RE: Waste Quantity Reports for
East Pasco Transfer Station
East Pasco Class I
West Pasco Class I
West Pasco Class III
WTE & Transfer Station

Dear Mr. Landi:

Henceforth the Southwest District requests that you keep waste quantity reports required by Chapter 62-701 on site, available for inspection upon request by Department personnel, instead of submitting them to the District office on a quarterly basis. Your cooperation in this matter is appreciated. This is in regard to disposal and transfer station facilities only. *We will continue to accept quantity reports from MRF's and waste tire processing facilities.* If you have any questions, please feel free to call me at 813/744-6100, ext. 375.

RE: Waste Quantity Reports for

East Pasco Class I
West Pasco Class I
West Pasco Class III
WTE & Transfer Station

Dear Mr. Landi, Accountant II:

In August of 1996 we requested that you keep waste quantity reports required by Chapter 62-701 on site, available for inspection upon request by Department personnel, instead of submitting them to the District office. I apologize that I must ask you to adjust this practice again. Please forward a copy of these reports to Mr. Chongman Lee, Department of Environmental Protection, Twin Towers Building, 2600 Blainstone Road, Tallahassee, FL 32399-2400 as well as keeping a copy on site.

As before, we will continue to receive WQR's for MRF's and waste tire processing facilities here in the District.

If you have any questions regarding this request please call me at 813-744-6100, ext. 375.

Thank you,

RE: Leachate Quantity Reports - East and West Pasco County
Landfills; Permit Nos. S051-187368 and S051-182279; FDEP
Letter of December 5, 1994

Dear Mr. Ford:

Thank you for the 30-day extension to respond to your letter of December 5, 1994. I shall respond to each item as it appeared in your letter of December 5, 1994.

1. A separate spread sheet for each landfill will be prepared by Michael Landi, Accountant II, and will be submitted as required in a timely manner.
2. East Pasco Landfill: I believe that the difference in leachate quantities in Tank No. 5 is the result of several factors. First, the active area, although covered with earth and properly drained to control surface sheet flow of stormwater, is not an impervious covering. The cover is sand and porous. Second, perhaps there may be some local ponding. I will check the area and will make every effort to eliminate ponding on the active inter-phase, if, in fact, ponding exists.
3. West Pasco Landfills: Daily LDS for A-1 and SW-1 will be provided to you per your request as soon as Pasco County purchases the required meters. The purchasing process has begun. LDS will be provided for A-1, SW-1, and the future A-2.
4. West Pasco County has one MSW cell referred to as SW-1. The approximate size of SW-1 is 9.03 acres of which 3.40 acres remains unused and in its original state of completed construction. SW-1 also has approximately 5.63 acres which has been used to store leachate surges from A-1 following heavy rains. The rain collected in the 3.4 acres of SW-1 on the west of the cell is discharged to the ground and flows over the surface as stormwater, which it is. The area on the east side of SW-1 used as leachate storage and dilution is now being utilized for storage of Pasco County glass cullet residue. It is our intent to utilize SW-1 for this purpose for an extended period of time. Be advised Pasco County is currently contracting for the construction

of an evaporator/crystallizer to provide treatment for the leachate from both A-1 and SW-1, and the future A-2.

5. The quantities of leachate reported on the October 21, 1994, spread sheet include A-1, both primary and secondary, and part of SW-1 primary and secondary. I understand the FDEP wishes to have the leachate reported separately for each liner and each unit. To do this reporting as required, metering and piping construction will be mandated. These projects are under consideration and will be implemented in the near future.
6. I have no idea or logic to explain why rainfalls are consistently lower at the Class I than at the Class III. The rainfall is measured at the Class I landfill situate in the immediate vicinity of the secondary leachate collection tank. The rainfall is measured at the Class III landfill immediate vicinity of the scale house.

