Re: Diversified Environmental Services, Inc.
Facility ID Number: FLD984183566
Hillsborough County

Dear Mr. McCormick:

Department personnel conducted a compliance inspection of the above-referenced facility on May 24, 2021. Based on the information provided during and after the inspection, the facility was determined to be in compliance. A copy of the inspection report is attached for your records and any non-compliance items which may have been identified at the time of the inspection have been corrected.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Abigail Bridges at (813) 470-5787, or via e-mail at: Abigail.Bridges@floridadep.gov

Sincerely,

A handwritten signature in black ink, appearing to read "Michael Lynch".

Michael Lynch
Environmental Administrator
Compliance Assurance Program

**Florida Department of
Environmental Protection
Hazardous Waste Inspection Report**

FACILITY INFORMATION:

Facility Name: Diversified Environmental Services Inc
On-Site Inspection Start Date: 05/24/2021 **On-Site Inspection End Date:** 05/24/2021
ME ID#: 49178 **EPA ID#:** FLD984183566
Facility Street Address: 1201 N 22nd St, Tampa, Florida 33605-5314
Contact Mailing Address: 1201 N 22nd St, Tampa, Florida 33605-5314
County Name: Hillsborough **Contact Phone:** (813) 248-3256

NOTIFIED AS:

Non-Handler, Pharmaceuticals Healthcare, Transporter, Used Oil

WASTE ACTIVITIES:

Generator: Non-Handler **Transporter:** Own Waste, Commercial Waste **Used Oil:** Oil Filters

Hazardous Waste Pharmaceuticals:

Pharmaceutical Activities: Healthcare Facility

INSPECTION TYPE:

Routine Inspection for Non-Handler Facility
Routine Inspection for Used Oil Transporter Facility
Routine Inspection for Used Oil Transfer Facility Facility

INSPECTION PARTICIPANTS:

Principal Inspector: Abigail B Bridges, Inspector
Other Participants: Kiana Sladicki, Environmental Specialist; Gerry McCormick Jr., President

LATITUDE / LONGITUDE: Lat 27° 57' 22.4678" / Long 82° 26' 0.3581"

NAIC: 221310 - Water Supply and Irrigation Systems

TYPE OF OWNERSHIP: Private

Introduction:

Diversified Environmental Services, Inc. ("DES") was inspected by the Florida Department of Environmental Protection ("Department") on May 24, 2021, to determine the facility's compliance with state and federal regulations regarding Used Oil on May 24, 2021. Diversified Marine Tech, Inc. ("DMT"), a co-located sister company, was inspected at the same time. The facility was previously inspected by the Department on December 19, 2018. Both companies are currently registered with the Department as used oil transporters and transfer facilities. Neither company has a permit for used oil processing, nor do either of the companies market used oil fuel or hazardous waste. All oil is shipped to off site facilities for additional processing and marketing. Gerry McCormick Jr., president, assisted Department personnel throughout the inspection.

Process Description:

DES has offices, parking areas for transportation equipment, a maintenance shop and a centralized wastewater treatment unit that discharges to the City of Tampa's sewer system under a pretreatment permit. DES is a spill response contractor and offers tank and ship cleaning services. DES conducts some operations in Texas and Louisiana. DES has 10 employees, one of which is a DOT certified driver. DES operates Monday through Friday, from 7:30AM to 4PM. In addition to wastewater sewer services, the City of Tampa provided water and domestic sewer services.

A small laboratory is located adjacent to the water treatment plant. The tests are limited to pH, chloride content and percent water by Dexsil Hydrosout testing. No specification testing is conducted, and quarterly wastewater samples collected for Clean Water Act compliance are analyzed by an off-site certified lab.

Diversified Environmental Services Inc Inspection Report

Inspection Date: 05/24/2021

Inside the shop area where 3 cardboard boxes of spent fluorescent bulbs. All of the boxes were properly closed and labeled; this waste stream is disposed of through Veolia. Two, 55-gallon labeled drums containing used oil were present. Also inside the shop area were two aboveground storage tanks (ASTs), both with capacities under 500-gallons, contained new virgin oil. A parts washer located in the shop area was not in service and has not been operated since before 2016. There was no evidence of any solvents in the parts washer or stored in containers near the parts washer. DES uses one propane forklift, which is serviced by Tampa Forklift. The covered loading dock, located outside of the shop, was being used to store numerous non-regulated waste drums and empty drums at the time of the inspection.

