Legal Notices

PUBLIC NOTICE OF INTENT
TO ISSUE WASTE TIRE PROCESSING
FACILITY PERMIT

Florida Department of Health
Palm Beach County
DRAFT Permit Project No:
333423-001-WT

Forever Recycling, LLC
Palm Beach County, Florida
The Florida Department of Health
Palm Beach County (Health Depart-
ment) gives notice of its intent to is-
sue a waste tire processing facility per-
mit to Forever Recycling, LLC, located
at 246 East Main Street, Pahokee,
FL 33476.

The applicant, Forever Recycling LLC,
applied on March 03, 2015 to the per-
mitting authority for a permit to op-
erate a waste tire processing facility lo-
cated at 857Y, Old Belle Glade Rd, Palm
Beach County, Florida, 33476.
Latitude: 25 degrees 48' 36" N/80 de-
grees 39' 17" W.

The facility is authorized to store up
to 3,500 tires. The facility will utilize
a baler to bundle the waste tires in-
to bales. Processed tires will be trans-
ported offsite for use as fuel at a
waste-to-energy facility in Florida.

The applicant's name and address are:
Forever Recycling, LLC, Mr. Emilio G.
Perez, 246 East Main Street, Pahokee,
FL 33476.

The permitting authority for this
project is the Florida Department of
Health Palm Beach County (Health
Department) whose mailing address is
P.O. Box 29, West Palm Beach, Flori-
da 33402-0029. For technical infor-
mation regarding the project, please
contact the Jorge Palino, P.E. at (561)
837-5974. For questions regarding
the administrative hearing proce-
dures, please contact the Health De-
partment's Legal Office at 800 Clem-
atis Street in West Palm Beach, Flori-
da and phone number (561) 837-5900.

A person whose substantial interests
are affected by the proposed permit-
ting decision may petition for an ad-
ministrative hearing in accordance
with Sections 120.569 and 120.57 of
the Florida Statutes (F.S.). The peti-
tion must contain the information set forth
below and must be filed (received) in
the Health Department's Legal Office
at the address indicated above, and
must be marked, "Request for Adminis-
trative Hearing on Intent to Issue Waste
Tire Processing Facility Permit." Petitions
filed by the permit applicant or any of
the parties listed below must be filed
within fourteen days of receipt of this
notice of intent. Petitions filed by any
persons other than those entitled to
written notice under Section 120.60(3),
F.S., must be filed within fourteen days
of publication of the public notice or
within fourteen days of receipt of the
notice of intent, whichever occurs first.
Under Section 120.60(3), F.S., how-
ever, any person who asked the permit-
ting authority for notice of agency ac-
tion may file a petition within four-
teen days of receipt of that notice, re-
gardless of the date of publication. A
petitioner shall mail a copy of the peti-
tion to the applicant at the address
indicated above, at the time of filing.
The failure of any person to file a peti-
tion within the applicable time pe-
riod shall constitute a waiver of that
person's right to request an adminis-
trative determination (hearing) un-
der Sections 120.569 and 120.57, F.S.,
or to intervene in this proceeding and
participate as a party to it. Any subse-
quent intervention will be only at the
approval of the presiding officer up-
on the filing of a motion in compliance
with Rule 28-106.205 of the Florida Ad-
ministrative Code (F.A.C.).

A petition that disputes the material
facts on which the permitting authori-
ty's action is based must contain the
following information:
(a) The name and address of each
agency affected and each agency's file
or identification number, if known;
(b) The name, address and telephone
number of the petitioner; name ad-
dress and telephone number of the
petitioner's representative, if any,
which shall be the address for service

Re: WACS 102298 – Forever Recycling

Dear Mr. Perez:

I reviewed the documentation submitted to demonstrate financial assurance for the above referenced facility and find it is in order. Lexon Insurance Company performance bond number 1096008, effective September 5, 2015, is in the amount of the Palm Beach County approved closing cost estimate of \$2,800.00, dated July 26, 2015. In addition, your Salem Trust Company standby trust fund agreement, entered into as of September 22, 2015 and identified with account number 3015030349, is acceptable with the attached note concerning you being President of Forever Recycling LLC. Therefore, the Forever Recycling facility is in compliance with the financial assurance requirements of 40 CFR Part 264, Subpart H, as adopted by reference in Rule 62-711.500(3), Florida Administrative Code, at this time.

Please contact me at (850) 245-8743 if you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Tor JM Bejnar".

Subject: RE: FDEP Closure Cost estimating Form - Forever Recycling - WACS 102298

Good Afternoon Mr. Perez,

We have reviewed the attached closure cost estimate and determined that the cost estimate does not meet the requirements of Chapter 62-711.500(3) (see rule excerpt below) for the reasons outlined below. Please submit the information requested so we can complete our review. Also attached to assist you is an example of the cost estimate submitted for a smaller tire processing facility.

1. Please revise the cost estimate to include costs associated with removal, processing, disposal, and closing of the site. Based on a discussion on August 4, 2015 with the certification engineer, Mr. David Chuslo, the cost estimate submitted (\$2,800) only includes transportation costs.
2. The cost estimate must be based on a third party and reported on a per unit basis. Please provide the name and contact information of the company or companies used to come up with the estimate. Please include per unit costs (e.g., \$/ton or \$/tire) used in the calculations.
3. The cost estimate must be based on either (a) the quantity of tires currently stored on site or (b) the permit quantity, whichever is greater, and the quantity must be certified by the Professional Engineer. Please include a certified estimate of the number of tires currently on site and the supporting information (e.g., pile dimensions and calculations). According to the permit application previously submitted on April 23, 2015, the facility requested the permit amount to be a maximum of 350 tons of tires on site which equates to 35,000 tires based on FDEP's factor of 100 passenger equivalent tires per ton. Please compare the two quantities and indicate which one was used in the cost estimate calculation.

Rule Excerpt:

62-711.500 Waste Tire Site Notification and Requirements.

(3) Owners or operators of waste tire sites shall provide closing cost estimates for the quantity of waste tires on their site or the quantity of waste tires that they are permitted to have on their site, whichever is greater. The cost estimate shall be the amount that would be expended to remove, process, and dispose of waste tires on the site and to close the site. The costs shall be based on a third party, who is not a subsidiary or parent company, performing the work, reported on a per unit basis. Quantity estimates shall be certified by a Professional Engineer. The cost estimate shall be re-estimated at least annually and submitted to the Department at least 60 days prior to the anniversary date of the instrument.

If you have any questions, need our assistance, or would like to meet to further discuss, please do not hesitate contact me at the number provided below.

Thanks,

Jorge Patino, P.E.

DEP Form # 62-701.900(28), F.A.C.
Form Title: Closure Cost Estimating Form
For Solid Waste Facilities
Effective Date: January 6, 2010
Incorporated in Rule 62-701.630(3), F.A.C.

