Introduction:

On June 17, 2020, John White, Florida Department of Environmental Protection, inspected Aptim Environmental & Infrastructure for compliance with state and federal hazardous waste transporter requirements. Aptim Environmental & Infrastructure was represented by Shawn Flynn, Project Manager. The office was undergoing renovations and very few employees were working on-site.

Aptim Environmental & Infrastructure was last inspected on December 7, 2016 as a hazardous waste transporter and no violations were identified at that time.

Process Description:

The facility does not actively transport hazardous waste. Based on the requirements of each specific job, transportation of hazardous waste will be subcontracted to a registered hazardous waste transporter.

Due to construction activities, the warehouse was not inspected. During past inspections, the warehouse was used only for storage of supplies and equipment.

A review of insurance and required registrations found no issues. Aptim Environmental & Infrastructure most recently provided the required proof of liability insurance as a hazardous waste transporter on July 2, 2019. The facilities registration as a hazardous waste transporter is current through June 30, 2020.

Conclusion:

Aptim Environmental & Infrastructure was inspected as a transporter of hazardous waste and no potential violations were found at this time.

Inspection Date: 06/17/2020

1.0: Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.