DES currently owns five vacuum trucks, all of which are in operation, four tankers and four tractors. DES also has eleven frac tanks, plus rental units from Adler Tanks. DES owns two tugs. The 8,000 barrel capacity double hulled tank barge, the DES 1625, which was built in 1970, is currently out of service. DES currently uses an 8,000 barrel capacity double hulled tank barge, the DES 800, which was built in 1985. The DES 800 was located at the DMT Facility at the time of inspection.

Several frac tanks and DES 800 are in use at the DMT facility. Oily wastewater from the DMT facility is transferred to trucks or tankers for transport to the DES facility for treatment. Sewage pumped from ship holding tanks is taken directly to the City of Tampa's Howard Curran treatment facility for discharge.

DES accepts industrial wastewater for pretreatment in a NPDES permitted Centralized Wastewater Treatment Unit that discharges to the City of Tampa's Howard Curran wastewater treatment facility. Since the 2016 inspection, DES modified their permit to accept all types of industrial wastewater (Category D). The water treatment plant includes six 10,000 gallon holding tanks for water, which is tested prior to discharge to the POTW. Solids precipitated during treatment are separated from the waste water in a cone bottom tank, and then dewatered in a filter press prior to being sent to Clark Environmental for disposal. The solids are analyzed regularly and are not characteristically hazardous.

Recovered oil is currently being stored in frac tanks on site. Mr. McCormick said that oil with excessive water is sometimes transported back to the barge, to allow additional gravimetric separation. At the time of inspection, DES had 4 frac tanks and a 8,000 gallon capacity single-walled AST being used used to store bilge water on site. One frac tank and another 8,000-gallon AST was empty at the time of the inspection. The other three frac tanks contained bilge water from the water treatment plant. The frac tanks containing the bilge water were labeled accordingly. Located within secondary containment was one, 250-gallon tote containing used antifreeze. All vacuum trucks and tankers stored at the facility were empty at the time of the inspection..

RECORDS

Recovered oil is brokered by Mavrik Management, Inc. or Sunrise Environmental. DES did not have any off specification used oil and did not have any loads rejected since the time of the last inspection in 2016. The facility had several acceptance records that were missing the EPA ID of the generator. Department inspectors explained that, unless DES is transporting used oil from a Very Small Quantity Generator that has not notified and received an EPA ID, then the manifest should include with the generator's EPA ID. Used oil is not stored at DES for longer than 35 days, and DES uses an Excel Tracking Sheet to ensure that this timeframe is not exceeded.

Three years worth of oil delivery records were available for review at the time of the inspection, including records between DMT and DES. The records included the EPA identification numbers of both companies. Records included a notation "halogens less than 1,000 ppm." One Non-Hazardous Waste Manifest (See Manifest #21-02257, dated 3/15/2021) did not include a designated signature or date. Additionally, the facility failed to obtain Designated Facility copies of four manifests (#21-02182 – Date: 2/18/2021, #21-02101 – Date: 2/11/2021, #21-03042 – Date: 3/4/2021, and 21-02022 – Date: 2/3/2021). The final copies of the aforementioned manifests were provided via email on June 8, 2021.

Employee training records were provided and were up to date. The most recent training occurred on January 22, 2021 and was provided by All-Pro Occupational Trainers, Inc. DES uses an outside vendor to conduct and fulfill their essential training needs.

The facility's Used Oil Transporter/Transfer Facility Registration is current through to 6/30/2021. Additionally, DES provided documentation that their insurance/financial assurance is current and adequate.

Diversified Environmental Services Inc Inspection Report

Inspection Date: 05/24/2021

New Potential Violations and Areas of Concern:

Violations

Type:	Violation
Rule:	279.46(a)(2) , 279.46(b)(5)(i)
Explanation:	279.46(a)(2) - Used oil transporters must ensure that acceptance records include the generator's EPA ID. At the time of the inspection, several acceptance records (Generators: Clark Environmental, Inc. - FLD984206003, Murphy Oil USA Inc. - FLD981866460, USCG Group Key West - FL1690331300, and Amalie Oil Company - FLR000123273) did not include the generator's EPA ID. 279.46(b)(5)(i) - Used oil transporters must ensure that delivery records are signed and dated by the designated facility upon receipt of a shipment. At the time of the inspection, there was a delivery record between DMT and DES, in which the delivery record (Manifest #21-02257, dated 3/15/2021) was not signed and dated upon receipt of the shipment.
Corrective Action:	279.46(a)(2) - The facility must ensure that, if the generator has an EPA ID, then that EPA ID is included on all acceptance records. CORRECTED: The facility ensured that EPA IDs will be included on all acceptance records. 279.46(b)(5)(i) - The facility must ensure that all delivery records are signed and dated by the designated facility upon receipt of a shipment. CORRECTED: The facility ensured that all delivery records will be signed and dated by the designated facility upon receipt of a shipment.

