Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Ms. Pelz:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months April, May and June 2005, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

RE: WEEKLY LEACHATE MONITORING REPORT FOR CITRUS COUNTY CENTRAL LANDFILL 60 AND 80 ACRE SITES - PERMIT NO. 21375-003-SO

Dear Mr. Morris:

Enclosed please find the following leachate monitoring results for the Citrus County Central Landfill site, together with the Operator's monthly reports covering the quarterly period April, May and June 2005:

1) **Weekly effluent analytical results:** There were no exceedances of permit limits for this time period.
2) **Quarterly Effluent results:** Forwarded by Jones, Edmunds and Associates under separate cover letter.

Should further information or clarification be necessary, please do not hesitate to contact me.

Sincerely,

Susan J. Metcalfe
Director, Division of
Solid Waste Management

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Ms. Pelz:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months January, February and March 2005, together with the Year to Date Leachate Tracking Summary.

Please note the high secondary flow for this period is due to the tie-in of the new cell liner to the 80-acre liner, leaving liner exposed to weather conditions.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Ms. Pelz:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months October, November and December 2004, together with the Year to Date Leachate Tracking Summary.

The impact of the hurricane/tropical storm related leachate flows is evident in the October measurements, including surface leachate flow and offsite treatment. During November, 7-acre flows were impacted by the requirement to turn off pumps related to the leachate lift station and transmission line testing and inspection. This work is related to permit renewal-required testing. Recirculation of various liquids from the leachate treatment plant may be impacting the overall balance being reported in these spreadsheets. We expect this item to be discussed as part of the operating permit renewal and as summarized below.

Beginning with this reporting period, we have instituted the first part of a proposed change in flow measurement technique as a test of this issue prior to permit renewal. The meter that measures flow from the combined 7-acre lift stations is a mechanical meter that is prone to malfunction. We proposed to delete use of that meter. We ran pumping rate tests on each 7-acre lift station separately to determine normal rates. Each lift station has an elapsed time meter. The total of the calculated flow rates from the ETMs has been entered as the measure of 7-acre flow.

The electronic flow meter that measures the combined flow from the 7-acre lift stations plus the treatment plant lift station (which is unmetered) has been used in the past to calculate plant lift station flow by subtracting the 7-acre flow from the electronic flow meter readings. The plant flow information is not required by permit to be reported.

The County proposes to install an electronic flow meter at the plant lift station (along with replacing check valves) to get a direct measurement of the amount of flow that is produced in the plant and drying beds then recirculated to the master lift station and storage tanks. We propose to continue comparing the ETM readings with the difference between the two electronic meters as the basis for reporting 7-acre lift station flows. The new flow meter has been ordered

During December, the Phase 1A (80-acre site) secondary flow meter indicates increased flow. For five days during the month, the flow rate exceeded the action leakage rate for the permit. The cause is exposure of the secondary geocomposite material to direct rainfall while liner installation for Phase 2 is being conducted rather than leakage. Our calculations indicate that approximately half of the direct rainfall for December on the open anchor trench was pumped from the secondary leachate collection system.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Ms. Pelz:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months July, August and September 2004, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

RE: WEEKLY LEACHATE MONITORING REPORT FOR CITRUS COUNTY CENTRAL LANDFILL 60 AND 80 ACRE SITES - PERMIT NO. 21375-003-SO

Dear Mr. Morris:

Enclosed please find the following leachate monitoring results for the Citrus County Central Landfill site, together with the Operator's monthly reports covering the quarterly period July through September 2004:

1) **Weekly effluent analytical results:** There were no exceedences of permit limits for this time period.
2) **Annual Leachate Influent, Annual Leachate Effluent / Quarterly and Annual Waste Sludge results:** Forwarded by Jones, Edmunds and Associates under separate cover letter.

Should further information or clarification be necessary, please do not hesitate to contact me.

Sincerely,

Susan J. Metcalfe
Director, Division of
Solid Waste Management

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months October, November and December 2003, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,

Susan J Metcalfe

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months October, November and December 2002, together with the Year to Date Leachate Tracking Summary.

The daily operating report meter readings indicated that during the months of October and November, 80-2 Primary meter had a bad ground causing erroneous readings and the pump was turned off on 11/24/02. 80-3 primary meter was out for repair during the month of October and put back into service on 11/25/02. Therefore, the primary leachate collection system flows for the months of October and November indicate daily estimates on the attached reports. It was further discovered that the meter failed during the end of September, for which month we have enclosed a revised report as well. The daily flow was estimated based on previous month's data, where similar rainfall conditions existed.

A copy of the Repair Memo(s) from the Citrus County Utilities Division is attached for reference.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

To: Susan Metcalfe, Director, Solid Waste Division

From: James Conley, Chief Operator, Utilities Division

Though: Robert Merkel, Assistant Director, Utilities Division

Date: January 21, 2003

RE: **REPAIR OF PRIMARY PUMP FLOW METER FOR 80-ACRE SITE**

The following is a synopsis of events that occurred between September 18, 2002 and November 21, 2003 during the repair of the flow meter located in the 80-Acre lift station of the Landfill:

- #2 Flow meter did not have a display. Replaced main power supply fuse. Fuse immediately blew indicating a dead short in the meter. Returned meter to manufacturer (ABB) for repair. During this time, #1 meter flow meter was registering when no flow was present. This can be attributed to grounding issues that were created when #2 meter was removed.
- #2 flow meter is reinstalled and functioning properly. #1 meter is also working properly. It is determined that the alternator is not working and a new alternator is required. Utilities is researching a replacement.

The flows for this time period were estimated from previous month's data, where similar rainfall conditions existed.