CLOSURE COST ESTIMATING FORM FOR SOLID WASTE FACILITIES

Date of DEP Approval: _____

I. GENERAL INFORMATION:

Facility Name: Forever Recycling WACS ID: _____
 Permit Application or Consent Order No.: _____ Expiration Date: _____
 Facility Address: 857 1/2 Old Belle Glade Road PAHOKEE FL 33476
 Permittee or Owner/Operator: Emilio Perez
 Mailing Address: 246 E Main St PAHOKEE FL 33476
 Latitude: Sec 20 / Twp 42 / R 37 Longitude: _____
 Coordinate Method: _____ Datum: _____
 Collected by: _____ Company/Affiliation: _____

Solid Waste Disposal Units Included in Estimate:

| Phase / Cell | Acres | Date Unit Began Accepting Waste | Active Life of Unit From Date of Initial Receipt of Waste | If active: Remaining life of unit | If closed: Date last waste received | If closed: Official date of closing |
|--------------|-------|---------------------------------|---|-----------------------------------|-------------------------------------|-------------------------------------|
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

Total disposal unit acreage included in this estimate: _____ Closure: _____ Long-Term Care: _____

Facility type: ☐ Class I ☐ Class III ☐ C&D Debris Disposal
 (Check all that apply) ☐ Other: _____

II. TYPE OF FINANCIAL ASSURANCE DOCUMENT (Check type)

- ☐ Letter of Credit* ☐ Insurance Certificate ☐ Escrow Account
☐ Performance Bond* ☐ Financial Test ☐ Form 29 (FA Deferral)
☐ Guarantee Bond* ☐ Trust Fund Agreement

* - Indicates mechanisms that require the use of a Standby Trust Fund Agreement

III. ESTIMATE ADJUSTMENT

40 CFR Part 264 Subpart H as adopted by reference in Rule 62-701.630, Florida Administrative Code, (F.A.C.) sets forth the method of annual cost estimate adjustment. Cost estimates may be adjusted by using an inflation factor or by recalculating the maximum costs of closure in current dollars. Select one of the methods of cost estimate adjustment below.

☐ (a) Inflation Factor Adjustment

☐ (b) Recalculated or New Cost Estimates

Inflation adjustment using an inflation factor may only be made when a Department approved closure cost estimate exists and no changes have occurred in the facility operation which would necessitate modification to the closure plan. The inflation factor is derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its survey of Current Business. The inflation factor is the result of dividing the latest published annual Deflatory by the Deflator for the previous year. The inflation factor may also be obtained from the Solid Waste website www.dep.state.fl.us/waste/categories/swfr or call the Financial Coordinator at (850) 245-8706.

This adjustment is based on the Department approved closing cost estimate dated: _____

| Latest Department Approved Closing Cost Estimate: | Current Year Inflation Factor, e.g. 1.02 | | Inflation Adjusted Closing Cost Estimate: |
|--|---|---|--|
| _____ | x _____ | = | _____ |

This adjustment is based on the Department approved long-term care cost estimate dated: _____

| Latest Department Approved Annual Long-Term Care Cost Estimate: | Current Year Inflation Factor, e.g. 1.02 | | Inflation Adjusted Annual Long-Term Care Cost Estimate: |
|---|---|---|---|
| _____ | x _____ | = | _____ |

Number of Years of Long Term Care Remaining: _____

Inflation Adjusted Long-Term Care Cost Estimate: _____

VI. CERTIFICATION BY ENGINEER

This is to certify that the Cost Estimates pertaining to the engineering features of this solid waste management facility have been examined by me and found to conform to engineering principles applicable to such facilities. In my professional judgment, the Cost Estimates are a true, correct and complete representation of the financial liabilities for closing and/or long-term care of the facility and comply with the requirements of Rule 62-701.630 F.A.C. and all other Department of Environmental Protection rules, and statutes of the State of Florida. It is understood that the Cost Estimates shall be submitted to the Department annually, revised or adjusted as required by Rule 62-701.630(4), F.A.C.

August 14, 2015

The quote to move 4 trailers from Forever Recycling at 857 ½ Old Belle Glade Road, Pahokee, FL 33476 to North County Landfill Complex at 6330 N Jog Road, West Palm Beach, FL is as follows:

\$100.00 per trailer x 4 = \$ 400.00

\$162.50 per trailer loading x 4 = \$ 650.00

Total 4 loaded trailers = \$1,050.00

Sincerely,

Manuel Cordero

- The landfill and transfer stations will be closed on: Thanksgiving and Christmas. **Authority facilities are not open on Sundays.**
- All customers are required to weigh out unless they have a tare weight on file. If you leave the Weigh Station without weighing out, your fee will be based on the full weight of the load as well as the vehicle.
- Transfer stations **cannot** accept the following **prohibited materials**: concrete, chain link fencing, farm plastic, block, brick, tile, steel, rebar, roofing material, construction lumber, trusses, pallets, trailers, dirt, fill, sod, stumps and tree remains greater than 50 pounds or 6 feet in length, and other similar materials which may damage the facility or equipment. Loads containing more than a small quantity of these materials will be rejected. Additionally, loads of tires, animals, animal waste, sludge, loads delivered in a tractor trailer and other items that require special handling are never accepted at transfer stations. The Landfill will accept these items. Acceptance or rejection of loads at a Transfer Station is at the Authority's discretion.
- Mixed loads will be charged at the higher waste category rate.
- The SWA accepts only cash or business checks at the Weigh Stations. Payment by check requires prior approval and completion of a Check Cashing Application. Credit Cards are not accepted at this time.

7. Have any enforcement actions been taken by the Department against the applicant relating to the operation of any solid waste management facility in this state? This includes any Complaint, Notice of Violation, or revocation of a permit or registration, as well as any Consent Order in which a violation of Department rules is admitted. It does not include a Warning Letter, Warning Notice, Notice of Noncompliance, or other similar document which does not constitute agency action.
Yes ☐ No ☒ If yes, attach a history and description of the enforcement actions.

