The file plays properly with VCL Media Player.

Initially all you can see are cobwebs right at the camera lens. But after about 37 seconds or so you can see a light area appear on the right side of the screen towards the middle. At 1:10 you can see the flames and make out objects. At 1:55 the camera is able to focus past the cobwebs and you can see the room in color, and you can see the flames on the right side of the building
