MONTHLY SUMMARY

FROM 11/1/94 TO 11/30/94

1. Tonnage In: 1,984.40

2. Tonnage Out:

Amount Recycled:

a. Whole Tires 99.58

b. TDF 1,677.03

c. Civil Engineering 561.41

Amount Landfilled -0-

Total Out 2,338.02

3. Net Reduction for Period: 353.62

Computation formula: Passenger tires at 20 lbs each, light truck at 40 lbs each and truck tires at 100 lbs each.

4. Ratio - Tons In:Tons Recycled

Current Period 117.82%

Year-to-date 114.25%

5. Passenger Tire Equivalents (PTE's) Recycled:

For the month 233,800

Year-to-date 2,372,995

6. Removal and Reconfiguration of Stored Materials:

a. The 335.62 net inventory reduction in October, 1994 was not as high as anticipated because of continuing "shakedown" problems being experienced by our second TDF account in getting their test burn under way. Regular shipments began December 12, 1994. Moreover, the first TDF account has reduced deliveries because of planned boiled maintenance beginning the third week of November, 1994.

b. An inventory of 400 to 500 tons of 1" sized TDF has been created as a working stockpile.

c. In late September it was discovered that a small amount of course shreds remained within the FP&L easement. The problem was caused by utilizing incorrect site lines. Previous visits by DEP personnel had not detected any problem. This material was on the extreme edge of the easement several hundred feet from the FP&L power lines and towers, therefore offering no fire hazard to these structures. Removal of the material was undertaken immediately and has been completed.

5. Fire Fighting Equipment and Training:

a. During the month, FTR continued its practice of starting and running each of the fire trucks in its fire battalion and generally "checking" the condition of the fire equipment.

6. Trust Fund:

a. A \$4,000 deposit was made the Trust Fund established for financial assurance on November 10, 1994. As of November 30, 1994 the balance was \$81,875 plus accrued interest. The next deposit will be made on December 13, 1994.

7. Engineering and Permit Applications:

a. The MSSW permit was issued on November 7, 1994. Florida Tire Recycling, Inc. has not been able to commence construction because continuing heavy rainfall has caused extremely saturated conditions. FTR and/or its attorney wrote the DEP on October 24, November 23 and again on December 9, 1994 regarding this situation and the linkage between the MSSW construction, the financial assurance requirements and issuance of the operating permit.