B. Facility Information:

1. Facility Name: Forever Recycling
2. Facility Street Address (Main Entrance): 857 1/2 Old Belle Glade Rd
3. City: Pahokee County: Palm Beach Zip: 33476
4. Facility Mailing Address: 246 East Main Street
5. City: Pahokee State: FL Zip: 33476
6. Contact Person: Emilio G. Perez Phone: (561) 924-9250
7. Facility Location Coordinates:
Section: 20 Township: 42 Range: 37
Latitude: _____ Longitude: _____
8. Anticipated date for starting construction _____ and for completion of construction _____
9. Anticipated date for receipt of tires 2/1/2015 and for start of processing 3/1/2015

C. Land Owner Information (if different from applicant):

1. Owner's name: Perez Investments, Inc.
2. Land owner's mailing address: 246 East Main Street
3. City: Pahokee State: FL Zip: 33476
4. Authorized Agent: Emilio Perez Agent's phone (561) 924-9250
5. Current lease expires: _____

D. Facility Operator Information (if different from applicant):

1. Operator's name: SAA
2. Operator's mailing address: _____
3. City: _____ State: _____ Zip: _____
4. Contact person: _____ Phone: () _____

E. Preparer of Application:

1. Name of person preparing application: Sara Perez
2. Mailing address: 246 East Main Street
3. City: Pahokee State: FL Zip: 33476
4. Phone: (561) 924-9250
5. Affiliation with facility: Supervisor

Part II-Operations:

A. Facility type (check appropriate box):

- ☒ Waste tire processing facility.
- ☐ Waste tire processing facility with on-site disposal of processed tires or processing residuals.
- ☐ Waste tire processing facility with on-site consumption of waste tires or processing residuals.
- ☐ Permitted solid waste management facility modification to allow waste tire site and processing.

B. Type of processing facility (check as many as apply):

- ☒ Shredder ☐ Cutter ☐ Chopper ☐ Incinerator only ☐ Incinerator with energy recovery
- ☐ Pyrolysis ☐ Supplemental fuel user ☐ Other, explain Tire Bundling and Transport for fuel

C. Storage: Indicate the maximum quantities of whole waste tires, processed waste tires, and processing residuals, expressed in tons, to be stored at the facility, in accordance with Rule 62-711.530(2), F.A.C.

| | Outdoor Storage(tons) | Outdoor Storage (sq.ft) | Indoor Storage (tons) | Indoor Storage (sq.ft) | Total Storage (tons) |
|-----------------------|--------------------------|----------------------------|--------------------------|---------------------------|-------------------------|
| Whole waste tires: | <u>35 tons</u> | <u>9,000</u> | _____ | _____ | _____ |
| Processed tires: | <u>0</u> | <u>0</u> | _____ | _____ | _____ |
| Processing residuals: | <u>0</u> | <u>0</u> | _____ | _____ | _____ |
| TOTALS: | <u>35 tons</u> | <u>9,000</u> | _____ | _____ | _____ |

- D. For reporting quantity of tires in tons, tires will be: weighed on site ☐ weighed off site ☒
weights will be calculated ☐
- E. Facilities that will not be disposing of processed tires or processing residual on the facility site must indicate the permitted solid waste management facility where processed tires or residuals will be disposed.

1. Name of facility: Wheelabrator Ridge Energy

2. Street address: 3131 K-Ville Ave

3. City: Auburndale County: Polk County Zip: 33823

- F. Facilities that will be delivering processed tires to consuming facilities must describe the existing or proposed markets for those processed tires.

Part III-Attachments:

A. Facility design

NOTE: All maps, plan sheets, drawings, isometrics, cross sections, or aerial photographs shall be legible; be signed and sealed by a registered professional engineer responsible for their preparation; be of appropriate scale to show clearly all required details; be numbered, referenced to narrative, titled, have a legend of symbols used, contain horizontal and vertical scales (where applicable), and specify drafting or origination dates; and use uniform scales as much as possible, contain a north arrow and use NGVD for all elevations.

1. A topographic or section map of the facility, including the surrounding area for one mile, no more than one year old, showing land use and zoning within one mile of the facility
2. A plot plan of the facility on a scale of not less than one inch equals 200 feet. At a minimum, the plot plan shall include
 - a. The facility design, including the location and size of all storage and processing areas for used tires, unprocessed waste tires, processed waste tires, and waste tire processing residuals;
 - b. All wetlands and water bodies within the facility or within 200 feet of any storage area;
 - c. Stormwater control measures, including ditches, dikes, and other structures;
 - d. Boundaries of the facility, legal boundaries of the land containing the facility, and any easements or rights of way that are within the facility or within 200 feet of any storage area;
 - e. Location, size, and depth of all wells within the facility or within 200 feet of any storage area;
 - f. All structures and buildings that are, or will be, constructed at the facility; include those used in storage and processing operations;
 - g. All areas used for loading and unloading;
 - h. All access roads and internal roads, including fire lanes;
 - i. Location of all fences, gates, and other access control measures; and
 - j. Location of all disposal areas within the facility.

B. Facility operation.

1. A description of the facility's operation, process and products including how waste tires will be received and stored.
2. A description of the equipment used for processing tires. This description shall include the make, model, and hourly capacity of each piece of equipment.
3. Description of the waste from the process, the amount of waste expected and how and where this waste will be disposed of.
4. Statement of the maximum daily throughput and the planned daily and annual throughput.
5. A description of how the operator will maintain compliance with each of the storage requirements of Rule 62 - 711.540, F.A.C.
6. A copy of the emergency preparedness manual for the facility with a statement of the on site and off site locations where that manual will be maintained.
7. A copy of the fire safety survey
8. A description of how 75% of the annual accumulation of waste tires will be removed for disposal or recycling.

- C. Completed closing plan for the facility as required by Rule 62-711.700(2) and (3), F.A.C.

- D. Attach proof of financial responsibility as requirement by Rule 62-711.500(3) OR a calculation showing that financial assurance documents, currently on file with the Department, are sufficient to assure closing of the waste tire site as well as any other solid waste management facility at that location.
- E. A letter from the land owner (if different from applicant) authorizing use of the land as a waste tire processing facility.
- F. If waste tires will be consumed or disposed of at the facility, attach a description of the other environmental permits that the applicant has for this use, including, permit number, date of issue, and name of issuing agency
- G. The permit fee as required in Rule 62-4, F.A.C.

Part IV-Certification:**A. Applicant:**

The undersigned applicant or authorized representative of Forever Recycling
Is aware that statements made in this form and attached information are an application for a
Waste Tire Processing Permit from the Florida Department of Environmental Protection and certifies that
The information in this application is true, correct and complete to the best of his knowledge and belief.
Further, the undersigned agrees to comply with the provisions of Chapter 403, Florida Statutes, and all rules and
regulations of the Department. It is understood that the Department will be notified prior to the sale or legal transfer
of the facility.

Closing Plan

For

Forever Recycling

(Tire Processing Facility)

Located at

857 ½ Old Belle Glade Road

Pahokee Fl, 33476

1. Notification of closing

- a) Post a sign at the front access gate indicating the site is closed. The notice is to show the phone number of the Solid Waste Authority of Palm Beach County 561-687-1100
- b) Contact the Florida Department of Environmental Protection and the Palm Beach County Health Department to notify them of the site closing.