PHOTO ATTACHMENTS:

Bilge Water Frac Tanks

Wastewater Treatment Plant

Conclusion:

At the time of the inspection, Diversified Environmental Services, Inc. was not operating in compliance with state and federal regulations regarding used oil. However, following the inspection, the facility provided the requested documents and ensured that acceptance and delivery records would be properly filled out moving forward. Therefore, the facility has returned to compliance.

Inspection Date: 05/24/2021

1.0: Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	Pre-Inspection Review	Yes	No	N/A
1.1	Has the facility notified with correct status? 262.18(a)	✓		
1.2	Has the facility notified of change of status? 62-730.150(2)(b)			✓
1.3	Did the facility conduct a waste determination on all wastes generated? 262.11	✓		

Diversified Environmental Services Inc Inspection Report

Inspection Date: 05/24/2021

5.0: Used Oil Generator Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	Used Oil Container and Tank Management	Yes	No	N/A
5.1	Does the facility store used oil only in tanks, containers or permitted hazardous waste storage units? 279.22(a)	✓		
5.2	Are used oil containers/tanks in good condition? 279.22(b)(1)	✓		
5.3	Are used oil containers/tanks not leaking? 279.22(b)(2)	✓		
5.4	Are used oil containers/tanks labeled or marked clearly with the words "Used Oil"? 279.22(c)(1)	✓		
5.5	Are fill pipes used to fill underground tanks labeled or marked clearly with the words "Used Oil"? 279.22(c)(2)			✓
Item No.	Secondary Containment	Yes	No	N/A
5.6	Are containers/tanks 55-gallons or smaller that are stored inside:			
5.7	Stored on an oil-impermeable surface? 62-710.401(6)	✓		
5.8	Are containers/tanks larger than 55-gallons that are stored inside:			
5.9	Stored on an oil-impermeable surface? 62-710.401(6)			✓
5.10	Does the building provide adequate secondary containment, or are the containers/tanks double-walled, or stored within or on engineered secondary containment that has the capacity to hold 110% of the volume of the largest container/tank, or are the containers/tanks portable/wheeled and typically emptied every 24 hours? 62-710.401(6)			✓
5.11	Are containers/tanks (regardless of size) that are stored outside:			
5.12	Closed or otherwise protected from the weather? 62-710.401(6)			✓
5.13	Double-walled or stored on an oil-impermeable surface with engineered secondary containment that has the capacity to hold 110% of the volume of the largest container within the secondary containment? 62-710.401(6)	✓		
Item No.	Used Oil Releases	Yes	No	N/A
5.14	Has the generator, upon detection of a release, done all of the following, as applicable:			
5.15	stop the release? 279.22(d)(1)			✓
5.16	contain the released oil? 279.22(d)(2)			✓
5.17	clean up and manage properly the released used oil and other materials? 279.22(d)(3)			✓
5.18	if necessary, repair or replace any leaking used oil storage containers or tanks prior to returning them to service? 279.22(d)(4)			✓
5.19	Is the facility in compliance with the prohibition against discharges of used oil into soils, sewers, drainage systems, septic tanks, surface or ground waters, watercourses, or marine waters? 62-710.401(2)			✓
5.20	Is the facility in compliance with the prohibition against using used oil for road or pavement oiling for dust control, weed abatement, or other similar uses that have the potential to release used oil into the environment? 62-710.401(5)			✓
Item No.	Used Oil Filter Container Management	Yes	No	N/A