RE: **REPAIRS OF EAST LIFT STATION PUMP IN 7-ACRE SITE AT LANDFILL**

The following is a synopsis of events that occurred between November 7, 2002 and January 3, 2003 during the repair of the East Lift Station located in the 7 Acre (closed section) of the Landfill:

- Inspected pump and found motor windings shorted.
- Installed spare pump (stored at Landfill) and checked rotation, flow, ground resistance, amperage draw and voltage readings. Put station back in service and sent pump in for repairs.
- Spare pump failed, inspected and determined pump experienced a seal failure causing the motor windings to short out. Seal failure was caused by long period of storage and the original seal was not rated for heavy-duty use.
- Rebuilt motor starter – installed new contacts and thermal overload units.
- Installed phase monitors in each panel to protect pumps.
- Installed repaired pump and checked rotation, flow, ground resistance, amperage draw and voltage readings. Put station back in service and sent pump in for repairs.
- Pump fails Returned to the repair shop to investigate. It was determined that the bearing retainer had dropped down, resulting in the failure. Repair don under warranty.
- Installed twice repaired pump and checked rotation, flow, ground resistance, amperage draw and voltage readings. Put station back in service and sent pump in for repairs.
- Follow up inspection show the pump is still operating normally.

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months October, November and December 2002, together with the Year to Date Leachate Tracking Summary.

The daily operating report meter readings indicated that during the months of October and November, 80-2 Primary meter had a bad ground causing erroneous readings and the pump was turned off on 11/24/02. 80-3 primary meter was out for repair during the month of October and put back into service on 11/25/02. Therefore, the primary leachate collection system flows for the months of October and November indicate daily estimates on the attached reports. It was further discovered that the meter failed during the end of September, for which month we have enclosed a revised report as well. The daily flow was estimated based on previous month's data, where similar rainfall conditions existed.

A copy of the Repair Memo(s) from the Citrus County Utilities Division is attached for reference.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

RE: **REPAIR OF PRIMARY PUMP FLOW METER FOR 80-ACRE SITE**

The following is a synopsis of events that occurred between September 18, 2002 and November 21, 2003 during the repair of the flow meter located in the 80-Acre lift station of the Landfill:

- #2 Flow meter did not have a display. Replaced main power supply fuse. Fuse immediately blew indicating a dead short in the meter. Returned meter to manufacturer (ABB) for repair. During this time, #1 meter flow meter was registering when no flow was present. This can be attributed to grounding issues that were created when #2 meter was removed.
- #2 flow meter is reinstalled and functioning properly. #1 meter is also working properly. It is determined that the alternator is not working and a new alternator is required. Utilities is researching a replacement.

The flows for this time period were estimated from previous month's data, where similar rainfall conditions existed.

RE: **REPAIRS OF EAST LIFT STATION PUMP IN 7-ACRE SITE AT LANDFILL**

The following is a synopsis of events that occurred between November 7, 2002 and January 3, 2003 during the repair of the East Lift Station located in the 7 Acre (closed section) of the Landfill:

- Inspected pump and found motor windings shorted.
- Installed spare pump (stored at Landfill) and checked rotation, flow, ground resistance, amperage draw and voltage readings. Put station back in service and sent pump in for repairs.
- Spare pump failed, inspected and determined pump experienced a seal failure causing the motor windings to short out. Seal failure was caused by long period of storage and the original seal was not rated for heavy-duty use.
- Rebuilt motor starter – installed new contacts and thermal overload units.
- Installed phase monitors in each panel to protect pumps.
- Installed repaired pump and checked rotation, flow, ground resistance, amperage draw and voltage readings. Put station back in service and sent pump in for repairs.
- Pump fails Returned to the repair shop to investigate. It was determined that the bearing retainer had dropped down, resulting in the failure. Repair don under warranty.
- Installed twice repaired pump and checked rotation, flow, ground resistance, amperage draw and voltage readings. Put station back in service and sent pump in for repairs.
- Follow up inspection show the pump is still operating normally.

Re: **Citrus County Central Landfill - Permit No. 21375-003-SO**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months January, February, and March, 2002, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,
Susan J Metcalfe (352) 5277670

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months July, August and September 2001, together with the Year to Date Leachate Tracking Summary.

The performance review of flow meters as well as the impact of leachate recirculation from the treatment plant to storage, as well as the adjustments made to the reporting process will follow under separate cover.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months April, May and June 2001, together with the Year to Date Leachate Tracking Summary.

After your question in last months meeting, we are reviewing performance of flow meters as well as the impact of leachate recalculation from the treatment plant to storage as possible reasons for the apparent discrepancy between influent and effluent values.

No definitive answer has been reached as yet.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

SJM:CJW:cjw(Winfile/DEP/FordLea.Doc)

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months January, February and March 2001, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Quarterly Leachate Generation and Daily Precipitation Report for the months of October, November, and December, 2000 together with the Year to Date Leachate Tracking Summary.

If you should have any questions, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months July, August and September 2000, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Quarterly Leachate Generation and Daily Precipitation Report for the months of April, May, and June, together with the Year to Date Leachate Tracking Summary.

For Informational purposes: the Number 4 Secondary meter for the 80 Acre Site was off-line for repairs 5/12 through 6/16/00.

We have revised the reporting process, effective this quarter, to show the 7-acre flow after recirculation.

If you should have any questions, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Quarterly Leachate Generation and Daily Precipitation Report for the months of January, February, and March, together with the Year to Date Leachate Tracking Summary.

Please note that the 7-acre lift stations were out of service for several days during mid-January when the power panels were moved away from the lift stations. In addition, after the explosion that occurred in the east side lift station on January 28, both lift stations were turned off until repairs were made. They were placed back in service on February 18.

The reason that the column in the tables marked "7-acre flow" does not show zero flow during this time period is that the electronic meter includes the treatment plant lift station flow as well. Therefore, drainage from the sludge drying beds, treatment plant filter backwash, sludge digester decanting and cleaning of effluent storage tanks contribute to the total. This has been the case since Phase 1A was constructed.