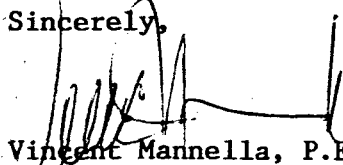

In both locations, the rain gauge is read and recorded on the standard Pasco Leachate Recording Forms. I will counsel all readers to take particular care in future readings. I trust future readings will be true and accurate and will validate a rainfall differential we are now seeing.

7. The leachate report of October 21, 1994, appears to be incorrect. In discussions with staff, I find it impossible to untangle at this point in time. Pasco Class III did incur meter problems. May I suggest that the September 17 reading might indicate a 15,896 gal./day average, and the September 30 reading might average daily flow of 37,561 gal./day? I am at a loss for a rational explanation.

Please be advised I am reasonably assured that the 1'-0 head of leachate above the liner was not exceeded. A definitive explanation of this question, regarding daily leachate pumping reporting, etc., cannot be made.

I can assure you that more care in daily reading and reporting will follow.

Sincerely,

Vincent Mannella, P.E.
Solid Waste Facility Manager

RE: Storm Related Solid Waste Management
Activities

Dear Mr. Ford:

This letter is to inform and update the Department of the emergency activities currently underway to manage the debris and unusual quantities of residential wastes being received at the Pasco County Solid Waste Management Facilities.

Since the storm of March 13, 1993, Pasco County has been operating under emergency conditions to minimize health and safety concerns and assist county residents in the recovery from severe flood and high wind conditions. Debris collection has been virtually continuous since the storm using all available county resources. The attached data sheets are a record of debris and other wastes which were generated as a direct result of the storm and received at the solid waste management facilities.

As a result of the increased amount of wastes of all types entering the management system; Pasco County's ability to process this material has been temporarily exceeded. While priority has been placed on the processing of the normal loadings at the facilities, there have also been inevitable impacts to our normal operations.

To overcome the storm related impacts to waste management within the county, we have implemented a program of temporarily stockpiling various wastes, by type, until we can redirect this material into the normal processing stream as capacity becomes available. The stockpile areas and segregated waste types are as follows:

Stockpile Area A: Located on the southern side of the West Pasco Class III Landfill. Composed of wood, felled trees and household furniture. Estimated quantity: 700 cubic yards.

Mr. Kim Ford, P.E.
April 22, 1993
Page Two

Stockpile Area B: Located in Cell 4 of the West Pasco Class III Landfill. Composed of small trees, brush, leaves, and other related material. Estimated quantity: 30 tons.

Stockpile Area C: Located within the tipping area of the Pasco County Solid Waste Resource Recovery facility. Composed of municipal solid waste and storm debris deemed contaminated by putrescibles and material which would potentially generate leachate if stored outdoors. Estimated quantity: 8000 tons.

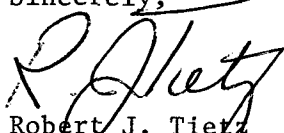

Stockpile Area D: Located on the West Pasco I Landfill in Cell A-1. This material is composed of regular MSW which cannot be moved directly into the resource recovery facility at this time. Quantities in storage as of 4/22/93: 600 tons.

Stockpile D has been a temporary storage area since April 21, 1993. This is the direct result of the overloading of the normal processing capability by the storm generated increase in material.

At this time, we have completed over 95% of our storm-related debris collection effort. The primary processing method which will be employed to eliminate the temporary stockpile areas will be the Resource Recovery Facility as capacity is available. We believe that all temporary stockpiled material will be processed in this manner within forty five (45) days. Priority will be placed on the processing of the material in stockpile area "D". This should occur no later than May 6, 1993.

We appreciate the department's cooperation and patience during a period of recovery from a devastating natural event. If you require further information in this regard, please contact me at (813) 847-8145.

