                Hazardous Waste Program and Permitting

Date:        October 23, 2013

Subject:     **Site Assessment Report** dated July 23, 2013  
                **Limited Scope Remedial Action Plan (RAP)** dated August 26, 2013  
                Liberty Tire Recycling, LLC (Liberty Tire); Solid Waste ID 70963

The Hazardous Waste Program and Permitting Section has reviewed the subject documents and has the following comments. Please forward them to Liberty Tire along with any comments you may have.

**Liberty Tire Recycling, LLC Site Assessment Report**

- Responses to Comments 1, 2, 4, 5, 7, and 8 are satisfactory.
- Response to Comment 3: The Department requested that Liberty Tire conduct a well survey to meet the requirements of 62.780.600 F.A.C. This request concerned a survey of wells interior to the property and stated that it could be included in the RAP. The RAP contained a survey of wells exterior to the facility but not interior. It did not provide an explanation for not including this information. However, since the re-sampling results demonstrated that groundwater was not contaminated, this is no longer necessary.

**Limited Scope Remedial Action Plan**

- Since Liberty Tire plans on excavating soils to the commercial/industrial soil cleanup target level, it must place an institutional control on the entire property.
