jeffrey Smith
Hazardous Waste Section
Florida Department of Environmental
Regulation -Southeast District
1900 S. Congress Ave., Suite A
West Palm Beach, Fl 33406

FLD 984167791

Dear Mr. Smith:

Concerning the RCRA Inspection at our Boynton Beach Facility on November 11, 1991. I am responding to the exit interview summary concerning two of the items. Each is listed below with an explanation.

Verification of floor coating being refinished and schedule to complete job.

I have been in contact with James N. Wieland, President of Roepnack Coporation, General Contractor who built the facility. He has given us the following information. Metro Caulking, 2150 N.W. 1st Place, Boca Raton, Fl., is to be on site on November 25, 1991 to start the refinishing work on the floor of the containment area in the dump and fill. They will finish the job on Tuesday, November 26, 1991.

Explain generation, management & final deposition of FRS waste. Is there any Q.C. associated with management of FRS waste.

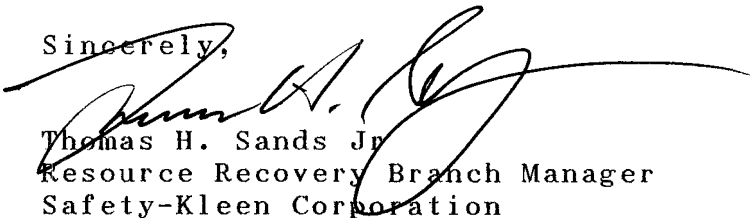

On November 11, 1991, I called your office and talked with Timothy Gray, Environmental Specialist. I requested that I would like to set up a meeting with all concerned at the District Office to explain from start to finish the whole process of how Safety-Kleen handles the FRS waste. This would include how we make the appointment to see a potential customer, what we require from the customer, material that we can handle, how we pull a sample, the processing of this sample, results of sample, management of the waste, final deposition of waste, quality control of FRS waste, etc.

Mr. Gray advised me that he would get with the other people involved and get back to me. I am waiting to hear from him so that we can set up this meeting and answer your concerns about the FRS waste.

I trust that I have answer your concerns on the above Inspection visit and I am looking forward to our meeting to further explain our handling of our Fluid Recovery Service waste.

If I can be of any further assistance, please feel free to call me at 407-736-1339

Sincerely,

Thomas H. Sands Jr.
