COMMENTS:

04/13/2011

Comment 1.

No tires were received or processed during the inspection. The tire storage area was in compliance with Specific Condition C.8 and the Operation Plan. The cement kiln was not operating at the time of the inspection. The plant was shut down for repairs the previous week.

Comment 2.

A large stockpile of a black colored substance was observed to the southwest of the active area of the plant. Facility personnel confirmed the material was bottom ash from Seminole Electric

Inspection Date: 03/28/2011

Cooperative Generating Station in Palatka, FL.

Based on an aerial photo review, the Department observed a second stockpile of a similar black colored substance located north of the plant. Please verify the nature of this material and its source. Please include analytical data, if available, as part of the response.

Comment 3. Item 9.1.1. Marked "Unknown."

Rule 62-701.220(2)(d) F.A.C. states, "This chapter applies to all solid waste and each solid waste management facility in this state, with the following exceptions: ... (d) Industrial byproducts, if

1. A majority of the industrial byproducts are demonstrated to be sold, used, or reused within one year;
2. The industrial byproducts are not discharged, deposited, injected, dumped, spilled, leaked, or placed into or upon any land or water so that such industrial byproducts or any constituent thereof may ... or discharged into any waters, including ground water, or otherwise enter the environment such that a threat of contamination in excess of water quality standards...is caused, or a significant threat to public health is caused; and
3. The industrial byproducts are not hazardous wastes;"

Within 45 days of receipt of this report, please provide documentation that the material described above in Comment 2 (assumed to be ash), meets the criteria of Rule 62-701.220(2)(d) F.A.C.