Diversified Environmental Services Inc Inspection Report

Inspection Date: 05/24/2021

5.21	Does the facility store used oil filters in containers? 62-710.850(5)(a)			✓
5.22	Are the used oil filter containers clearly labeled "Used Oil Filters"? 62-710.850(5)(a)			✓
5.23	Are the used oil filter containers in good condition? 62-710.850(5)(a)			✓
5.24	Are the used oil filter containers not leaking? 62-710.850(5)(a)			✓
5.25	Are the used oil filter containers closed or otherwise protected from weather? 62-710.850(5)(a)			✓
5.26	Are the used oil filter containers stored on an oil-impervious surface? 62-710.850(5)(a)			✓
Item No.	Releases from Used Oil Filter Containers	Yes	No	N/A
5.27	Has the generator, upon detection of a release, done all of the following, as applicable:			
5.28	stop the release? 62-710.850(5)(b)			✓
5.29	contain the released oil? 62-710.850(5)(b)			✓
5.30	clean up and manage properly the released oil and any subsequent oily waste? 62-710.850(5)62-710.850(5)(b)			✓
5.31	repair or replace any leaking used oil filter storage containers prior to returning them to service? 62-710.850(5)(b)4			✓
Item No.	Used Oil Mixtures	Yes	No	N/A
	<input type="checkbox"/> Is the facility a VSQG that mixes hazardous waste with used oil and manages the mixture under 279? Note: VSQGs can mix both listed and characteristic wastes with used oil.			
	<input type="checkbox"/> Is the facility a SQG or LQG that is mixing listed waste (except for listed waste that only is listed because it exhibits a characteristic - see question below) with used oil? [VSQGs may mix HW and used oil, but they must maintain disposal documentation per 62-730.030(3), FAC.] If so:			
5.32	Is the mixture being managed as listed hazardous waste? 279.10(b)(1)			✓
	<input type="checkbox"/> Is the facility a SQG or LQG that mixes only characteristic waste (or listed waste that only exhibits a characteristic) with used oil? [NOTE: This is also considered HW Treatment and other rules apply. However, VSQGs may mix HW and used oil, but they must maintain disposal documentation per 62-730.030(3), FAC.] If so:			
5.33	Is ignitability the only characteristic of the hazardous waste prior to mixing (or is the HW listed only for ignitability)? If so:			
5.34	Is the mixture managed as HW if it exhibits the ignitability characteristic? 279.10(b)(2)(iii)			✓
5.35	Does the hazardous waste exhibit ANY characteristic other than ignitability prior to mixing (or is the HW listed only for a characteristic other than ignitability)? If so:			
5.36	Is the mixture managed as HW if it exhibits ANY characteristic (even if the characteristic of the mixture is from the used oil, rather than from the HW)? 279.10(b)(2)(i)			✓
5.37	Does the facility generate mixtures of other materials contaminated with used oil (i.e. absorbents, rags, dirt)? If so:			
5.38	Are UO-contaminated materials that contain visible free-flowing UO managed under 279 used oil standards? 279.10(c)(3)			✓
5.39	Does the facility either manage UO-contaminated materials that do not contain visible free-flowing UO as hazardous waste have records documenting the materials are not hazardous waste? 279.10(c)(1)(ii)			✓
5.40	Are UO-contaminated materials that will be burned for energy recovery being managed as used oil under 279? (Used oil-contaminated materials should have a heating value of at least 5000 Btu/pound to be burned for energy recovery under 279, so low-Btu-value materials like contaminated soils and clay absorbents are solid waste, subject to 262 HW determinations.) 279.10(c)(3)			✓
5.41	Does the facility generate mixtures of used oil with fuel or fuel products? If so:			
5.42	Does the facility manage mixtures of UO and fuel/fuel products under 279 used oil standards?			✓

