Re: In-Kind Project Approval - OGC File No. 18-1323
Universal Environmental Solutions, LLC
Facility ID No. FLR000199802
Hillsborough County

Dear Mr. Kinley:

The Department has reviewed and is approving Universal Environmental Solutions' revised in-kind project proposal of February 22, 2019. As a condition of the approval, the Department will require you to justify your costs for rubber boot, skimmer net and telescoping pole replacement in your monthly reports, as these items are not typically worn out after a single use, and your staff will not be working in an environment where these items become contaminated enough to require discard rather than decontamination. Further, identification of staff involved in each maintenance activity and documentation verifying their involvement in this activity rather than other billable activities must be submitted. Universal's first monthly report on costs will be due April 12, 2019.

Should you have any questions, please contact Elizabeth Knauss at (813) 470-5902 or via e-mail at Elizabeth.Knauss@FloridaDEP.gov. Thank you for your cooperation.

Sincerely yours,

Kelley M. Bootwright for:

Mary E. Yeargan, P.G.
