The facility was actively placing cover on the side slopes of the Class I landfill to address flagging at the time of the inspection. The leachate tanks for the Class I are actively operating.

Dirt has been applied to an area of the closed portion of the Class I landfill to prevent standing water.

The C&D disposal area at the facility is inactive and has an intermediate cover (dirt and vegetation) in place.

The HHW, white goods and waste tires storage areas were in good order.

Item 1.6 - The water quality report is reviewed as a separate function and is not deemed part of this inspection report.

Financial assurance approved 5/11/2015.

MPIS report approved for 2012-2013 on 11/18/2014.

The facility permit expires for Phase II on 4/24/2016 and the permit renewal documentation is due by 2/3/2016.