We did not remove the mechanical flow meter that measures 7-acre lift station flow and can have that data included in the next report if you feel that is necessary.

Sincerely,

Susan J. Metcalfe

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months October, November, and December 1999, together with the Year to Date Leachate Tracking Summary.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months of July, August and September, 1999, together with the Year to Date Leachate Tracking Summary.

Please note, due to the 7 acre meter damage, the old 7 acre flow meter has been utilized for readings.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Quarterly Leachate Generation and Daily Precipitation Report for the months of April, May and June, 1999, together with the Year to Date Leachate Tracking Summary.

A project status summary on replacement of the leachate flow meters and repair of other items (primarily electrical) related to Phase 1A construction will follow under separate cover.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: **Citrus County Central Landfill - Permit No. SO09-274382**
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17.c. of the above permit, enclosed please find the quarterly Leachate Generation and Daily Precipitation Report for the months of January, February and March, 1999, together with the Year to Date Leachate Tracking Summary.

Please note, plant processing was discontinued on 2/3/99 for the batch tank refurbishing project. Plant re-start processing discharge commenced on 3/3/99 through 3/20/99. Off-site disposal to County owned WWTP's commenced on 3/23/99 after receipt of two weeks of CBOD analytical results exceeding permit limits.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Quarterly Leachate Generation and Daily Precipitation Report for the months of October, November, and December, 1998, together with the Year to Date Leachate Tracking Summary.

A contract has been awarded tor replacement of the leachate flow meters and repair of other items (primarily electrical) related to Phase 1A construction. We expect completion within about 4-6 weeks.

If you should need additional information, please let me know.

Sincerely,

Susan J Metcalfe

Susan J. Metcalfe

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

Enclosed please find revised leachate generation reports for the months of July, August and September, 1998 which includes the revised number of open, intermediate, unused and closed acres for the landfill.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Citrus County
Division of Solid Waste Management

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Quarterly Leachate Generation and Daily Precipitation Report for the months of July, August, and September, 1998, together with the Year to Date Leachate Tracking Summary. We have been providing this information on a quarterly basis as you had requested.

There has been no change in the status of the problems with the leachate flow meters. Now that the new fiscal year has begun, we expect to be able to bid the contract to fix all items which were not as specified on Phase 1A Construction.

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Re: Citrus County Central Landfill - Permit No. SO09-274381
Leachate Generation and Daily Precipitation Report

Dear Mr. Ford:

In compliance with Specific Condition 17. c. of the above permit, enclosed please find the Semi-Annual Leachate Generation and Daily Precipitation Report for the months of January, February, March, April, May and June, 1998, together with the Year to Date Leachate Tracking Summary.

Please note that the meters on the secondary leachate pumping system frequently show a few gallons or a few tens of gallons of flow. We believe that these are false positive flow readings. Considering the current pump settings, any flow less than about 250 to 300 gallons is a physical impossibility. All leachate meters installed as part of Phase 1A construction are going to be replaced.

)) meters too big for pipe

If you should need additional information, please let me know.

Sincerely,

Susan J. Metcalfe

Board of County Commissioners

Department of Public Works

MESSAGE

TO: Kim Ford - Department of Environmental Protection
(Fax 813/744-6125)

FROM: Susan J. Metcalfe, Director
Citrus County, Division of
Solid Waste Management
Fax #352/527-1204 - Phone 352/746-5000

Re: Daily Gallons Leachate Generated, Disposed and Precipitation Data

OF PAGES 2 including cover

DATE OF TRANSMITTAL: 2/17/98

Message:

Per your request, please find the December, 1997 report for the Citrus County Central Landfill.

If you should have any questions, please let me know.

Thank you.

Re: Citrus County Central Landfill - Leachate Quantity Reports
Permit SO09-187229 - 80 Acre - Permit SF09-211030 - 7 Acre

Dear Mr. Ford:

Enclosed please find **revised** Year to Date Leachate Tracking Summary and Monthly Reports for January through September, 1996, for the Citrus County Central Landfill.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe
Director, Solid Waste Management

Re: Citrus County Central Landfill - Leachate Quantity Reports
Permit SO09-187229 - 80 Acre - Permit SF09-211030 - 7 Acre

Dear Mr. Ford:

Enclosed please find daily leachate generation/precipitation data; open, intermediate, unused and closed acres for the months of April, May, and June, 1996; Year to Date Leachate Tracking Summary for the 2nd quarter for 1996, for the Citrus County Central Landfill.

The monthly reports still indicates the special project column which is an estimate of water added to and subsequently removed from the 7-acre east side lift station as reflected in last quarter's report. We anticipate repairs to commence July 15th.

Effective May 18, 1996, all underdrain and surface leachate will be directed to the leachate holding facility; from the holding facility to the plant for treatment.

Please note, the leachate plant was down for major equipment maintenance from May 23rd until June 18th.

See revised April, May, June 2nd Qtr summary DEL 10/21/96

Re: Leachate Quantity Reporting
Permits: #S09-187229 and #SF09-211030, Citrus County

Dear Ms. Metcalfe:

Attached are two examples of a leachate quantity annual summary report. This type of summary is a quick and easy reference for both the Department and yourself to notice unusual quantities of leachate that may be collected from your landfill disposal units. This office suggests you use the format and submit the summary with each quarterly submittal of leachate quantity monthly reports, by January 15th, April 15th, July 15th, and October 15th each year. The Department intends to modify all related permits that do not currently require the reports be submitted quarterly.

Your attention to this matter will be greatly appreciated. If you have any questions, you may call me at (813) 744-6100, extension 382.

Sincerely,

Kim B. Ford, P.E.

