Essential Critical Infrastructure Workforce

- manufacturers and supply chain vendors that provide hardware and software, and information technology equipment (to include microelectronics and semiconductors) for critical infrastructure
- Workers responding to cyber incidents involving critical infrastructure, including medical facilities, SLT governments and federal facilities, energy and utilities, and banks and financial institutions, and other critical infrastructure categories and personnel
- Workers supporting the provision of essential global, national and local infrastructure for computing services (not cloud computing services), business infrastructure, web-based services, and critical manufacturing
- Workers supporting communications systems and information technology used by law enforcement, public safety, medical, energy and other critical industries
- Support required for continuity of services, including personnel/cleaning personnel

OTHER COMMUNITY-BASED GOVERNMENT OPERATIONS AND ESSENTIAL FUNCTIONS

- Workers to ensure continuity of building functions
- Security staff to maintain building access control and physical security measures
- Electronics personnel
- Federal, State, and Local, Tribal, and Territorial employees who support Mission Essential Functions and communications networks
- Trade Officials (ITA negotiators, international data flow administrators)
- Weather forecasters
- Workers that maintain digital systems infrastructure supporting other critical government operations
- Workers at operations centers necessary to maintain other essential functions
- Workers at operations centers necessary to maintain other essential functions for transportation workers
- Workers who support necessary understanding, writing and issuing operations for transportation workers

NOTICE OF ESSENTIAL SERVICES PROVIDER

TO WHOM IT MAY CONCERN:

Trilogy MedWaste Inc. (hereinafter "TMW"), provides critical and vital environmental and human health services. Primarily, the pickup, transportation and proper treatment of potentially infectious biohazardous waste from large sections of the United States. To maintain compliance with this requirement, essential personnel must continue to work at TMW transfer stations, permitted treatment facilities, and customer locations. Furthermore, the services that TMW provides are critical to uphold the legal requirements of businesses that generate regulated medical waste, including proper containment, safe handling, disposal and tracking of regulated medical waste. TMW's core services are considered essential functions, or in support of essential functions, and may be exempted from various jurisdictional orders that may limit travel or require sheltering in place. As such, TMW employees may be authorized to continue providing these essential services in support of local, state and the federal government.

These TMW employees may range from transportation specialists (drivers and operators) as well as a variety of on-the-ground support functions. TMW will have conducted a thorough review authorizing the employees to continue these essential support functions, and will work with all applicable regulatory agencies to ensure the work is completed in accordance with applicable laws and emergency orders.

TMW also provides services, in addition to our work with governmental bodies, to a wide variety of healthcare related customers, including hospitals, medical offices representing a variety of specialties, dental offices, nursing homes, veterinarians, laboratories, pharmacies, prisons, jails and law enforcement agencies and a host of other customers who they themselves may be assisting in the public response and providing critical essential services in conjunction with TMW's efforts.

TMW puts the safety of its employees and customers as its top priority, and monitors closely the expert guidance from the CDC and the World Health Organization along with state and federal health officials. TMW will continue to partner with local governments and partners to assist in the response efforts and in support of these essential services.

MEMORANDUM ON IDENTIFICATION OF ESSENTIAL CRITICAL INFRASTRUCTURE WORKERS DURING COVID-19 RESPONSE

FROM: Christopher C. Krebs
Director
Cybersecurity and Infrastructure Security Agency (CISA)

As the Nation comes together to slow the spread of COVID-19, on March 16th, the President issued updated Coronavirus Guidance for America. This guidance states that:

"If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule."

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's responsibilities as assigned under the Homeland Security Act of 2002 to provide strategic guidance, promote a national unity of effort, and coordinate the overall federal effort to ensure the security and resilience of the Nation's critical infrastructure. CISA uses trusted partnerships with both the public and private sectors to deliver infrastructure resilience assistance and guidance to a broad range of partners.

In accordance with this mandate, and in collaboration with other federal agencies and the private sector, CISA developed an initial list of "Essential Critical Infrastructure Workers" to help State and local officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list can also inform critical infrastructure community decision-making to determine the sectors, sub-sectors, segments, or critical functions that should continue normal operations, appropriately modified to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

The attached list identifies workers who conduct a range of operations and services that are essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing management functions, among others. The industries they support represent, but are not necessarily limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

We recognize that State, local, tribal, and territorial governments are ultimately in charge of implementing and executing response activities in communities under their jurisdiction, while the Federal Government is in a supporting role. As State and local communities consider COVID-19-related restrictions, CISA is offering this list to assist prioritizing activities related to continuity of operations and incident response, including the appropriate movement of critical infrastructure workers within and between jurisdictions.

Accordingly, this list is advisory in nature. It is not, nor should it be considered to be, a federal directive or standard in and of itself.

In addition, these identified sectors and workers are not intended to be the authoritative or exhaustive list of critical infrastructure sectors and functions that should continue during the COVID-19 response. Instead, State and local officials should use their own judgment in using their authorities and issuing implementation directives and guidance. Similarly, critical infrastructure industry partners will use their own judgment, informed by this list, to ensure continued operations of critical infrastructure services and functions. All decisions should appropriately balance public safety while ensuring the continued delivery of critical infrastructure services and functions.

CISA will continue to work with you and our partners in the critical infrastructure community to update this list as the Nation's response to COVID-19 evolves. We also encourage you to submit how you might use this list so that we can develop a repository of use cases for broad sharing across the country.

Should you have questions about this list, please contact CISA at CISA.X.A.1@hhs.gov.