Florida Dpt. Of Environmental Protection

400 North Congress Avenue

West Palm Beach, Florida 33401

561-681-6667

Palm Beach County Health Department

800 Clematis Street, 4th Floor

West Palm Beach, Florida 33402

2. Secure Site

- a) Stop public access to the site.
- b) Verify all access to property is operable and locked. As required

3. Remove Solid Waste

- a) Transport all waste tires and residuals to the Solid Waste Authority of Palm Beach County's Jog Rd site for disposal. Retain the disposal receipts.
- b) Remove any other solid waste to a permitted facility.

4. Environmental Site Assessment

- a) After the tires have been removed from the site, conduct an environmental site assessment. Either a professional engineer or professional geologist, licensed in the State of Florida, shall conduct this assessment.
- b) The assessment shall include examination of potential soil contamination, groundwater quality, and surface water quality.
- c) The professional that examined the site shall prepare a report documenting the findings.
- d) If it is determined that there is a site contamination, a more detailed investigation shall be conducted.
- e) If contamination is detected, remediation will be required.

5. Final Notification

- a) Notify the Florida Department of Environmental Protection and Palm Beach County Health Department when closing is complete.
- b) The site is to be closed within 30 days of the last date of tire recycling activities.

857 ½ Old Belle Glade Road Pahokee FL 33476

Forever Recycling

Facility Operation

857 ½ Old Belle Glade Road

Pahokee FL 33476

Tel: 561-924-9250

Fax: 561-924-9252

1. Purpose of the Facility

The purpose of this facility is to reduce waste tires. Tire Baling reduces the space.

2. Capacity

- a) Weight of tires Received Each Day: 7 Tons
- b) Weight of tires Processed Each Day: 7 Tons
- c) Tire Storage 35 Tons

3. Source and Type of Materials

- a) Waste tires from retail and commercial tire stores.

4. Equipment

Tire Baler

5. Operation

- a) Operating Hours are Monday through Friday, 8:00 AM to 5:00 PM
- b) Waste Tires are delivered to the site and dropped off at the designated drop-off area.

857 ½ Old Belle Glade Road Pahokee FL 33476 Tel: 561-924-9250 Fax: 561-924-9252

- c) Tires are sorted by staff into two groups:
 - I. Tires for Baling
 - II. Tires for resale
- d) Tires for resale are placed into tire racks.
- e) Tires that are baled are loaded into a container.
- f) Container filled with bale tires is picked up to delivery destination.

6. Vehicle Traffic Control And Unloading

- a) Signage shall be clearly posted to direct all incoming Waste Tire Traffic to the waste tire unloading area.
- b) Signage shall be clearly posted that will designate the unloading area.
- c) Signage shall be clearly posted that will direct the traffic towards the exit.
- d) Staff shall assist in directing traffic as needed to maintain clearance of the access path and fire lanes.

7. Safety

- a) The surface in the areas where the equipment shall be even and stable.
- b) All onsite workers shall wear the following at all times:
 - I. Long Pants
 - II. T-shirts
 - III. Gloves
 - IV. Glasses
- c) All onsite workers shall wear the following at all times
 - I. Gloves
 - II. Steel toed construction boots.
- d) Location of nearest hospital and emergency numbers shall be posted in a visible location.
- e) Appropriately sized First-Aid kit shall be located in a clearly visible and easily accessible.

8. People Responsible for operation, control, maintenance and training.

a)

Emilio G Perez

9. Procedure for controlling Non-Processible Waste

a) Tools such as brooms, rakes, shovels, mops and absorbents will be accessible for use at a location under cover.

b) Waste collection containers with secure covers will be placed in a clearly vision and accessible location under cover.

10. Procedure if prohibited waste is discovered:

a) Use the tools in section 9.a and 9.b as necessary to collect any prohibited waste to prevent contamination.

b) Properly dispose of the prohibited waste once the container reaches the maximum allowable capacity.

11. Environmental Controls

a) Dust Control:

I. During dry conditions, control dust by spraying water on exposed soil areas.

b) Noise Control:

I. Limit truck movement and equipment operation to the daylight hours

c) Litter Control:

I. Before leaving the site at the end of each working day, pick up litter and place in a trash receptacle.

d) Vector Control:

I. Cover tire piles with plastic sheets or other impermeable barrier in order to prevent the entrapment of water.

II. Chemical treat to eliminate vector breeding.

12. Security Plan

- a) The gates are to be locked at all times when there is nobody present on site.

13. In House training program

- a) Employees will be trained in the proper operation of the machinery and emergency procedures.

EMERGENCY PREPAREDNESS MANUAL

For

Forever Recycling

857 ½ Old Belle Glade Road

Pahokee FL 33476

Tel: 561-924-9250

1.0 INTRODUCTION

This document is intended for the use of the Site Operator for the Forever Recycling whose facilities are located at 857 ½ Old Belle Glade Road, Pahokee, Florida. The procedures contained in the manual shall be followed in the event of an emergency which poses a threat to the public health or the environment, including fire, flood or other emergencies.

A copy of this manual shall be kept on the site at all times. A second copy of this manual shall be kept at an off-site location designated by the operator. This manual shall be updated at least once a year and upon changes in operations at the site.

Location of off-site manual:

3.0 ON-SITE EMERGENCY RESPONSE EQUIPMENT

3.1 First Aid Kits

3.2 Eye flushing station

3.3 Safety Equipment

3.4 Each fuel-fired vehicle operating at the site shall be equipped with at least one portable fire extinguisher with a U/L rating of 2A10BC or higher.

3.5 Earth moving equipment

3.5.1 Shovels

3.5.2 Picks

3.5.3 Rakes

3.5.4 Brooms

3.5.5 Forklift

3.6 25 pound bags of granular absorbent material

3.7 Universal spill containment kit

3.8 Domestic Potable Water Supply

3.9 The nearest fire hydrant is located 225 feet from the building (See Attachment "A").

4.0 FIRE PREVENTION PRACTICES

- 4.1. Exit doors are to remain clear at all times.
- 4.2. Aisles are to remain clear at all times.
- 4.3. Report damaged fire safety equipment to building maintenance.
- 4.4. Know the locations of all exits.
- 4.5. No open flame devices allowed in buildings.
- 4.6. Flammable gases are not to be stored in buildings.
- 4.7. Turn electrical appliances off when not in use.
- 4.8. Report unusual odors or smoke immediately.
- 4.9. Do not tamper with any fire safety equipment.
- 4.10. Storage is only allowed in approved storage areas.
- 4.11. Do not place any items on any stairs.
- 4.12. Extension cords are not to be used as permanent wiring.
- 4.13. Damaged electrical cords or appliances shall not be used.
- 4.14. Do not overload electrical outlets.
- 4.15. All fires are to be reported, even if extinguished.
- 4.16. Participate in fire drills and employee training.
- 4.17. Electrical work is to be performed by licensed individuals.

