Introduction:

Safety-Kleen Systems, Inc. (S-K), is located at 4426 Entrepot Blvd, Tallahassee, FL. This facility is owned by Clean Harbors and currently employs 11 people. The facility is a generator, transporter, and permitted storage and transfer facility for hazardous waste. The facility is permitted for both a container storage area and a tank storage area with Permit No. 009207-HO-010, which was renewed March 4, 2015 and expires March 4, 2020. This inspection was requested by The Department's Hazardous Waste Program and Permitting Section to not only have a recent facility inspection, but to familiarize the permittees with the facility before the upcoming permit renewal.

Process Description:

A. Return/Fill Shelter: No loading/unloading activity was underway at the time of inspection. Both drain dumpster lids were closed. One Satellite Accumulation Area (SAA) contained a closed, labeled 55-gallon drum for hazardous waste solids/sludge from the dumpster/drum washing unit. The Continued Use Dumpster is located in this area for the Continued Use Program (CUP).

Inspection Date: 07/19/2019

B. 10 Day Transfer Station Area. This Area contained 43 drums and six smaller drums/buckets of mixed hazardous and nonhazardous drums as well as boxes of waste lamps awaiting shipment. All drums were labeled, dated within the 10-day transfer date. Documentation for containers was checked and found to be in order. The safety equipment locker was fully equipped and in order. A SAA has been established in this area for expired used oil vacuum samples. This SAA was labeled and in good condition.

C. Storage Area. This area is labeled on the site map as FRS 10-day Transfer Waste/Permitted Container Storage Area and cannot accumulate more than 6,912 gallons of hazardous waste in containers according to Part II Subpart B.1(2) of the permit. This area contained 31 drums of hazardous waste and three smaller hazardous waste drums awaiting shipment. The two rows of palatalized, labeled, and dated drums were not contained within the adjacent lined 10-Day Transfer Area and floor markings were not apparent. The latest date noted was 6/27/19, which is outside of the 10 day time restriction as the inspection was conducted 7/19/19, but well within the 90-day accumulation requirement for LQG's in 40 CFR 262.17(a). The facility needs to clarify this area on the upcoming permit renewal and provide an updated map of all storage areas at the facility. This area also stores components of solvent parts washers for distribution or repair.

D. Tank Storage. This covered and enclosed tank storage area contains a 150-degree solvent, used oil tank, and permitted hazardous waste storage tank. Outside this area are a 150-degree solvent tank and used antifreeze tank. Tank 2, the permitted hazardous waste storage tank, was labeled as an Out of Service AST on the previous facility permit but the warehouse manager said it is still in use. Located in Appendix C of the previous permit, the last tank inspection report for this tank, dated July 15, 2014, deemed it satisfactory for use until the next inspection. Please ensure the tank is inspected in accordance with the schedule and procedures in the permit application (Part II Subpart B.2(7)). All tanks and the load/unload pipe manifold areas appeared to be in good condition. The hazardous waste solvent tank contents are transported by Safety Kleen Systems, Inc. (TX00050930) to destination facility Safety Kleen Systems, Inc. (SCD077995488) as waste combustible liquids (D001, D018, D039, & D040) approximately once a month.

E. External Storage. The outside storage/lay down area, driveways, vehicle parking lot, solid waste dumpsters, and the perimeter fence/lawn areas were inspected with no violations noted. Dry storage containers appeared to be in good condition. Signs are attached to the perimeter fencing and in good condition.

F. Records Review. The June 2019 Manifests were reviewed showing no deficiencies.