Re: Citrus County Central Landfill - Leachate Quantity Reports
Permit SO09-187229 - 80 Acre - Permit SF09-211030 - 7 Acre

Dear Mr. Ford:

Enclosed please find daily leachate generation/precipitation data; open, intermediate, unused and closed acres for the months of January, February, and March, 1996; Year to Date Lechate Tracking Summary for the Year 1995 and 1st quarter for 1996, for the Citrus County Central Landfill. We are following your recently suggested format for the monthly and annual summary reports.

The March report shows a special project column which is an estimate of water added to and subsequently removed from the 7-acre east side lift station in an attempt to make a slurry of sediment in the bottom of the sump for removal. The additional sediment in the discharge makes the use of the flow meter impractical. We expect that this process will take a few weeks to complete for both lift stations.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe

FDEP Survey - Leachate Management Workshop - NOV. 28, 1995

RECEIVED
DEC 21 1995
Department of Environmental Protection
SOUTHWEST DISTRICT
BY

Name Susan Metcalfe

County Citrus

Department Solid Waste Management

(1) Was the length of time of the workshop appropriate for the subject matter covered?

yes

(2) If too long or too short, what length of time do you think would have been adequate to cover the material? What length of time would you like future workshops to be?

4-6 hours mid day is fine I believe that the sessions would be even more productive if an outline were available ahead of time & if specific info sharing is expected let us prepare.

(3) Do you believe the information received will be helpful to you for future leachate management at your facility?

yes

(4) Do you feel your questions were responded to appropriately?

yes

(5) Are you interested in having sessions scheduled on various solid waste issues such as permitting, groundwater monitoring, cost estimates and other landfill operational procedures? Please suggest topics of interest.

permitting, gas control / monitoring
daily cover options erosion control materials/techn

(6) If your response to (5) was yes, should sessions for small or intermediate size counties be separate from sessions with the larger counties?

not necessarily - the situations related to landfills are similar for all. Larger counties just have more staff & commit

(7) How often should any future sessions be scheduled? Check one:

Quarterly ____ Semi-annually ✓ Annually ____

Other ____ What timeframe? Spring / Fall

Re: Survey Request on Nov. 28th, 1995 Inter-governmental Meeting on Leachate Management

Dear Ms. Metcalfe,:

The Florida Department of Environmental Protection's Southwest District Solid Waste Section thanks you for attending the inter-governmental sharing meeting on Leachate Management on Tuesday, November 28, 1995. Due to unexpected personal reasons I was not able to attend but I have listened to the recordings of the session and have been updated by staff. The workshop appears to have been a success but I would like to get your input on the merits and shortcomings of this meeting and your ideas for sessions the Solid Waste Section may schedule in the future.

Attached is a survey that I would appreciate you responding to and forwarding to my attention by December 31, 1995. Signing of the survey is optional. This information will be helpful for planning purposes of any future workshops. The Solid Waste Section is always available for any questions you may have relating to the Solid Waste Regulations or technical guidance.

All members of the Solid Waste staff sincerely thank you for your time and participation at the November 28th meeting. If you have any other questions or comments you may contact me at (813) 744-6100, Ext. 451.

Sincerely,

Robert J. Butera

Re: November 28, 1995 Intergovernmental Meeting to Discuss Leachate Management Issues

Dear Ms. Metcalfe:

The Florida Department of Environmental Protection Southwest District Solid Waste Section would like to invite you to attend an intergovernmental information sharing meeting, discussing the issues of Leachate Quantity Reports submittals and current available off-site leachate disposal options.

The meeting will be held on Tuesday, November 28, 1995, from 10:00 A.M. to 2:30 P.M., at the Department's Southwest District office in Tampa.

This meeting will allow you a forum to freely discuss any questions you may have in regard to and identify ways you can use the reported leachate quantity data and will allow for an exchange of information on off-site leachate disposal options available and currently used. Attached is a summary of data reported this year, for your review.

AGENDA

Leachate Quantity Reports (formats and uses)	10:00 - 11:30 A.M.
Off-site Leachate Disposal (options and limitations)	11:30 A.M. - 12:30 P.M.
Lunch Presentation (Hillsborough County Southeast Landfill)	12:30 - 1:30 P.M.
Wrap-up and Questions	1:30 - 2:30 P.M.

Lunch delivery will be available at a cost of $3.50 per person to include a sandwich, chips, and a soft drink, or you may bring your own lunch. There will be space available in the meeting room to allow up to 3 persons per facility to attend. The Department suggests that at least one individual who is directly responsible for leachate management at the facility attend the meeting. Counties may choose to invite their consultant if they are responsible for compiling leachate data for the landfill.

Ms. Susan Metcalfe
Citrus County

NOV - 9 1995

You are requested to contact me at (813) 744-6100, ext. 382, prior to November 22, 1995, confirming who from your organization will be attending the meeting or if you have any questions.

Sincerely,

Kim B. Ford, P.E.
Solid Waste Section
Division of Waste Management

Re: Citrus County Central Landfill - Leachate Quantity Reports
Permit SO09-187229 - 80 Acre - Permit SF09-211030 - 7 Acre

Dear Mr. Ford:

Enclosed please find daily leachate generation; disposal amounts; precipitation data; open, intermediate, unused and closed acres for the months of July, August and September, 1995 for the Citrus County Central Landfill.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe

Subject: CITRUS COUNTY LANDFILL LEACHATE MANAGEMENT

I spoke with Ms. Kathy Winter today at 1:45. She explained the reason that so many of the numbers for leachate collected are the same is because they don't read the meter very often and prorate the numbers. I requested "NR" be used on the form when there is no reading, the next number will represent all previous NR days and NR should only be used on Sundays or holidays, no prorating. I asked about the "DPW culvert" and "Storwater 80" readings. She explained that the Dept. of Public Works (DPW) discharges contaminated stormwater from culvert cleaning into the treatment plant and discharge from the bermed working area must be measured separately since it does not pass through the leachate collection system and pump station. I asked that these discharges be requested in writing to DEP and the method of measuring each be explained. She said this can be done Monday when Ms. Metcalfe returns from vacation. I also told her that according to the records leachate collected from the landfill is only 1/3 to 1/2 that expected and there is concern that leachate is not reaching the collection system and is building up inside the landfill which could cause the north slope to fail.

