Re: Incident Management Solutions, Inc.
HW Facility ID # FLR000226449
Lake County

Dear Mr. Fetters:

Department personnel conducted an inspection of the above-referenced facility on June 20, 2019. Based on the information provided during the inspection, the facility was determined to be in compliance with the Department's rules and regulations. A copy of the inspection report is attached for your records.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact John White at 407-897-4305 or via e-mail at John.White@Floridadep.gov.

Sincerely,

Daniel K. Hall, Manager
Central District

Non-Handler

Transporter

Used Oil

INSPECTION TYPE:

Routine Inspection for Hazardous Waste Transporter facility

INSPECTION PARTICIPANTS:

Principal Inspector: John E. White, Inspector

Other Participants: Noel Fetters, Operations Manager

LATITUDE / LONGITUDE: Lat 28° 36' 36.828" / Long 81° 43' 56.586"

NAIC 562910 - Remediation Services

TYPE OF OWNERSHIP: Private

Introduction:

On June 20, 2019, John White, Florida Department of Environmental Protection (Department), inspected Incident Management Solutions (IMS) for compliance with hazardous waste and used oil transporter regulations. IMS was represented by Noel Fetters, Operations Coordinator.

A Florida Hazardous Waste Transporter Approval letter was issued to IMS for the 13415 Sullivan Road, Minneola, Florida, location on May 22, 2018. The transporters updated certificate of liability insurance was received by the Department on May 14, 2019. IMS's hazardous waste transporter operations were previously located at 501 South Disston Avenue, Minneola, Florida. The Disston Avenue site currently serves as an office and will eventually be relocated to the Sullivan Road location.

While IMS offers 24-hour per day, seven days per week, emergency response operations, the facility is only open from 8:00 am to 6:00 pm Monday through Friday. The facility has seven employees and is connected to city water for drinking, an irrigation well for non-potable water, and has a portable toilet.

Process Description:

IMS is an emergency response contractor. The company responds to vehicle accidents primarily removing fuels from tanks, removing non-hazardous materials, and excavating petroleum contaminated soils. The facility is not actively transporting hazardous waste or used oil.

Petroleum contaminated soils arrive at the facility in 55-gallon drums. The containers are consolidated into roll-off containers and shipped off-site for disposal. Non-hazardous soils are shipped to a permitted non-hazardous waste landfill. Potentially hazardous soils are excavated at the accident location by a contractor and the contaminated soil is shipped directly to a RCRA permitted destination facility.

Records are not currently maintained on-site. Following the inspection, copies of hazardous waste manifests were requested for the past three years. Manifests provided document IMS is not operating as a hazardous waste transporter, they contract that work out to another registered hazardous waste transporter.

Located in the facility yard were eight 55-gallon drums and one roll-off container of non-hazardous petroleum contaminated soil and absorbents.The roll-off was covered to prevent rain water from entering the container.

Conclusion:

Incident Management Solutions was inspected as a hazardous waste and used oil transporter and no violations were cited as a result of this inspection.

1.0 - Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	Pre-Inspection Review	Yes	No	N/A
1.1	Has the facility notified with correct status? 262.18(a)	✔		
1.2	Has the facility notified of change of status? 62-730.150(2)(b)			✔
1.3	Did the facility conduct a waste determination on all wastes generated? 262.11			✔

Signed:

A hazardous waste compliance inspection was conducted on this date, to determine your facility's compliance with applicable portions of Chapters 403 & 376, F.S., and Chapters 62-710, 62-730, 62-737, & 62 -740 Florida Administrative Code (F.A.C.). Portions of the United States Environmental Protection Agency's Title 40 Code of Federal Regulations (C.F.R.) 260 - 279 have been adopted by reference in the state rules under Chapters 62-730 and 62-710, F.A.C.
