Re: **2023 Annual Groundwater Monitoring Report Review dated October 20 2023**
Former Davco Printed Circuits Facility
3000 South Andrews Avenue, Ft. Lauderdale, Broward County, Florida
Site Number: ERIC_10116 (formerly COM_69922) and OGC No. 93-0164

Dear Mr. Sul and Mr. Goldstein:

The Florida Department of Environmental Protection (Department), Southeast District, and the District & Business Support Program (DSP) in Tallahassee has reviewed the above referenced document dated October 20, 2023, prepared, and submitted by Geosyntec Consultants, Inc.

Please note, DSP review memorandum dated March 4, 2024, was provided to assist the Southeast District staff. The DBSP review memorandum is attached to this letter as Attachment 1.

Southeast District agrees with DSP's comments and observations.

In an effort to make a more efficient submittal process for all incoming Waste Cleanup correspondence, the Department is streamlining our workflow process. We are requesting that all incoming correspondence to the Southeast District related to the Waste Cleanup program be emailed to: SED_Permitting@floridadep.gov

Note, if required by rule, please be aware that an electronic file will be acceptable only if the certifying professional provides a statement and it is signed and sealed.

Additionally, all incoming and outgoing Waste Cleanup correspondence files that are too large to email shall utilize the secure File Transfer (FTP/FTS) site; please contact us for instructions if you plan on

utilizing this service. Please note that the Department cannot accept links to third party sites that exceed the email file limit.

Please ensure that all correspondence submitted contains a DEP Site/Project ID number in the cover letter/email. This number could be a Brownfields, COMET, ERIC, Tanks or other DEP program number. Please include that ID number on all copies of reports that you submit as well.

If you have any questions regarding this, please contact Todd Reinhold, at 561-681-6740 or by email at Todd.Reinhold@Floridadep.gov.

Sincerely,

Jacqueline Hurd
Environmental Manager
Permitting & Waste Cleanup Program
Southeast District

Memorandum

TO: Todd Reinhold, Professional Geologist I
Southeast District Office

THROUGH: Michael J. Bland, Professional Geologist II
District Support Program, DWM

FROM: Cole Hendrick, Environmental Specialist II
District Support Program, DWM

SUBJECT: **2023 Annual Groundwater Monitoring Report**
Former Davco Printed Circuits Facility
3000 S. Andrews Ave., Ft. Lauderdale, FL
Site ID: ERIC_10116

DATE: March 4, 2024

The District Support Program (DSP) has reviewed the 2023 Annual Groundwater Monitoring Report (dated October 20, 2023), submitted by Geosyntec Consultants (Geosyntec) for Former Davco Printed Circuits Facility (site). The subject document and other related site information were reviewed, and the following review comments are provided to assist the Southeast District staff with their review of this report. DSP's review comments should not be inferred to be an approval of the subject documents or proposals.

During a March 2023 sampling event, the groundwater cleanup target levels (GCTLs) for trichloroethene (TCE) and fluoride were exceeded in the shallow zone. The GCTLs for vinyl chloride (VC) and fluoride were exceeded in the intermediate zone. The GCTLs for cis-1,2-dichloroethene (cDCE), trans-1,2-dichloroethene (tDCE), and VC were exceeded in the deep zone. No other analytes were present above their respective GCTLs.

Based upon the above, I offer the following comment:

1. DSP concurs with the recommendation to conduct an additional monitoring event during the 2023 semiannual event at MW-62E to investigate if the natural attenuation monitoring/ post active remediation monitoring (NAM/PARM) action level continues to be exceeded.

If you have any questions, please contact me at cole.hendrick@floridadep.gov or (850)-245-8996