Re: Citrus County Central Landfill - Leachate Quantity Reports
Permit SO09-187229 - 80 Acre - Permit SF09-211030 - 7 Acre

Dear Mr. Ford:

Enclosed please find daily leachate generation; disposal amounts; precipitation data; open, intermediate and closed acres for the months of April, May and June, 1995 for the Citrus County Central Landfill.

We were unsure unused as to how you wish to classify the liner area above the gutter system. (Installation was completed on June 12, 1995.) We have included it as intermediate cover area on the report, but believe it could now be considered closed, as it does not contribute to leachate generation.

We have enclosed photographs showing the liner area in question. I would like to discuss this issue with you, at your convenience.

Sincerely,

Susan J. Metcalfe

Re: Citrus County Central Landfill
Permit SO09-187229 - Leachate Quantity Reports

Dear Mr. Ford:

Enclosed please find daily leachate generation; disposal amounts; precipitation data; open, intermediate and closed acres for the months of January, February, and March, 1995 for the Citrus County Central Landfill.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe

Subject: RE: LEACHATE TREATMENT VESSELS<>LEACHATE STORAGE TANKS

Sometimes, late is better than never. Whether it's true or not in this case is a judgment call for you.

I more or less agree with Richard, although I think his suggestions make most sense if you agree that it is necessary to use the existing tanks temporarily until a proper system can be put in place. As far as the rule goes, 62-701.400(6)(a) says that "leachate storage tanks in use on January 6, 1993, are not required to retrofit." In my opinion these tanks were not in use as leachate storage tanks on 1-6-93, and so don't qualify; thus the requirements apply.

Subject: RE: LEACHATE TREATMENT VESSELS<>LEACHATE STORAGE TANKS

As you know, our rule is silent on this particular case. It only addresses new or existing leachate storage tanks. These are existing tanks but, I assume, they were not used for leachate storage. Since you referenced Rule 17-701.400(6)c, I also assume the tanks are above ground.

While it can be argued that retrofitting will be required for use of these tanks as temporary or permanent leachate storage tanks, I think it is also acceptable to use the existing tanks without retrofitting if:

1. Citrus County can document that they do not leak or have corrosion or other defects. A written certification to this effect by a PE with supporting documentation would be needed.

2. The tanks are not so large that they will have to be cut apart in order to be moved and then rewelded together. I think this should be treated as new construction an the requirements of Rule 17-701.400(6)c apply.

3. You have no reason to doubt that the County would make a good faith effort to operate the tanks in a responsible way. This is a judgment call that only you can make.

Since the tanks are above ground, they can be visually inspected to determine if they leak which might be something to consider in your decision. If you are worried about leakage through the bottom of the tank, you could take a RCRA C approach and require the tank be placed on top of a grate or other support which would allow for visual inspection of the bottom of the tank as well.

As a final thought, we have to ask ourselves if being generous here would set a bad precedent. We don't want folks to get around our standard for new leachate tanks by always "finding" existing tanks to use. This again is a judgment call. What do you think about discussing this at the SW workshop?

Subject: LEACHATE TREATMENT VESSELS<>LEACHATE STORAGE TANKS

Citrus County has a leachate treatment plant that isn't working very well at this time and would like to use the plant's 3 treatment vessels as leachate storage tanks temporarily, and maybe permanently. These vessels are constructed of steel and have no secondary containment.

1. Are these vessels required to be retrofitted prior to use as temporary or permanent leachate storage tanks to meet the criteria of FAC rule 17-701.400(6)(a) and (c)?

Re: Citrus County Central Landfill
Permit SO09-187229 - Leachate Quantity Reports

Dear Mr. Ford:

Enclosed please find daily leachate generation and precipitation data for the Month of August, 1994 for the Citrus County Central Landfill. Please note that this is the first full month for which flow meters have been in place to record amounts derived from the 7-acre site underdrains and the active 17-acre cell (listed as 80-acre site).

The flow meter which records leachate generation data from the 7-acre site was reported out of service on August 12. County staff attempted the repairs suggested by the manufacturer on August 14, but were unsuccessful. We will need our contractor to return to the site to place a temporary connection in the leachate line while the meter is returned to the manufacturer for warranty repairs. Meanwhile, we can estimate flow based upon pumping times.

Your letter of August 24 requested clarification of our August 11 leachate management report and other related conditions.

1. The quantity of leachate transferred from the holding pond to the WWTP is much greater than the quantity collected from the 7 Acres and 80 Acre Disposal Units as reported. Why does Citrus County report 30,000 gpd removed from the pond but only 10,000 gpd collected from the disposal units? Is the additional 20,000 gpd difference due to excess leachate impounded in the holding pond, from rain falling directly into the holding pond, unmetered leachate pumped off the top of the active disposal unit, or a combination of more than one source? All leachate collected must be recorded for each collection sump in order to compare actual data with expected leachate generation rates as required by FAC Rule 17-701.500 (8)(f) and (g).

Printed on 30% Post Consumer Paper with Soybase Ink

The table headings which indicate leachate lift station amounts show the gallons pumped each day from the two separate leachate collection systems. These are the 7-acre closed site, which has two lift stations pumping through a single flow meter and the active site located on our 80-acre property which registers on another flow meter. Data are available to estimate volume by using pump operation time versus pump curves if the flow meters are out of service. During the time in question, all leachate, whether from the underdrain lift stations or from the sump on the working surface, was pumped to the holding pond. The amount of leachate delivered to the pond from the sump in the working area is not metered. Rainfall or runoff directly added to the pond is also not metered, however this can be estimated at 22,000 gallons per inch of rainfall. The volume of leachate mix which is pumped to the treatment plant is shown as the total influent.