5.0 PROCEDURES IN THE EVENT OF FIRE

- 5.1 Contact 911 to report the emergency.
- 5.2 Alert all on-site personnel of the fire and direct them to a safe area away from the fire and smoke.
- 5.3 Shut off any equipment involved in the fire.
- 5.4 Move portable fuel containers and other flammable items a safe distance away from the fire.

- 5.5 If the fire is controllable, attempt to contain and extinguish the fire using the on-site emergency response equipment.
- 5.6 Notify the Facility Operations Manager.
- 5.7 Notify the Florida Department of Environmental Protection and Palm Beach County Health Department if the fire poses a threat to the public health or the environment.
- 5.8 Upon approval of the Facility Operations Manager and Fire Marshal, initiate procedures to cleanup the site. Contain and dispose of all materials generated by the fire, including the oily material from burned tires as follows:
 - 5.8.1 Identify burned materials and delineate the burn area with caution tape.
 - 5.8.2 Remove unburned/salvageable materials from the burn area and return unburned tires to the tire storage piles.
 - 5.8.3 Conduct Emergency Response Action or Interim Source Removal procedures in accordance with Rule 62-780.500 F.A.C. (see Attachment B) within 24 hours of discovering a situation that threatens human health, public safety, or the environment. Depending on the degree of severity, an independent contractor specializing in source removal may need to be hired (see Emergency Contacts).
 - 5.8.4 If petroleum was released/ spilled, conduct cleanup procedures in accordance with Rule 62-770 F.A.C. Rule does not apply to any discharge of petroleum or petroleum products of less than 25 gallons onto a pervious surface, as long as the discharge is removed and properly treated or properly disposed, or otherwise remediated in accordance with Rule 62-770.300, F.A.C. (see Attachment C), so that no contamination from the discharge remains on-site.
- 5.9 Within two weeks of the emergency, submit to the Florida Department of Environmental Protection and Palm Beach County Health Department a written report on the emergency. The report shall describe:
 - 5.9.1 The origins of the emergency
 - 5.9.2 The actions taken to deal with the emergency
 - 5.9.3 The results of the action taken
 - 5.9.4 An analysis of the success or failure of the actions

- 5.10 If the fire results in a discharge of contaminants in excess of a "De Minimus Discharge", conduct a Site Assessment in accordance with Rule 62-780 F.A.C. within 60 days of the release of contaminants, and coordinate with the Department of Environmental Protection to develop a Remedial Action Plan for long term recovery of contaminants. A "De Minimus Discharge" is defined in Rule 62-780.200 F.A.C. as a discharge that is removed from the soil, sediment, surface water, and groundwater to cleanup target levels or background concentrations pursuant to subsection 62-780.680(1), F.A.C., within a period of 30 days from the discovery of the discharge.

5.0 CONTINGENCY OPERATIONS

In the event normal operations are disrupted by an emergency, such as fire, proceed as follows until normal operations can be restored:

- 5.1 If the primary tire equipment fails, continue operating the secondary equipment, if desired. Reduce the rate at which waste tires are delivered to the site accordingly. Do not store waste tires beyond the limits of the designated storage areas.
- 5.2 If the waste storage is reduced as a result of fire and shredding equipment remains operational, adjust rate at which waste tires are delivered accordingly. Do not store waste tires beyond the limits of the designated storage areas.
- 5.3 If the tire processing operation is completely suspended for more than 24 hours, discontinue delivery of waste tires to the site and place stored waste tires in designated sealed containers.

6.0 HAZARDS APPROACH

The means of carrying out the responsibility to evaluate, notify and implement the emergency response plan will vary with the type and significance of the emergency. The following serves as a guideline for required actions:

6.1 ACCIDENT

- 6.1.1 Call 911 for assistance
- 6.1.1 Notify Emergency Coordinator or other key personnel
- 6.1.2 Administer first aid ONLY if trained to do so
- 6.1.3 DO NOT attempt to move a seriously injured person

6.2 BOMB THREAT

- 6.2.1 Take all threats seriously
- 6.2.2 Report threats to 911 and notify a supervisor immediately
- 6.2.3 Do not search for a device or touch suspicious objects.
- 6.2.4 If you receive a bomb threat try to note the caller's age, gender and unique speech attributes
- 6.2.5 If a threat is received, try to make note of and describe any suspicious persons in the area
- 6.2.6 Evacuation decisions should remain with local authorities

6.3 TORNADO WATCH / WARNING

Tornado Watch: Tornadoes are possible. Remain alert for approaching storms. Watch the sky and stay tuned to NOAA Weather Radio, commercial radio, or television for information.

Tornado Warning: A tornado has been sighted or indicated by weather radar. Take shelter immediately.

- 6.3.1 Listen to NOAA Weather Radio or to commercial radio or television newscasts for the latest information.
- 6.3.2 Look for approaching storms
- 6.3.3 Look for the following danger signs:
 - Dark, often greenish sky
 - Large hail
 - A large, dark, low-lying cloud (particularly if rotating)
 - Loud roar, similar to a freight train.
- 6.3.4 **TORNADO SIGHTING:** Go to a pre-designated shelter area such as the center of an interior room on the lowest level (closet, interior hallway) away from corners, windows, doors, and outside walls. Put as many walls as possible between you and the outside. Get under a sturdy table and use your arms to protect your head and neck. Do not open windows.

6.4 HURRICANE WATCH / WARNING – 24 to 36 HOURS PRIOR

Hurricane Watch - Hurricane/tropical storm conditions are possible in the specified area, usually within 36 hours. Tune in to NOAA Weather Radio, commercial radio, or television for information.

Hurricane Warning - Hurricane/tropical storm conditions are expected in the specified area, usually within 24 hours.

- 6.4.1 Removing all loose outdoor storage or equipment
- 6.4.2 Anchor all trailers and other portable equipment to the ground
- 6.4.3 Secure outdoor storage or equipment that cannot be moved
- 6.4.4 Raise critical equipment off floors (e.g. PC towers)
- 6.4.5 Cover any critical equipment with waterproof tarpaulins
- 6.4.6 Initiate orderly shutdown of production equipment and systems that rely on power.
- 6.4.7 Turn off any non-essential electrical systems
- 6.4.8 Verify that all fire protection systems are in service (i.e. water supplies, fire pumps, sprinklers, fire alarms)
- 6.4.9 All buildings should be closed and locked after ensuring there is no one in the building.
- 6.4.10 Leave locked building and go to a safe place until emergency officials announce that conditions are safe to travel.

6.5 POST HURRICANE

- 6.5.1 Survey the site for:
 - Live electrical wires
 - Broken glass or sharp metal
 - Damaged building features or contents that could shift or collapse
 - Verify the status of protection systems, water supplies, fire pumps, automatic sprinklers, fire alarms and security systems.
- 6.5.2 Begin salvage and/or repairs as soon as possible to prevent further damage
- 6.5.3 Clear roofs drains and ground level catch basins

EMERGENCY PREPAREDNESS MANUAL

ATTACHMENT B

Rule 62-780.500 F.A.C.

