RE: World Petroleum Site Inspection Report of October 31, 2019

Dear Mr. Andreotta:

World Petroleum Corporation (WPC) is in receipt of the compliance evaluation inspection (CEI) for its facility which was conducted on October 31, 2019. World Petroleum Corp (WPC) does not agree with the alleged violation for storage of hazardous waste drums. WPC operates as a hazardous waste transporter under 62-730 F.A.C. and does not store hazardous waste at its facility. Accordingly, 62-730.171 F.A.C. is not applicable in this situation. The hazardous waste drums (3 each) referred to in the hazardous waste compliance evaluation conducted on October 31, 2019, at WPC were never removed from the transport vehicle and were therefore not "stored" at the WPC site.

Nonetheless, based upon the Department's recommendation, WPC will submit a notification and all related documents necessary to apply for a 10-day hazardous waste transfer facility.

Thank you for your continued assistance and guidance.

Sincerely,

A handwritten signature in blue ink, appearing to read "Eric Miranda", is written over a faint, large circular watermark of the World Petroleum Corporation logo.

Eric Miranda
President World Petroleum Corporation