Using the August values as an example, 250,934 gallons were derived from the underdrain lift stations, 160,600 gallons were derived from direct rainfall and 268,500 gallons were derived the surface sump and the change in storage in the pond from beginning to end of month. During the month of August, the amount held in storage in the pond decreased, however we do not have a calibration on this amount.

2. **Plans show that the active disposal unit includes 17 acres measured at the top along the anchor trench and north berm. Please identify the number of acres open and the number of acres having intermediate cover. Intermediately covered areas are those that have 18 inches of cover soil with erosion control, and are sloped to drain outside the lined disposal unit. Please include these values with each monthly report.**

The area within the approximately 17-acre lined disposal unit which was open (having only daily cover and/or additional areas draining to the working area sump, i.e contributing to surface leachate) as of August 1 was 7 acres. The area which was covered (open liner, or waste-filled areas having 18 inches of soil cover and draining to the stormwater system as of August 1 was 10 acres. By September 1, these areas were 5 acres "open" and 12 acres "closed".

3. **The existing holding pond does not comply with the surface impoundment design criteria in FAC Rule 17-701.400(6). This pond shall be replaced or modified by January 6, 1995. Please provide a schedule of activities necessary for compliance to verify that Citrus County's leachate holding pond will not be in violation of DEP rules on January 6, 1995.**

The existing holding pond is intended to be replaced to meet the requirement of the rule. We expect to submit a design for the replacement facility as a permit modification request at the end of October. If we assume that DEP review and approval can be completed within two months, we will be prepared to bid the construction work at the end of December 1994. The procurement process can be completed within about 8 to 10 weeks. Therefore we will be prepared to start construction in February or early March. We expect construction to take about 2 to 3 months with completion then in May or June.

At present we are using the holding pond for surface leachate only. After analysis of this material and approval to treat it at our onsite plant, we intend to use the facility in that format until the end of December. At that time, we expect to abandon the pond. We will empty it of all fluids and sludge, remove the liner and dispose of it in the active landfill. If at any time analysis of the surface leachate indicates that it meets standards without treatment we will request permission to dispose of it onsite in the stormwater system.

Review of the rule 17-701.400(6)(a) indicates that above ground leachate storage tanks which are in use as of January 1993 are not required to retrofit unless leakage, corrosion or defects are found. The tanks that comprise the leachate treatment plant fit this category. Currently, reactor #1 is being used for storage of leachate from the underdrains until it can be transported offsite in tanker trucks for treatment. During the time between abandonment of the holding pond and completion of the replacement holding facility, we intend to empty reactor #2 at the leachate treatment plant and use it for temporary storage of the surface leachate. This material will then be removed by tanker truck to an offsite treatment facility. The holding capacity of the tank is in excess of 35,000 gallons. We expect that the offsite facility will be a County-owned wastewater treatment plant, other wastewater plant located within the county or an industrial wastewater plant in Jacksonville. As alternates, the two leachate streams can be mixed prior to storage or prior to removal from the site. Reactor #3 will be out of service for part of this time as it is modified to become an anoxic reactor. However it can serve as an emergency leachate holding facility during some parts of the modification process. If repairs to the onsite ZIMPRO treatment plant are completed before the holding facility is completed, we will begin treatment here instead of offsite.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe

Re: Leachate Management Reports, Citrus County Landfill
Permit No.: SO09-187229

Dear Ms. Metcalfe:

DEP has reviewed the leachate generation data submitted with your August 11, 1994 letter and requests Citrus County provide an explanation for the following concerns:

1. The quantity of leachate transferred from the holding pond to the WWTP is much greater than the quantity collected from the 7 Acres and 80 Acre Disposal Units as reported. Why does Citrus County report 30,000 gpd removed from the pond but only 10,000 gpd collected from the disposal units? Is the additional 20,000 gpd difference due to excess leachate impounded in the holding pond, from rain falling directly into the holding pond, unmetered leachate pumped off the top of the active disposal unit, or a combination of more than one source? All leachate collected must be recorded for each collection sump in order to compare actual data with expected leachate generation rates as required by FAC Rule 17-701.500(8)(f) and (g).

2. Plans show that the active disposal unit includes 17 acres measured at the top along the anchor trench and north berm. Please identify the number of acres open and the number of acres having intermediate cover. Intermediately covered areas are those that have 18 inches of cover soil with erosion control, and are sloped to drain outside the lined disposal unit. Please include these values with each monthly report.

3. The existing holding pond does not comply with the surface impoundment design criteria in FAC Rule 17-701.400(6). This pond shall be replaced or modified by January 6, 1995. Please provide a schedule of activities necessary for compliance to verify that Citrus County's leachate holding pond will not be in violation of DEP rules on January 6, 1995.

Your response to this letter is requested by September 15, 1994. If you have any questions, you may call me at (813) 744-6100, extension 382.

Sincerely,

Re: Citrus County Central Landfill
Permit SO09-187229 - Leachate Quantity Reports

Dear Mr. Ford:

In response to your letter dated May 11, 1994 regarding leachate quantity reports; In general, the facility presently does not have an accurate method of flow measurement. All flows have been estimated by calculating flow from either manufacturer's pump specifications or draw down test.

In response to specific concerns, please find the following:

1. **The data submitted shows that the quantities of leachate removed from the active disposal unit varies significantly from month to month but not in response to rainfall. What is the reason for these differences?**

   There is no explanation for this.

