**BOUNDARY DETERMINATION**

The Mean High Water (MHW) elevation on Lido Key is +0.24 feet above the National American Vertical Datum (NAVD) of 1988 based on the NOAA VDATUM Model @ R-40.

A MHW survey was conducted by CB&I Coastal Planning & Engineering, Inc., in July 2014, which is shown in Attachment No. 20.

Erosion Control Lines (ECL) for Lido Key have been included in this application as Attachment No. 12.

Attachment No. 24 provides the project permit sketches, which depict the location of the established ECL. The 1993 and 1999 ECL's are included with this application as Attachment No. 12.

An easement for authorization for use of Sovereign Submerged Lands is being requested with this application in association with this project.
