Introduction:

Central Florida Carpenters, formerly Hulls Environmental Services (Hulls), was inspected by the Florida Department of Environmental Protection (Department) on October 25, 2022, to determine the facility's compliance with state and federal hazardous waste regulations. Hulls initially notified as a Hazardous Waste Transporter, a Universal Waste Lamp and Device Transporter, and a Used Oil/Used Oil Filter Transporter and Transfer Facility on July 13, 2014 (received by the Department on July 18, 2014). Department personnel conducted a site visit of this property and determined Hulls is no longer operating at this location. The facility under Hulls was previously inspected by the Department on October 29, 2014, February 23, 2017, and June 19, 2020. George Hudson, Instructor for Central Florida Carpenters, assisted the inspectors during the walk-through.

Process Description:

Central Florida Carpenters is a training trust fund union specializing in construction, carpentry, pile drivers, and millwrights. George Hudson confirmed the facility does not generate any universal or hazardous waste streams.

Conclusion:

Hulls consolidated their operations from this location to their 4380 28th Street North, Saint Petersburg location which operates under Facility ID # FLR000258293. As the current facility operations do not generate any hazardous waste, the facility's classification is being changed to closed.

1.0: Pre-Inspection Checklist

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Note: Checklist items with shaded boxes are for informational purposes only.