Contamination Site Cleanup Criteria
Emergency Response Action or Interim Source Removal

For

Forever Recycling

857 ½ Old Belle Glade Road Pahokee FL 33476

Tel: 561-924-9250

62-780.500 Emergency Response Action or Interim Source Removal.

(1) Within 24 hours of discovery of an unexpected situation or sudden occurrence of a serious and urgent nature that demands immediate action to alleviate a threat to human health, public safety, or the environment, or within 24 hours after being notified by the Department of such a condition, the PRSR shall commence an emergency response action. For purposes of an emergency response action, "commence" means that the PRSR has employed or contracted with a response action contractor to evaluate, design, plan, engineer, construct, implement, and complete the requirements of the emergency response action, and has given the contractor the authority to proceed with the required work. The emergency response action shall include performing all tasks described in this section that are necessary to eliminate the immediate and serious threat posed by the site conditions. In addition, any PRSR may conduct an interim source removal in accordance with this section. The objectives of the emergency response action or interim source removal are to remove specific known contaminant source(s) and provide temporary control to prevent or minimize contaminant migration, and to protect human health and the environment prior to the approval of a Remedial Action Plan prepared and submitted pursuant to Rule 62-780.700, F.A.C.

(2) Free Product Removal and Disposal.

(a) The PRSR may, and for emergency response actions shall, if necessary to alleviate a threat to human health, public safety, or the environment, perform free product recovery consistent with the following requirements:

1. The PRSR shall provide to the Department a written notification in accordance with the time schedule in Table A (Notices for Field Activities) or the CAD that includes a description of the type and estimated volume of free product to be removed, and proposed free product recovery and disposal methods to be utilized;

2. The free product recovery shall not spread contamination into previously uncontaminated or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

3. Flammable products shall be handled in a safe manner; and

4. The recovered product shall be characterized and properly disposed or recycled; and all sampling and analyses shall be performed pursuant to Rule 62-780.300, F.A.C.

(b) The following passive and active methods of free product recovery may be implemented without requesting approval from the Department:

1. Absorbent pads;

2. Skimmer pumps that include pumps with mechanical, electrical, or hand-bailed purging operations;

3. Hand or mechanical bailing; and

4. Fluid vacuum techniques (for example, vacuum pump trucks) or total fluid displacement pumps, as long as the technique used shall not smear or spread free product, or contaminate previously uncontaminated or less contaminated media.

(c) In addition to the free product recovery methods specified in paragraph 62-780.500(2)(b), F.A.C., the PRSR may evaluate, propose, and submit other product recovery methods to the Department for approval prior to implementation. The submittal, as an Interim Source Removal Proposal, shall include the results of the evaluation performed to determine the potential for product smearing or spreading and the potential for air emissions. The free product recovery methods proposed may include:

1. Dewatering or groundwater extractions that may influence the depth to the water table;

2. Air/fluid extraction; or

3. Excavation of soil saturated with non-aqueous phase liquid into, or below, the water table.

(d) The Department shall:

1. Provide the PRSR with written approval of the Interim Source Removal Proposal; or

2. Notify the PRSR in writing, stating the reason(s) why the Interim Source Removal Proposal does not contain information adequate to support a free product recovery method pursuant to paragraph 62-780.500(2)(c), F.A.C.

(e) Free product recovery as an Interim Source Removal task shall be deemed complete when the objectives of subsection 62-780.500(1), F.A.C., have been met.

(f) Within the time frames specified in Table A or the CAD, written notification of initiation of free product recovery shall be provided by the PRSR to the Department on Form 62-780.900(2).

(g) Within the time frames and frequencies specified in Table A or the CAD, an Interim Source Removal Status Report documenting the recovery progress and summarizing all recovery activities for a specified period shall be submitted by the PRSR to the Department for review.

(3) Short-term Groundwater Recovery.

(a) The PRSR may, and for emergency response actions shall, if necessary to alleviate a threat to human health, public safety, or the environment, perform a short-term groundwater recovery event as an interim source removal activity. Groundwater recovery from well(s) within the plume with screened intervals that intercept the water table, with the intent of achieving cleanup progress, may be performed prior to Department approval of a Remedial Action Plan submitted pursuant to Rule 62-780.700, F.A.C., provided the following criteria are met:

1. Prior to initiation, the PRSR shall provide to the Department a written notification in accordance with the time frames in Table A (Notices for Field Activities) or the CAD that includes a description of the type of contamination, estimated volume of groundwater to be removed, and proposed disposal methods to be utilized;

2. The groundwater contamination has been established to be less than 1/4 acre and confined to shallow aquifer well(s) with screened intervals that intercept the water table, such that the pumping of a shallow aquifer well(s) within the plume may result in the site meeting the No Further Action criteria of Rule 62-780.680, F.A.C., or the Natural Attenuation with Monitoring criteria of Rule 62-780.690, F.A.C.;

3. Free product is not present;

4. The duration of the groundwater recovery does not exceed 30 days, unless the PRSR demonstrates to the Department that extended groundwater recovery will not result in the spread of contamination;

5. The recovered groundwater is not treated on-site and is properly disposed at a permitted industrial water treatment facility, at a publicly-owned treatment works with the approval of the sanitary sewer authority, or at a permitted Hazardous Waste Treatment, Storage, or Disposal facility if the recovered groundwater is a hazardous waste; and

6. Sampling of representative monitoring wells to determine the effectiveness of the Short-term Groundwater Recovery event shall be performed at least 30 days after completion of the groundwater recovery.

(b) Within the time frames and frequencies specified in Table A or the CAD, the PRSR shall submit to the Department for review two copies of an Interim Source Removal Status Report that documents the recovery progress and summarizes all recovery activities for a specified period.

(4) Groundwater Recovery, Treatment, and Disposal.

(a) The PRSR may perform groundwater recovery prior to the approval of a Remedial Action Plan prepared and submitted pursuant to Rule 62-780.700, F.A.C., provided the PRSR submits an Interim Source Removal Proposal that includes the same level of engineering detail as a Remedial Action Plan pursuant to Rule 62-780.700, F.A.C. Applicable sections shall be signed and sealed pursuant to Rule 62-780.400, F.A.C.

(b) The Department shall:

1. Provide the PRSR with written approval of the proposal; or
2. Notify the PRSR in writing, stating the reason(s) why the proposal does not contain information adequate to perform groundwater recovery pursuant to paragraph 62-780.500(4)(a), F.A.C.

(c) Within the time frames and frequencies specified in Table A or the CAD, the PRSR shall submit to the Department for review two copies of an Interim Source Removal Status Report documenting the recovery progress and summarizing all recovery activities for a specified period.

