Bill

Please revise FTR's inspection report and attach this document. In the interim, you can forward FTR the email informing them that the tires north of the pond are outside of the permitted solid waste and ERP permitted areas. Waste tires cannot be stored outside of the permitted areas and this becomes part of the 12-4-03 reinspection for compliance.

ftt.doc (209 KB)

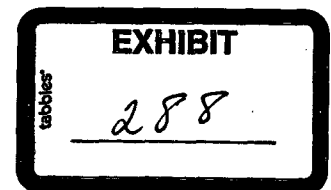

Joe,

The ERP does not include the area North of the approximate red line shown in the attached.

Indar

Please let us know if the waste tires north of the pond are within the approved MSSW system. The plans we have

, dated 2-29-00 show a berm at 28.0 north of the pond to Allied's property, while the approved as-builts in your files dated 12-00 show there is no berm north of the pond.

Engineer IV
