Hi Tyler,

Without knowing the details of the manifest discrepancy, please review 40 CFR 264.72. If you are not able to resolve the discrepancy with the generator within 15 days after receiving the waste, you must submit to the Regional Administrator a letter describing the discrepancy and attempts to reconcile it, and a copy of the manifest or shipping paper at issue as required by 40 CFR 264.72(c). The Regional Administrator is defined as the Secretary (including the Secretary's designee, where appropriate) in Rule 62-730.020(3)(b), Florida Administrative Code. One of the Secretary's designees would be the Central District Director, Aaron Watkins. Please also copy the hazardous waste permitting administrator, Michell Smith, in Tallahassee and the hazardous waste compliance manager, Daniel Hall, in the Central District office.

Hope I addressed your request. If you have any questions please email me.

Thank you,
Michael

Good Morning Sir,

Due to Covid 19, I seem to be running into the same issue in regards to discrepancy reporting and getting these issues resolved with waste generators in a timely manner. I was reaching out to see if there were any specific forms or guidelines needed to be followed when a generator who has been contacted about a

discrepancy with their hazardous waste and is unwilling to assist with resolving the issue that they have been informed of for weeks. I am hoping at this time we do not run into this problem but I wanted to make sure that I am completely prepared for this matter if it comes down to this. Any assistance or guidance would be much appreciated with this matter.

thank you for your time.

Hi Tyler,

I understand you need to contact me. Please email me your question as that is the best way to get a hold of me at the moment.

Thank you,
Michael
