Warning Letter Response

Dear Ms. Hopkins:

The Department is in receipt of your January 10, 2005 response to Warning Letter 04-024. Your response indicates that Environmental Enterprises of Florida, Inc. (EEFI) accepted a shipment of material from Eckerd Corporation as non-hazardous as described by Eckerd Corporation. During the sorting process it was discovered that the shipment contained hazardous waste. The Department accepts that receipt of the shipment as non-hazardous was not the result of any action on the part of EEFI and agrees to remove any penalties, but not the violations, associated with transportation and storage of the waste.

Please be aware, it is the responsibility of Environmental Enterprises of Florida, Inc. to ensure wastes accepted for transportation are shipped using the appropriate DOT shipping papers. Should Environmental Enterprises of Florida, Inc. ever encounter the same situation again, where hazardous waste has been unknowingly accepted for transportation, you should immediately notify the Department of the situation.

Sincerely,

Lu Burson
Environmental Manager
