RE: Angelo's Recycled Materials  
Enterprise Class III Landfill, Permit No.: 177982-007-SO/T3  
Annual Estimate of Remaining Life and Capacity for Landfill

Dear Ms. Pelz:

This letter report is provided to the Department as required by Rule 62-701.500(13)(c), F.A.C. A new topographic survey (signed and sealed) showing the top of the active fill areas was completed by Simmons and Beall, Inc. on March 7, 2012 and is enclosed.

To date Cells 1, 2, 3, 4, 5, and 15 have been constructed, certified by the Department, and have accepted Class III materials.

The remaining airspace capacity of the permitted landfill is estimated to be approximately 446,000 cy (as of January 1, 2012), which will take approximately 2.1 years to fill assuming the current annual disposal rate remains constant.

If you have any questions, please feel free to call me at (352) 339-1408.

Sincerely,

A handwritten signature in black ink that reads "John P. Arnold".

John P. Arnold, P.E.
