

GARDEN ST. IRON & METAL. INC.

SW FLORIDA'S MOST
TRUSTED NAME
IN RECYCLING

STILL SCRAPPIN' AFTER ALL THESE YEARS!

WWW.GSIMRECYCLING.COM

GARDEN STREET IRON & METAL, INC.

Opening in 1958, Garden Street has a long and established history of providing dependable and environmentally friendly recycling services. As a long standing member of the community, Garden Street has served Southwest Florida for over twenty years. Providing essential recycling services in a manner benefiting our customers, community, and environment.

Since 1989, when Garden Street opened in Southwest Florida, it has paid a competitive price for ferrous (iron and steel) and non-ferrous (copper and aluminum) metals.

Our 20+ acre state-of-the-art facility on Metro Parkway in Fort Myers is the largest, most comprehensive recycling center in Southwest Florida.

Beginning in the early 90's, Garden Street embarked upon a mission to concrete the entire site. Working closely with Florida D.E.P. to achieve the best management of storm water while providing a safe, clean environmentally, and customer friendly facility.

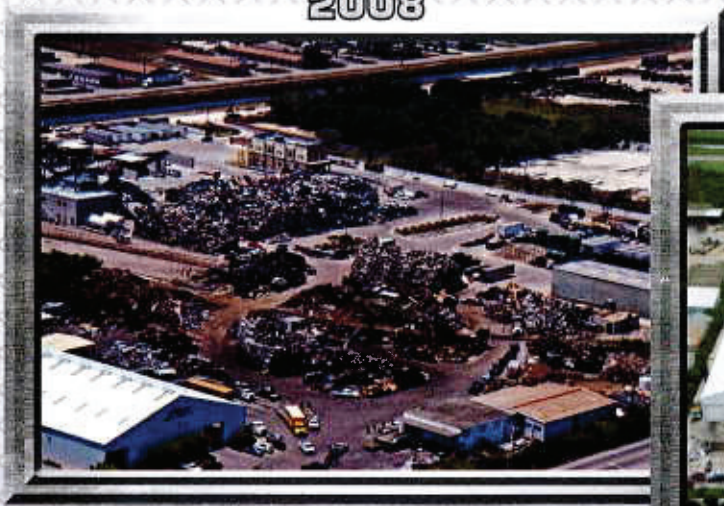

During the 2004 / 2005 Hurricane seasons, Garden Street was instrumental in the recovery process. Providing exceptional service with consistent rates and payments. Demonstrating our ability to handle a sudden large influx of scrap metals.

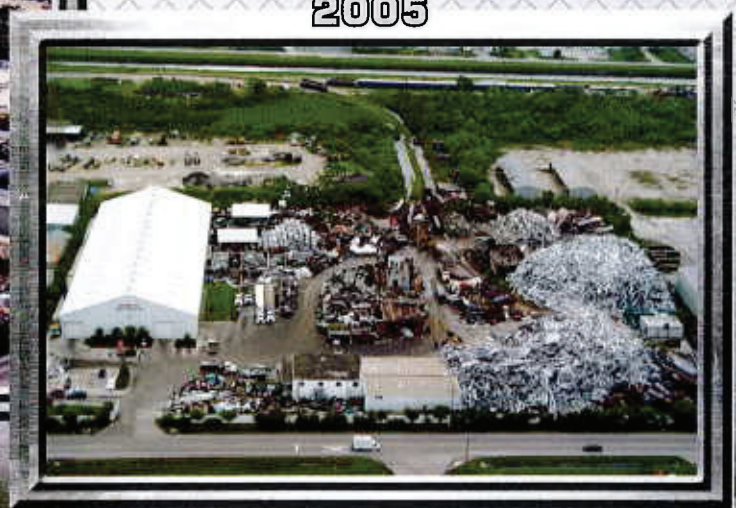

In 2008, Garden Street completed its single largest expansion to date with the installation of Southwest Florida's only automobile shredder. This 4600hp machine grinds complete scrap autos, appliances, and steel into fist sized pieces at a rate of over 100 tons per hour. The shredded material is then conveyed through an advanced technological separation system. Where magnets, screens, eddy currents, and an ISS sorting system removes, sizes and separates the scrap to be recycled.

Today, Garden Street has three locations. Although we are the largest in Southwest Florida, we still maintain our "family business" values and small business roots. While offering advanced services, capacity and highly competitive prices of a 21st century scrap metal recycling business.

SERVICES

Exports

Garden Street Iron & Metal owns and operates its own fleet of trucks and chassis permitted to a gross weight of 95,000 pounds. Allowing us to maximize net weight per container freight costs. Membership with UIIA allows us to interchange of intermodal equipment between ocean carriers., railroads, equipment leasing companies and intermodal trucking companies; providing access to global markets.

In-Plant Boxes

In-plant boxes allow customers to store aluminum and copper materials. Due to their size, in-plant boxes can be conveniently moved around the plant with fork trucks. The boxes are available in 4 and 5 yard sizes.

Dumpsters

Garden Street Iron & Metal also provides smaller dumpsters, available in 4-10 yard sizes for our smaller customer accounts.

Roll Offs

Garden Street provides Roll Off container service, 10-70 yard, to commercial customers without container rentals fees.

Mobile Crane Service

Garden Street provides scrap metal and tire removal service, also available are demolition services.

Tire Shredding and Disposal

Garden Street is a D.E.P. state certified scrap tire hauler and processor.