Sincerely,

Robert J. Tietz
Utilities Operations
and Maintenance Director

RE: Solid Waste Tonnage/Leachate Hauling for Quarter
Ending June 30, 1992

Dear Mr. Ford:

Following are the landfill tonnage/leachate figures for Pasco:

West Pasco Class III Quarterly Reports

<u>MONTH</u>	<u>TONNAGE</u>	<u>LEACHATE</u>
April	125.43	66,000
May	87.12	30,000

RE:Waste-to-Energy Facility Quarter Ended March 31, 1991 Revised
Quarter Ended June 30, 1991; Solid Waste Tonnage/Leachate Hauling

Dear Mr. Ford:

During the quarter ended March 31, 1991, the following tonnages were received at the Waste-to-Energy facility:

<u>MONTH</u>	<u>COUNTY TONNAGE</u>	<u>TOTAL TONNAGE</u>
January, 1991	0.00	0.00
February, 1991		
Pasco	4,125.06	
Hernando	0.00	
Hillsborough	0.00	4,125.06
March, 1991		
Pasco	16,907.78	
Hernando	3,068.83	
Hillsborough	6,426.51	26,403.12
Quarter Totals		
Pasco	21,032.84	
Hernando	3,068.83	
Hillsborough	6,426.51	30,528.18

As noted, the tonnages as reported for the quarter ended March 31, 1991 have been revised. The original letter dated April 10, 1991 had reported a total of 29,905.24 tons received for both the Waste-to-Energy Facility and the West Pasco Class III, being reported as the West Pasco Resource Recovery Facility. The revised report for the West Pasco Class III dated July 19, 1991 reflected a total of 1,235.56 tons received and the above reflects 30,528.18 tons received at the Waste-to-Energy Facility, for a combined revised total of 31,763.74 tons.

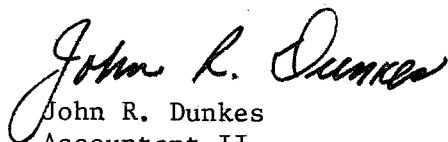

This increase of 1,858.50 tons from the earlier combined tonnage is due to reporting errors connected with the new operational procedures at the Waste-to-Energy scales.

During the quarter ended June 30, 1991, the following tonnages were received at the Waste-to-Energy facility:

<u>MONTH</u>	<u>COUNTY TONNAGE</u>	<u>TOTAL TONNAGE</u>
April, 1991		
Pasco	17,718.36	
Hernando	3,178.99	
Hillsborough	<u>10,825.37</u>	31,722.72
May, 1991		
Pasco	18,401.45	
Hernando	3,246.11	
Hillsborough	<u>5,963.20</u>	27,610.76
June, 1991		
Pasco	16,028.44	
Hernando	2,903.51	
Hillsborough	<u>9,774.19</u>	28,706.14
Quarter Totals		
Pasco	52,148.25	
Hernando	9,328.61	
Hillsborough	<u>26,562.76</u>	88,039.62

RE: West Pasco Class III Quarter Ended March 31, 1991 Revised
Solid Waste Tonnage/Leachate Hauling

Dear Mr. Ford:

During the quarter ended March 31, 1991, the following tonnages were received and the following gallons of leachate was hauled at the West Pasco Sanitary Landfill:

<u>MONTH</u>	<u>TONNAGE</u>	<u>LEACHATE</u>
January	311.90	15,966.42
February	689.88	29,618.71
March	<u>233.78</u>	<u>137,977.97</u>
	1,235.56	183,563.10

There were several problems with our letter dated April 10, 1991 reporting the tonnages and leachate for the quarter ended March 31, 1991. The letter stated that the report was for the West Pasco Resource Recovery Facility, but two reports should have been issued. One for the Class III and one for the Waste-To-Energy Facility. The original leachate figures provided in our letter of April 10, 1991 were correct for the Class III landfill. The above tonnages represents only the solid waste received at the Class III landfill. An additional report will be issued covering the quarter ended March 31, 1991 for the Waste-To-Energy Facility.

If you have any questions, please let us know.