Diversified Environmental Services Inc Inspection Report

Inspection Date: 05/24/2021

	[Note: 279.10(d)(2) allows on-site mixing of UO with diesel fuel for use in the generator's own vehicles.] 279.10(d)(1)			
5.43	Is the facility in compliance with the prohibition against mixing or commingling used oil with solid waste that is to be disposed of in landfills or directly disposing of used oil in landfills? (Persons unknowingly disposing into a landfill used oil or used oil filters which have not been properly segregated or separated from other solid wastes by the generator are not subject to this prohibition. Oily waste, sorbents or other materials used for maintenance or clean up as a result of spills or release are not subject to this prohibition.) 62-710.401(3)			✓
5.44	Is the facility in compliance with the prohibition against mixing or commingling used oil with hazardous substances that make it unsuitable for recycling or beneficial use? (Notwithstanding the provisions found in 40 CFR 279.10(b)(3)). 62-710.401(4)			✓
Item No.	Space Heaters	Yes	No	N/A
5.45	Does the generator burn used oil on-site in a used oil-fired space heater? [Generators who burn off site, non household oil, or burn oil in devices not meeting the space heater exemption must comply with 40 CFR 279 - Subpart G.]			
5.46	If so, does the facility burn only used oil generated on-site or only household DIY used oil? 279.23(a)			✓
5.47	If so, does the heater have a capacity of no more than 0.5 million BTU/hr? 279.23(b)			✓
5.48	If so, are combustion gasses vented to the atmosphere? 279.23(c)			✓
Item No.	Off-site Shipments	Yes	No	N/A
5.49	Does the generator only use transporters who have received EPA Identification numbers? (Include names and numbers in report narrative) 279.24	✓		
5.50	Self transport to collection centers - Does the generator only transport their own used oil and used oil from household DIY to a used oil collection center? If so:			
5.51	Does the generator transport the used oil in a vehicle owned by the generator or an employee of the generator? 279.24(a)(1)			✓
5.52	Does the generator transport no more than 55 gallons of used oil at one time? 279.24(a)(2)			✓
5.53	Does the generator transport the used oil to a used oil collection center that is registered, licensed, permitted or recognized by a state/county/municipal government to manage used oil ? 279.24(a)(3)	✓		
5.54	Self transport to aggregation points - Does the generator transport used oil that is generated at the generator's site to an aggregation point? If so:			
5.55	Does the generator transport the used oil in a vehicle owned by the generator or an employee of the generator? 279.24(b)(1)			✓
5.56	Does the generator transport no more than 55 gallons of used oil at one time? 279.24(b)(2)			✓
5.57	Does the generator transport the used oil to an aggregation point that is owned/operated by the same generator? 279.24(b)(3)			✓
5.58	Tolling Agreement - is the used oil transported and then reclaimed under a contractual agreement pursuant to which reclaimed oil is returned by the processor.re-refiner to the generator for use as a lubricant, cutting oil, or coolant? If so:			
5.59	Does the contract indicate the type and frequency of shipments? 279.24(c)(1)			✓
5.60	Does the contract indicate that the vehicle used to transport the used oil to the processing/re-refining facility is owned and operated by the used oil processor/re-refiner? 279.24(c)(2)			✓
5.61	Does the contract indicate that the reclaimed oil will be returned to the generator? 279.24(c)(3)			✓
Item No.	Marketing and Processing	Yes	No	N/A
	<input type="checkbox"/> Does the generator claim that the used oil meets the specification in 40 CFR 279.11? [If so, and the oil is to be burned for energy recovery, the generator is a marketer subject to 40			

Inspection Date: 05/24/2021

	CFR 279 Subpart H.]			
	<input type="checkbox"/> Does the generator process used oil by filtering, oil/water separation or other methods prior to direct shipment to an off site used oil burner? [If so, the generator is also a used oil processor subject to 40 CFR 279 - Subpart F.]			

Inspection Date: 05/24/2021

6.0: Transporters Checklist**Requirements:**

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.

