---

Susan,

Can you please provide some photographic documentation of any sections of the facility and equipment that was replaced / repaired for the facility record? A brief narrative (as suggested below) should be sufficient to bridge the time period between the initial response activities and the return to normal operations.

Assuming we don't have any changes to the facility layout, storage capacity, or addition / removal of any SWMUs, then I don't believe a permit modification will be necessary.

Susan,

Good to hear the facility is operational again. I have forwarded your email to the RCRA Permitting group in Tallahassee so they can let us know the next steps.

Thank you

John

**Subject:** New Balcan installed and operating.

Good morning,

We are pleased to be operating again in Ocala.

We were expecting to need to change the Balcan information in the permit.

However, when we requested a new Brochure, etc. from the manufacturer, he stated that everything is the same except spirals have been replaced.

And, of course, it is a brand new machine!

Is a letter with a overview of the time frame from the fire to install sufficient.

Would this be considered a Class 1 modification? Or would suggest we handle it differently.

We continue to have storage trailers off site as we work them into our day to day operations.

It's been nearly a year. Thank you for your understanding and support.

Even with Covid, business seems to be rebuilding.

Thank you.

Susan
