Power Plant Site Certification PA-87-23  
New Non-Ferrous Metals Storage Bunker

Dear Mr. Bull:

The purpose of this letter is to provide the Department with information on a new non-ferrous metals storage bunker at the Pasco County Resource Recovery Facility (PCRRF). The addition of the bunker will take place during the first quarter of 2015.

Currently, the non-ferrous metals collected by the Eddy Current separator are stored in the ash residue building until they are loaded and trucked to the recycler. The lack of adequate space in the ash residue building has made it difficult to carry out normal daily operations. In order to alleviate the crowding issue, we plan to construct a "lean-to" type structure adjoining to the residue building. The 10' by 16' storage bunker will be on concrete slab with roof and sidings to keep rain water out of the non-ferrous metals.

Thank you for your cooperation. If you have any questions, please do not hesitate to contact me at (727) 856-0119.

Sincerely,

John Power  
Solid Waste Director
