RE: YOUR INSPECTION SUMMARY DATED JUNE 9, 1994

Dear Mr. Kahn,

As directed, I write to "respond to each item of non-compliance and each item requiring clarification within 10 days of receipt" of your letter addressed to Susan K. Wilson and received June 13, 1994.

ITEM 10B

Through its engineer Joseph Friscia, FTR continues to attempt to secure permission from FP&L to accept the "temporary loop road". However, FP&L has taken the position that it wants no further construction in the easement beyond that associated with the MSSW permit application (the wet and dry detention area). Without such permission FTR cannot proceed.

Representatives of FP&L have expressed the sentiment that any other construction, especially a road such as the one we are proposing at the Department's direction creates a sense of permanency to the storage of shreds in the FP&L easement. Moreover, with the removal accomplished there would no longer be a need for an access road since it would serve no purpose.

It should be noted that there exists an all seasons access road created by FP&L which is located north of the shred pile, in the FP&L easement. This access road is currently passable, even in wet weather, by fire department type vehicles.

Since the shreds located in the easement are being aggressively moved from the easement as the Department has directed, and since the FP&L access road exists, and since FP&L will not agree to further road construction in the easement, it is FTR's suggestion that the FP&L fire road does for all practical purposes provide the access required - the practical requirement for which will disappear when the shreds are removed from this area, on or about July 14.

Providing An Environmental Solution

ITEM 10C 1 (C)

As indicated by the attached invoices from NAPA, spark arrestors have been purchased and were subsequently installed on the internal combustion equipment which operates in the vicinity of the waste tire material.

ITEM 10C 2 (A)

FTR continues to employ AMERICAN SECURITIES ASSOCIATES OF FLORIDA, whose personnel hold Class D licenses, to furnish security guards at FTR from the close of business to the open of business the following day on those days when FTR does not operate on a 24 hour basis (daily security logs are available for inspection).

ITEM 10C 2 (B)

At this writing the area which you refer to as the "southern access road" is not an accepted access road. FTR has been restrained from completing the area as an access road by an action brought by FDEP against FTR regarding the construction in this area. Since this road is a road under construction, construction which has been halted by the Department, it is premature to locate anything beyond a construction barrier until such time as there is a passable road. As representatives from FDEP have seen during previous site inspections, an access gate has been constructed and is ready to be installed at such time that the road becomes passable.

FTR has discussed this issue with representatives of FDEP on several occasions and understood that there was an agreement that a barrier preventing access to the area would be acceptable until such time as the road in fact becomes an operational road.

In fact, during a first visit by the Department, inspectors requested that FTR extend the barrier so that it more properly denied access to the road. This extension was completed within 48 hours of the request and has been in place since, except for those times when FTR at the direction of FDEP has returned to the area to clean shreds from the surface and adjoining areas of the road. Therefore, we are confused as to why the access gate continues to be an issue.

ITEM 10 C (8)

FTR continues to work with SLCFPFCD with regard to its fire plan. As a result of a recent inspection by Captain Vaughn and Deputy Chief Sessoms (see enclosed letter dated June 7, 1994), FTR expects shortly to receive approval of its plan from SLCFPFCD.

Joseph Kahn
June 20, 1994
page 3

Further, FTR did not interpret Captain Vaughn's letter of April 14, 1994 as a denial; rather, the Company accepted it as part of the process in working toward an acceptable plan. Captain Vaughn made several recommendations which have been followed by FTR.

ITEM 10 D (1)

As pointed out in the May summary, at various times the fire lanes and perimeter roads have been clear to the bare ground. However, since these same areas are part of the working roads for moving shredded material, especially material from the FP&L easement, and since from time to time, as a result of that moving of shreds, material drops from the front end loaders performing the removal and relocation work, it is not practically possible to keep these roads at all times clear of shreds. Frankly, FTR revisits these roads and clears them. But these are working areas and do not permit a surface totally clean of shreds until the reconfiguration is complete.

ITEM 10 D (2)

See above 10 D (1)

ITEM 10 E

FTR is confused by your suggestion that it has not removed an adequate tonnage of tires for the month of May. A review of the first page of the May summary, submitted on June 8th, together with the weekly reports (all of which are attached and which were provided to the Department at the close of each week) indicates that FTR has in fact exceeded the Base Removal Amount (BRA) for May by 12.13 tons. (Please see enclosed photo copy of adding machine tape: shipped from the site, 3966.18 - BRA, 3954.05 = 12.13 tons).

If there are questions with regard to this material please call; I may be reached at 407-465-0477.

Sincerely,

Skip Robinson

Mr. Skip Robinson
Florida Tire Recycling, Inc.
9675 Range Line Road
Port St. Lucie, FL 34987

Dear Mr. Robinson:

At your request Deputy Chief Sessoms and I responded to Florida Tire Recycling on June 7, 1994.

It was obvious that there has been a great reduction in the amount of shredded tire piles located on this property. Deputy Chief Sessoms also visited your site on June 1, 1994. At this time there were some concerns pertaining to the water supply. This has been temporarily corrected until final water distribution plans have been installed. Deputy Chief Sessoms also advised that there was a very noticeable reduction in the tire piles from June 1, 1994 to June 7, 1994.

The St. Lucie County-Ft. Pierce Fire District appreciates the actions of Florida Tire Recycling, Inc. to eliminate this hazard.

Sincerely,

ST. LUCIE COUNTY-FT. PIERCE
FIRE PREVENTION BUREAU

Deputy Chief Perry Sessoms
Fire Marshal