2. **The pumps used for the removal of leachate from the active disposal unit appear to operate only in response to a preset maximum daily flow? How is this flow determined and is it sufficient to maintain less than one foot of head over the liner as required by DEP rules? Are these pumps designed to operate in response to the available WWTP capacity?**

   The pumps do <u>not</u> run on a preset maximum daily flow. The pumps are activated by floats positioned in the wet-well to maintain a less than one foot maximum head in each station. The pumps are <u>not</u> designed to operate to available leachate treatment plant capacity, but rather the opposite. There is more than adequate capacity at the treatment facility to treat the flows generated at the lift stations.

Printed on 30% Post Consumer Paper with Soybase Ink

3. **DEP records show that closed lined landfill areas generate less than 200 gpd/acre. Why does the closed 7-Acre disposal unit continue to generate from 300 to 500 gpd/acre?**

   Historically the 7-acre disposal site has always generated flows greater than 200 gpd. The flows reported are based on pump draw down test.

On March 7, 1994, the float systems which control the leachate levels were totally overhauled. We are sure that these floats are positioned at elevations which maintain leachate levels of less than one foot in each station.

Additionally, we are currently working with the Utilities Division to purchase the necessary replacement valves, checks and factory calibrated flow meters to better monitor and record flows.

If further information or clarification is required, please let me know.

Sincerely,

Susan J Metcalfe

Re: Leachate Management
Citrus County Central Landfill
Permit #SO09-187229

Dear Ms. Metcalfe:

DEP has reviewed the leachate generation data submitted with your May 5, 1994 letter and requests Citrus County provide an explanation for the following concerns:

1. The data submitted shows that the quantities of leachate removed from the active disposal unit varies significantly from month to month but not in response to rainfall. What is the reason for these differences?

2. The pumps used for the removal of leachate from the active disposal unit appear to operate only in response to a preset maximum daily flow? How is this flow determined and is it sufficient to maintain less than one foot of head over the liner as required by DEP rules? Are these pumps designed to operate in response to the available WWTP capacity?

3. DEP records show that closed lined landfill areas generate less than 200 gpd/acre. Why does the closed 7-Acre disposal unit continue to generate from 300 to 500 gpd/acre?

Your response to this letter is requested by June 15, 1994. If you have any questions, you may call me at (813) 744-6100, extension 382.

Sincerely,

Kim. B. Ford, P.E.

Re: Leachate Management
Citrus County Central Landfill
Permit #SO09-187229

Dear Ms. Metcalfe:

DEP has reviewed the leachate generation data submitted with your May 5, 1994 letter and requests Citrus County provide an explanation for the following concerns:

1. The data submitted shows that the quantities of leachate removed from the active disposal unit varies significantly from month to month but not in response to rainfall. What is the reason for these differences?

2. The pumps used for the removal of leachate from the active disposal unit appear to operate only in response to a preset maximum daily flow? How is this flow determined and is it sufficient to maintain less than one foot of head over the liner as required by DEP rules? Are these pumps designed to operate in response to the available WWTP capacity?

3. DEP records show that closed lined landfill areas generate less than 200 gpd/acre. Why does the closed 7-Acre disposal unit continue to generate from 300 to 500 gpd/acre?

Your response to this letter is requested by June 15, 1994. If you have any questions, you may call me at (813) 744-6100, extension 382.

Sincerely,

Kim. B. Ford, P.E.

Re: Citrus County Central Landfill
Permit SO09-187229 - Leachate Quantity Reports

Dear Mr. Ford:

In response to your letter of 3-2-94; please find enclosed daily leachate generation and precipitation data from October 1, 1993 through March 31, 1994.

This information will be forwarded to your office on a monthly basis hereafter.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe

Re: Citrus County Central Landfill
Permit SO09-187229 - Leachate Quantity Reports

Dear Mr. Ford:

In response to your letter of 3-2-94; the landfill maintains daily precipitation records and leachate generation rates. Staff is in the process of preparing a spreadsheet format for this information from 10-1-94 to present. We anticipate this information to be completed within 30 to 45 days.

The quantities of leachate collected or treated for the months of January, 1994 and February, 1994 is 700,000 gallons; quantities of leachate stored or impounded is none; quantities of leachate recirculated is none, and quantities of leachate hauled or piped to a WWTP is none.

The leachate treatment system collects from one closed, lined and capped, 7-acre cell located on the 60-acre site adjacent to the current landfill. Two lift stations pump from that unit directly to the leachate treatment plant. In addition, leachate is collected from the underdrain system in the active Phase 1 area located on our 80-acre site. The phase 1 lined area is approximately 650 feet by 1150 feet, about 17 acres at the top of slope, 475 feet by 800 feet at the base, or about 8.7 acres. With the placement of solid waste, the surface area is less than 13 acres. At any one time, we have two working areas with varying locations, but these areas average less than 3 acres.

If further information or clarification is required, please let me know.

Sincerely,

Susan J. Metcalfe

Re: Citrus County Central Landfill
Permit No. SO09-187229
Leachate Quantity Reports

Dear Ms. Metcalfe:

FAC Rule 17-701.500(8)(g) requires that "precipitation records shall be maintained and used by the permittee to compare with leachate generation rates". Leachate/water balance data should be kept on a spreadsheet format and provided monthly to this office. Please verify the number of open, intermediate, and closed acres. Please provide daily records from January 1, 1994 for the following:

* Quantities of leachate collected
* Quantities of leachate stored or impounded
* Quantities of leachate recirculated
* Quantities of leachate hauled or piped to a WWTP

This information will be evaluated by the Department. Design or operational changes may be needed to prevent unauthorized discharges or excessive head over lined disposal areas. If you have any questions, you may call me at (813) 744-6100, extension 382.

Sincerely,

Kim B. Ford, P.E.