(5) Soil and Sediment Removal, Treatment, and Disposal.

(a) The PRSR may, and for emergency response actions shall, excavate contaminated soil or contaminated sediment for proper treatment or proper disposal as an interim source removal activity provided the following criteria are met:

1. Prior to initiation, the PRSR shall provide to the Department a written notification in accordance with the time frames in Table A or the CAD, that includes a description of the type of contamination, estimated volume of soil or sediment to be removed, and proposed disposal methods to be utilized;

2. Contamination shall not be spread into previously uncontaminated areas or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

3. Flammable products shall be handled in a safe manner;

4. When a soil vacuum extraction system is necessary to abate an imminent threat to human life, health, or safety within a structure or utility conduit, then the vacuum extraction system shall be designed and operated only to abate the imminent threat. The Department shall be notified, within 24 hours, of the imminent threat and the intent to use a soil vacuum extraction system. The air emissions monitoring and frequency of monitoring shall be performed pursuant to paragraphs 62-780.700(4)(a) and (12)(i), F.A.C.;

5. If one of the objectives of the interim source removal is to excavate all the contaminated soil or sediment, confirmatory soil or sediment samples shall be collected. Soil samples shall be collected at the bottom of the excavation (unless the bottom is below the water table) and walls or perimeter of the excavation. Sediment samples shall be collected at the bottom and perimeter of the excavation, if applicable;

6. A determination shall be made as to whether or not the contaminated soil or sediment contains hazardous waste. If the soil or sediment is known to be contaminated by hazardous waste, listed in 40 CFR Part 261 Subpart D, testing is not required to make the determination. If the soil or sediment is not known to be contaminated with

listed hazardous waste, but is contaminated with any of the toxic constituents identified in 40 CFR 261.24(b) (and the contamination does not result solely from manufactured gas plant waste), then USEPA Test Method 1311, Toxicity Characteristic Leaching Procedure (TCLP) and subsequent analysis of the leachate, shall be performed on a number of samples sufficient to determine whether or not the contaminated soil or sediment exceeds maximum concentrations for the toxicity characteristics. [Refer to the contaminated media guidelines referenced in subsection 62-780.100(6), F.A.C., for guidance in managing soil or sediment that contains hazardous waste.]; and

7. When excavated soil or sediment is temporarily stored or stockpiled on-site, the soil or sediment shall be placed on an impermeable surface to prevent leachate infiltration and secured in a manner that prevents human exposure to contaminated soil or sediment and prevents soil or sediment exposure to precipitation that may cause surface runoff. Any excavation shall be secured to prevent entry by the public. The temporary storage or stockpiling of excavated contaminated soil or sediment shall not exceed 60 days, unless the excavated contaminated soil or sediment contains hazardous waste and a different time frame is authorized pursuant to Chapter 62-730, F.A.C. The PRSR is advised that other federal or local laws and regulations may apply to these activities.

(b) Consistent with the goals set forth in Section 403.061(33), F.S., the Department encourages treatment over disposal options to address contaminated soil.

(c) Soil or sediment treatment, storage, or disposal techniques not authorized by applicable rules of the Department require approval in an Interim Source Removal Proposal submitted pursuant to paragraph 62-780.500(5)(d), F.A.C., or in a Remedial Action Plan submitted pursuant to Rule 62-780.700, F.A.C.

(d) The Interim Source Removal Proposal shall include the information outlined in subsections 62-780.700(3) and (4), F.A.C., as applicable.

(e) The Department shall:

1. Provide the PRSR with written approval of the Interim Source Removal Proposal submitted pursuant to paragraph 62-780.500(5)(d), F.A.C.; or

2. Notify the PRSR in writing, stating the reason(s) why the Interim Source Removal Proposal does not contain information adequate to support the selection of an alternative soil or sediment treatment or disposal technique.

(6) Authorization or receipt of approval pursuant to Rule 62-780.500, F.A.C., does not relieve the PRSR from the obligation to comply with other Department rules (for example, Chapters 62-701 and 62-730, F.A.C.) for product recovery, product disposal, groundwater recovery, or the handling, storage, disposal, or treatment of contaminated media. [Refer to the contaminated media guidelines referenced in subsection 62-780.100(6), F.A.C., for guidance on management of environmental media that contain hazardous waste.] The PRSR is advised that other federal or local laws and regulations may apply to these activities.

(7) Interim Source Removal Report.

(a) Within the time frames specified in Table A or the CAD, two copies of an Interim Source Removal Report shall be submitted by the PRSR to the Department for review. If analytical results obtained pursuant to subparagraphs 62-780.500(3)(a)6., 62-780.500(5)(a)5., and 62-780.600(5)(l)3., F.A.C., as applicable, after completion of the interim source removal, demonstrate that the No Further Action criteria of subsection 62-780.680(1), F.A.C., are met, a Site Assessment Report pursuant to subsection 62-780.600(7), F.A.C., may be submitted in lieu of an Interim Source

Removal Report. The Interim Source Removal Report shall contain the following information in detail, as applicable:

1. The type and an estimated volume of non-aqueous phase liquids that were discharged to the environment, if known;
2. The volume of non-aqueous phase liquids and the volume of groundwater recovered;
3. The volume of contaminated soil or sediment excavated and treated or properly disposed;
4. The disposal or recycling methods for non-aqueous phase liquids and contaminated soil or sediment;
5. The disposal methods for other contaminated media and any investigation-derived waste;
6. A scaled site map (including a graphical representation of the scale used) that shows the location(s) of all known on-site structures (including any buildings, underground storage tanks, storm drain systems, and septic tanks), locations where free product was recovered and the area of soil removal or treatment, and the approximate locations where all samples were collected;
7. A table that summarizes free product thickness in each monitoring well or piezometer, the total depth and screened interval of each monitoring well or piezometer, and the dates the measurements were made;
8. The type of field screening instrument, analytical methods, or other methods used;
9. The dimensions of the excavation(s) and location(s), integrity, capacities and last known contents of storage tanks, integral piping, dispensers, or appurtenances removed;
10. A table that indicates the identification, depth, and field soil screening results of each sample collected;
11. Separate tables by media that summarize all available soil, sediment, groundwater, and surface water analytical results, detection limits achieved for non-detected analytes, and analyses performed (listing all contaminants analyzed and their corresponding CTLs);
12. Depth to groundwater at the time of each excavation, measurement locations, and method used to obtain that information;
13. A scaled site map (including a graphical representation of the scale used) that shows the locations and results of confirmatory soil or sediment samples in relation to the area of the soil or sediment removal; and
14. Documentation or certification that confirms the proper treatment or proper disposal of the non-aqueous phase liquids, contaminated groundwater, contaminated soil, or contaminated sediment, including disposal manifests for non-aqueous phase liquids or hazardous waste, and a copy of the documentation or certification of treatment or acceptance of the contaminated soil or contaminated sediment.