Item No.	Transporter Requirements	Yes	No	N/A
6.1	Has the transporter notified the Department as a transporter and received an EPA identification number? 62-730.150(2)(a), 263.11(a)	✓		
6.2	Does the transporter repackage wastes with different USDOT shipping descriptions?			
6.3	If YES, does the transporter comply with 40 CFR 262 Generator Standards? 263.10(c)			✓
6.4	Does the transporter transport waste into the US from abroad?			
6.5	If YES, does the transporter comply with 40 CFR 262 Generator Standards? 263.10(c)			✓
6.6	Does the transporter obtain a signed and dated manifest prior to accepting a hazardous waste for transport?			
6.7	If NO, is the waste exempt from the manifest requirement? 263.20(a)(1) <input type="checkbox"/> Exemption Type - Tolling Agreement <input type="checkbox"/> Exemption Type - VSQG Bill-of-Lading	✓		
6.8	Does the transporter sign and date the manifest upon acceptance? 263.20(b)	✓		
6.9	Does the transporter leave a signed copy of the manifest acknowledging acceptance of the waste? 263.20(b)	✓		
6.10	Does the transporter ensure the manifest and, in the case of exports the Acknowledgment of Consent, accompany the waste during transport? 263.20(c)			✓
6.11	Does the transporter obtain the signature and date of delivery of the receiving (designated) facility or other transporter upon transferring custody of the waste? 263.20(d)(1)			✓
6.12	Does the transporter retain one copy of the manifest signed and dated by the designated facility or other transporter? 263.20(d)(2)			✓
6.13	Does the transporter give the remaining copies of the manifest to the designated facility or accepting transporter? 263.20(d)(3)			✓
6.14	If the entire quantity of hazardous waste cannot be delivered, does the transporter contact the generator for further direction and revise the manifest in accordance with the generator's instructions? 263.21(b)			✓
6.15	For a partial load rejection, while the transporter is on the facility's premises, does the transporter obtain a new manifest for the rejected material, accompanied by a copy of the original manifest that includes the manifest tracking number of the new manifest? 263.21(b)			✓
6.16	Does the transporter retain a copy of the manifest signed by the generator, himself, and the next designated transporter or designated facility for a period of three years from the date the hazardous waste was accepted by the initial transporter? 263.22(a)			✓
Item No.	Rail Transporters	Yes	No	N/A
6.17	If initial rail transporter, when accepting hazardous waste from a non-rail transporter does the rail transporter sign and date the manifest acknowledging receipt of the hazardous waste? 263.20(f)(1)(i)			✓
6.18	If initial rail transporter, does the rail transporter return a signed copy of the manifest to the non-rail transporter? 263.20(f)(1)(ii)			✓

Diversified Environmental Services Inc Inspection Report

Inspection Date: 05/24/2021

6.19	If initial rail transporter, does the rail transporter forward at least three copies of the manifest to the next designated non-rail transporter or facility? 263.20(f)(1)(iii)			✓
6.20	If initial rail transporter, does the rail transporter retain one copy of the manifest and rail shipping paper? 263.20(f)(1)(iv)			✓
6.21	Does the rail transporter ensure the shipping paper and, in the case of exports the Acknowledgment of Consent, accompany the waste during transport? 263.20(f)(2)			✓
6.22	Does the final rail transporter obtain the date of delivery and handwritten signature of the designated facility on the manifest or shipping paper? 263.20(f)(3)(i)			✓
6.23	Does the final rail transporter retain a copy of the manifest or signed shipping paper? 263.20(f)(3)(ii)			✓
6.24	When delivering hazardous waste to a non-rail transporter, does the rail transporter obtain the date of delivery and handwritten signature of the next non-rail transporter on the manifest and retain one copy of the manifest? 263.20(f)(4)			✓
Item No.	Water (Bulk) Transporters	Yes	No	N/A
6.25	Does the water (bulk) transporter obtain the date of delivery and handwritten signature of the designated facility on the manifest or shipping paper? 263.20(e)(3)			✓
6.26	Does the water (bulk) transporter retain a copy of the manifest or signed shipping paper? 263.20(e)(5)			✓
Item No.	SQG Waste	Yes	No	N/A
6.27	For SQG waste, if a manifest is not used is the waste being transported pursuant to a recalculation (tolling) agreement per 262.20(e)? 263.20(h)(1)			✓
6.28	Is the following information recorded on a log or shipping paper for each shipment? (Check items below that are NOT in compliance): 263.20(h)(2) <input type="checkbox"/> Name, address, and EPA identification number of the generator of the waste <input type="checkbox"/> Quantity of waste accepted <input type="checkbox"/> All DOT-required shipping information <input type="checkbox"/> The date the waste is accepted			✓
6.29	Does the transporter carry the shipping paper/log when transporting waste to the reclamation facility? 263.20(h)(3)			✓
6.30	Does the transporter retain shipping papers/logs for a period of at least three years after termination or expiration of the tolling agreement? 263.20(h)(4)			✓
6.31	If hazardous waste was discharged during transport, did the transporter give notice, if required by 49 CFR 171.15, to the National Response Center (800-424-8802)? 263.30(c)(1)			✓
6.32	If hazardous waste was discharged during transport, did the transporter report in writing as required by 49 CFR 171.16 to the Director, Office of Hazardous Materials Regulations, Materials Transportation Bureau, Department of Transportation, Washington, DC 20590? 263.30(c)(2)			✓
6.33	If hazardous waste was discharged during transport, did the transporter clean up the discharge so that it no longer presents a hazard to human health or the environment? 263.31			✓