Re: Citrus County Central Landfill, Permit SO09-187229
Leachate Management

Dear Ms. Pelz:

Your letter of September 10 requested information on leachate management at the referenced facility. The following clarifications are as we discussed on the telephone. The leachate treatment system collects from one closed, lined and capped, 7-acre cell located on the 60-acre site adjacent to the current landfill. Two lift stations pump from that unit directly to the leachate treatment plant. The 7-acre closed area is correct.

In addition, leachate is collected from the underdrain system in the active Phase 1 area located on our 80-acre site. The Phase 1 lined area is approximately 650 feet by 1150 feet, about 17 acres at the top of slope, 475 feet by 800 feet at the base, or about 8.7 acres. We have solid waste placed to less than half the depth, therefore the surface area is less than 13 acres. At any one time, we have two working areas whose location varies but whose area does not exceed 3 acres. The actual daily working face is smaller, but for leachate/stormwater calculations the area is as described. Therefore the data submitted for January-March 1993 for open and intermediate cover areas are fairly accurate. None of these areas are scheduled for final closure for several years.

The original submittal, copy attached, indicated that 820 gallons of leachate were stored during the January to March time period. This leachate was impounded in the lined pond at the southwest corner of the current 80-acre site. Operating conditions provide that leachate collected in surface sumps (contaminated stormwater) is pumped directly to this lined pond. Leachate from the active cell underdrain can be pumped to the pond or the plant, with the plant being the usual destination. The pond can also be pumped to the plant. The "normal" operating condition for the pond is to be nearly dry.

Printed on 30% Post Consumer Paper with Soybase Ink

Concerning your request for monthly reporting of daily leachate handling data, we will begin with October 1993 to provide this information. Please understand that most of this information is already provided to the wastewater section of your office. However, as we understand it you need a separate submittal. We do not have flow meters on all sections of this system and therefore will have to estimate amounts from elapsed time measurements. Our reports will indicate the basis of measurements.

The leachate management summary you requested is attached. In addition, a copy of the analyses of leachate effluent from the July sampling event is included.

I trust that this information will assist in your research. If you have any other questions, please contact me.

Sincerely,

Susan J. Metcalfe

RE: CITRUS COUNTY CENTRAL LANDFILL - PERMIT NO. SO09-187229
LEACHATE QUANTITY REPORT

Dear Mr. Ford:

In response to your request of March 22, 1993 for leachate quantities, please find the following:

*Quantities of leachate collected - Please see attached Memorandum from Robert G. Merkel, Utilities Operations Supervisor for daily records from January 1, 1993 through April 1, 1993.
*Quantities of leachate stored or impounded - 820 gallons
*Quantities of leachate recirculated - None
*Quantities of leachate hauled or piped to a wastewater treatment plant - None

If further information or clarification is needed, please do not hesitate to contact me.

Sincerely,

Susan J. Metcalfe

RE: Citrus County Central Landfill, Permit No. SO09-187229
Leachate Management

Dear Ms. Metcalfe:

Attached you will find a summary of the information received on leachate management (FDEP request of March 1993) in the Southwest District for a ninety day period in 1993. Evaluation of this information has raised the following concerns:

1. The number of active or open landfill acres appear high and the number of acres ready for final closure, but not closed, appear low. Please verify the number of open, intermediate, and closed acres.

2. The amount of leachate impounded was not provided.

Citrus County is requested to provide complete daily leachate balance data in a summary format for each month for the Citrus County Central Landfill. Additionally, in an effort to develop a database of leachate management and testing practices in the District, the Department requests the attached Leachate Management Summary Form be completed.

The Department requests that all information be provided to the Solid Waste Section, FDEP, Tampa office within fifteen (15) days of this notice. If you have any questions, you may contact me at (813) 744-6100 ext. 386, or Kim Ford at ext. 382.

Sincerely,

Susan J. Pelz
Solid Waste Section
Division of Waste Management

126th Ave.	12			insufficient data (impoundment in landfill)						
Manatee	5	212		274	5,352,000	7,780,000		32,049,000		
Hardee	10	3		insufficient data (irrigation sprayfield)						
Desoto	3	5		1336	961,606	584,000	717,563	647,288	345,654	
Sarasota	71	49	100	545	32,621,400	87,000,000	8,780,000		175,600	

Collected : pump hours x pump capacity

Impounded : average amount impounded

Recirculated : all amounts distibuted inside lined cells

T.P. : amount hauled or piped to treatment plant

Evap. : evaporation @ 2% of amount recirculated unless other specific information is provided

Irrigation : spray irrigation outside lined cells

• : applicable information not provided

LEACHATE MANAGEMENT SUMMARY

Landfill Name _____

Location _____

Phone Number _____

Place an "X" in the applicable spaces.

ON-SITE LEACHATE MANAGEMENT METHODS:

Impoundment Only _____

Impoundment with Aeration _____

Impoundment with Evaporation _____

Irrigation of intermediate areas _____

Recirculation _____

Pre-treatment or Other (Describe)

_____

_____

_____

OFF-SITE LEACHATE DISPOSAL METHODS:

Wastewater Treatment Plant

County owned, Identify _____

Non-County owned, Identify _____

Other (Describe)

_____

_____

_____

TESTING CRITERIA:

Please attach copies of your most recent leachate analysis.

Prepared By: _____ Date: _____

RE: CITRUS COUNTY CENTRAL LANDFILL - PERMIT NO. SO09-187229
LEACHATE QUANTITY REPORT

Dear Mr. Ford:

In response to your request of March 22, 1993 for leachate quantities, please find the following:

*Quantities of leachate collected - Please see attached Memorandum from Robert G. Merkel, Utilities Operations Supervisor for daily records from January 1, 1993 through April 1, 1993.
*Quantities of leachate stored or impounded - 820 gallons
*Quantities of leachate recirculated - None
*Quantities of leachate hauled or piped to a wastewater treatment plant - None

If further information or clarification is needed, please do not hesitate to contact me.

Sincerely,

Susan J. Metcalfe
