Closure Cost Estimate

Dear Mr. Reisig:

The Department hereby approves the closure cost estimate, dated January 18, 2013, certified by Clinton Howerton, Jr, P.E. on February 23, 2013, and received February 14, 2013 for the subject facility, and a copy of the approved estimate is enclosed for your records. Please submit the financial assurance documents (Escrow Account Audit Report, etc.) corresponding to the approved estimates to:

Solid Waste Financial Coordinator
Attention: Tor Bejnar
Florida Department of Environmental Protection
2600 Blair Stone Road, Mail Station 4565
Tallahassee, Florida 32399-2400

The next closure and long-term care cost estimates or inflation adjustment statement, as applicable, will be due between January 1 and March 1, 2014.

Should you need further information, please call Bill Krumbholz at (239) 344-5657. Whenever possible, please submit written document(s) electronically to bill.krumbholz@dep.state.fl.us. Your cooperation in this matter is appreciated.

Sincerely,

Albert D. McLaurin, P.E.
Assistant Director
South District Office

Closure Cost Estimate
For
Florida Tire Terminal Facility
400 Feagin St.
Avon Park, FL 33825
Revised on January 25th, 2013

RECEIVED
FEB 14 2013
D.E.P. South District

If a closing should have to occur at the Florida Tire Terminal facility in Avon Park, FL, the following costs would apply. Florida Tire Terminal has a letter from Greenman Technologies (attached) stating the cost to load and remove all tires is \$110.00/ ton.

The actual waste tire quantities on hand and the weights associated with each category are the results of an inventory taken on 1-18-2013 in cooperation with Polston Engineering. These figures indicate the maximum capacities of the various tire storage cells that are indicated on the Facility Plan.

Passenger and Light Truck Tires- 2,364 units at 30 lbs/unit = 70,920 lbs which is equivalent to 35.5 tons.

Truck Tires- 1907 units at 120 lbs/unit = 228,840 lbs which is equivalent to 114.4 tons.

Large Truck Tires- 1180 units at 150 lbs/unit = 177,000 lbs which is equivalent to 88.5 tons.

The total of waste tires equals 238.4 tons.
The following calculation applies.

238.4 tons of waste tires x \$110.00 = \$26,224.00

The 238.4 tons represents 7815 total units, which is well below the maximum 15,000 maximum units that are agreed to in the alternative procedures plan but maximum capacities will vary by the size of the tires inventoried.

This figure of \$26,224.00 represents the total closing cost using \$110.00 as the per ton cost to remove the tires.

Attention: Mr. Robert A. Reisig

Subject: Facility Clean Up

Dear Mr. Reisig:

Should a total facility clean up is ever needed at the Florida address listed above, the cost would be as follows: Emanuel Tire Company would provide loading and unloading of all remaining tires. These tires would be transported and shredded at a state licensed facility at a cost of \$110.00 per ton.

I thank you for the opportunity to quote your business and should you have any further questions or concerns, please feel free to contact me at the above phone number.

Sincerely,

Norman Emanuel, Owner
