RE: SWALE MAINTENANCE

Dear Mr. Pauley

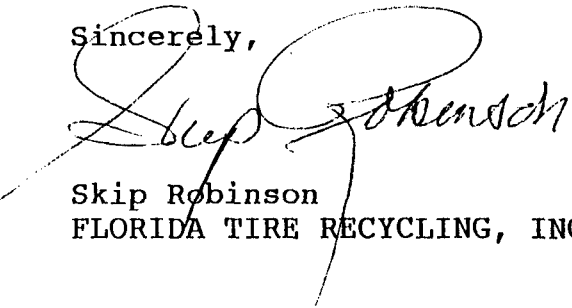

I am writing to confirm our conversation of Tuesday, April 26, 1994 which was in response to my call to the Engineering Department on Thursday, April 21, 1994.

It is my understanding that you have now had the opportunity to inspect the swale which runs in front of our property at 9675 Range Line Road and agree that it is in need of cleaning. In fact, the water in the swale is flooding onto our property.

Based on our conversation it is further my understanding that you hope to be able to clean this swale sometime within the next 30 days and certainly by the end of May.

We will appreciate your attention in this issue, since the swale has not been cleaned in several year.

Sincerely,

Skip Robinson
