Subject: Raider Opa Locka - Closure Cost Estimate (CCE) and Permit Renewal Clarifications

John / Orlando / FAW Group,

Please see the attached CCEs and 2013 correspondence.

The current permit (284932-004-HO & 284932-005-SO, PDF pages 4 & 19 of 24 in FINAL Permit) states that the authorized maximum capacity of solid waste stored on site is 27 tons. The Permit Renewal Application dated July 10, 2018 indicates that the number is now 40 tons. Based on the attached correspondence, we would like clarification regarding the CCEs and maximum SW stored on site.

Does the current CCE dated March 1, 2018 cover the facility for a maximum capacity of solid waste stored on site of 40 tons? If not, please send an updated CCE for approval or provide appropriate revisions/clarifications to support the renewal application process.
