Tomoka Farms Road Landfill
Leachate Sump Riser Repair and Replacement – LCRS-2 & LCRS-3
Approval of Certification of Construction Report

Dear Mr. Marion:

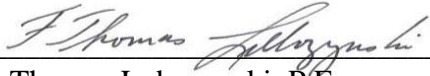

The Department has completed its review of the report titled, “Construction Certification Report—Leachate Sump Riser Repair and Replacement” submitted on your behalf by HDR Engineering, Inc., for this facility. The report is dated May 20, 2015, and the Department received it on the same date. HDR Professional Engineer Mr. Mark Roberts signed and sealed the DEP Form 62-701.900(2), Certification of Construction Completion, contained within the report. The report details the following activities.

- Installation of new side slope riser piping for leachate collection and detection for sumps LCRS-2 and LCRS-3
- Installation of new pumps, flow meters and transducers for sumps LCRS-2 and LCRS-3
- Repair of primary liner and composite geosynthetic clay liner overlaying both sump areas

Based upon the report and the certification by the Professional Engineer of Record, the Department concurs that the leachate sump riser repair and replacement has been completed and satisfactorily addresses compliance with Specific Condition C.12.f of Permit Modification 0078767-031-MM issued April 17, 2014.

Please contact Allen Rainey at 407-897-2929 if you have any questions regarding this matter.

Sincerely,

F. Thomas Lubozynski, P.E.
