Subject: Rinker Waste Tire General Permit Application

Re: Rinker Waste Tire Processing Facility General Permit

Barbara Jones returned this application to Tallahassee via interoffice mail because we cannot generate a PATS number from here since the fee was accepted in Tallahassee. We need to deny this GP because the facility does not qualify because they intend to process more than 500 waste tires per thirty days. The application and fee was received in Tallahassee on July 1, 1993. We must deny this by July 30th. We can issue the denial letter from the district office, but we need the PATS number to do so. Please advise us what the PATS number is ASAP and we will send the denial letter, with a copy to you. Thanks.
