**Introduction:**

This follow-up report addresses minor out-of-compliance issues noted in the Groendyke Transport, Inc. initial inspection report dated December 20, 2018. (At the time, the facility was owned by McKenzie Tank Lines, Inc.) The facility was in violation Chapter 62-710.401(6) and 62-710.850(5)(a). Specifically, deficient used oil and used oil filter container management was observed.

**Process Description:**

The facility sufficiently responded to the Department's Compliance Assistance Offer letter that was sent on January 22, 2018. Their official response was received on January 28, 2019, via email.

This follow-up inspection report was conducted based off the information provided in the facility's CAO response. "Used Oil Filters" and "Used Oil" labels were applied to the appropriate storage containers (Photos 1 & 2). Photo documentation was provided via email.

**5.0 - Used Oil Generator Checklist****Requirements:**

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.
