COMMENTS:

07/10/2014

The solid waste inspection was conducted in conjunction with an Air Title V Full Compliance Evaluation. During the solid waste portion of the inspection, Department staff observed the tire trailer staging area, the tire handling area, the tire injection system at Kiln 2, the alternative fuels (AFM) handling and injection system, the AFM and industrial by-product storage building (ASB Storage), and satellite industrial byproduct storage areas (TEC Gannon ash piles).

During the inspection, AFMs (tire derived fuel [TDF or fluff]) appeared to stored at or near the edge

Inspection Date: 04/10/2014

of the ASB Building, susceptible to windblown rain. In accordance with Section 3.8 of the Facility Op Plan, "To reduce the possibility of windblown rain from coming into contact with any AFMs stored undercover, they will be staged no closer than 6 feet from the edges of the building." Additionally, an open transfer trailer of TDF was observed NE of the plant in an area not designated for AFM storage. The trailer should be tarped and stored in designated areas when not being unloaded. Please ensure these AFMs are managed in accordance with facility Waste Processing Facility (WPF) Permit and approved Operations Plan. No additional information is requested at this time.

Note: While storage areas were observed during the inspection, storage/processing of industrial by-products is not authorized by the WPF or WTPF permit and are not addressed as part of this inspection.