(b) The Department shall:

1. Provide the PRSR with written approval of the Interim Source Removal Report submitted pursuant to the criteria of paragraph 62-780.500(7)(a), F.A.C.; or
2. Notify the PRSR in writing, stating the reason(s) why the Interim Source Removal Report does not conform with the applicable Interim Source Removal criteria of paragraph 62-780.500(7)(a), F.A.C.

(8) If the Interim Source Removal Report is incomplete in any respect, or is insufficient to satisfy the criteria of paragraph 62-780.500(7)(a), F.A.C., the Department

shall inform the PRSR pursuant to subparagraph 62-780.500(7)(b)2., F.A.C., and the PRSR shall submit to the Department two copies of an Interim Source Removal Report Addendum that addresses the deficiencies within 80 days after receipt of the notice.

(9) If the interim source removal is performed after submittal of the Site Assessment Report, the PRSR shall submit to the Department two copies of a Site Assessment Report Addendum that updates the Site Assessment Report by summarizing the interim source removal activities and all sampling results obtained after submittal of the Site Assessment Report, and that includes a recommendation pursuant to paragraph 62-780.600(8)(b), F.A.C.

62-770.300 Interim Source Removal.

(1) Free Product Removal and Disposal.

(a) Except for those sites described in paragraph (1)(g) of this rule, within three days of discovery of free product the responsible party shall take steps to obtain cleanup services for product recovery or initiate product recovery. Product recovery shall be performed pursuant to paragraph 62-770.300(1)(b), F.A.C. The responsible party is required to complete product recovery provided that:

1. The product recovery method shall be selected pursuant to paragraph 62-770.300(1)(b), F.A.C.;

2. The product recovery shall not spread contamination into previously uncontaminated or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

3. Flammable products shall be handled in a safe manner; and

4. All sampling and analyses shall be performed pursuant to Rule 62-770.400, F.A.C.

(b) The following passive and active methods of product recovery may be implemented without requesting approval from the Department or FDEP local program:

1. Absorbent pads;

2. Skimmer pumps that include pumps with mechanical, electrical, or hand-bailed purging operations;

3. Hand or mechanical bailing; and

4. Fluid vacuum techniques (for example, vacuum pump trucks) or total fluid displacement pumps, as long as:

a. The technique used shall not smear or spread free product or contaminate previously uncontaminated or less contaminated media; and

b. The volume of groundwater recovered shall not be greater than two times the volume of free product recovered, except that the first 1,000 gallons of the total fluid recovered per discharge are exempt from meeting the required ratio of groundwater to free product.

(c) In addition to the product recovery methods specified in paragraph 62-770.300(1)(b), F.A.C., the responsible party may evaluate, propose, and submit other product recovery methods to the Department or to the FDEP local program for approval pursuant to Rule 62-770.890, F.A.C., prior to implementation. During the submittal and approval process, implementation of one or more of the collection methods specified in paragraph 62-770.300(1)(b), F.A.C., is required. The submittal shall include the results of the evaluation performed to determine the potential for product spreading or smearing, and the potential for air emissions, and a justification as to the environmental and economical benefits of the selected recovery method. The product recovery methods proposed may include:

1. Excavation of soil saturated with petroleum or petroleum products into, or below, the water table;

2. Dewatering or groundwater extractions that may influence the depth to the water table; or

3. Air/fluid extraction.

(d) Product recovery as an Interim Source Removal shall be deemed complete when free product has been removed to the maximum extent practicable pursuant to paragraphs 62-770.300(1)(a) and 62-770.300(1)(b), F.A.C.

(e) Within 10 days after initiation of product recovery, the responsible party shall

provide written notification to the Department or to the FDEP local program on Form 62-770.900(1).

(f) Unless a different reporting period is approved pursuant to the provisions of subsection 62-770.800(4), F.A.C., the responsible party shall submit to the Department or to the FDEP local program for review two copies of an annual status report documenting the recovery progress and summarizing all recovery activities.

(g) At petroleum contamination sites eligible for State funding assistance under the Inland Protection Trust Fund where the discharge occurred prior to March 29, 1995, product recovery shall commence in accordance with the ranking established pursuant to Chapter 62-771, F.A.C., and shall be performed pursuant to paragraphs 62-770.300(1)(b) and 62-770.300(1)(c), F.A.C., and pursuant to Section 376.30711, F.S.

(2) Short-term Groundwater Recovery. A short-term groundwater recovery event may be performed as an interim source removal activity. Groundwater recovery from well(s) within the plume with screened intervals that intercept the water table, with the intent of achieving cleanup progress, may be performed prior to Department or FDEP local program approval of a Remedial Action Plan submitted pursuant to Rule 62-770.700, F.A.C., provided the following criteria are met:

(a) The groundwater contamination shall be established to be less than 1/4 acre and confined to shallow aquifer well(s) with screened intervals that intercept the water table, such that the pumping of a shallow aquifer well(s) within the plume may result in the site meeting the No Further Action criteria of Rule 62-770.680, F.A.C., or the Natural Attenuation Monitoring criteria of Rule 62-770.690, F.A.C.;

(b) Free product shall not be present;

(c) The duration of the groundwater recovery shall not exceed 30 days;

(d) The recovered groundwater shall not be treated on-site and shall be properly disposed at a permitted industrial water treatment facility, or at a publicly-owned treatment works with the approval of the sanitary sewer authority; and

(e) Sampling of representative monitoring wells to determine the effectiveness of the Short-term Groundwater Recovery event shall be performed at least 30 days after completion of the groundwater recovery.

(3) Soil Removal, Treatment, and Disposal.

(a) If contaminated soil exists at a site, excavation of contaminated soil for proper treatment or proper disposal may be performed. Consistent with the goals set forth in Section 403.061(33), F.S., the Department encourages treatment over disposal options to address contaminated soil. The treatment or disposal of contaminated soil may be performed prior to Department or FDEP local program approval of a Remedial Action Plan submitted pursuant to Rule 62-770.700, F.A.C., provided the following criteria are met:

1. Contamination shall not be spread into previously uncontaminated or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

2. Flammable products shall be handled in a safe manner;

3. When a soil vacuum extraction system is necessary to abate an imminent threat to human life, health, safety, or welfare within a structure or utility conduit, then the vacuum extraction system shall be designed and operated only to abate the imminent threat. The Department or the FDEP local program shall be notified, within 24 hours, of the imminent threat and the intent to use a soil vacuum extraction system. The air emissions monitoring and frequency of monitoring shall be performed pursuant to

paragraphs 62-770.700(5)(a) and 62-770.700(11)(i), F.A.C.;

4. If one of the objectives of the interim source removal is to excavate all the contaminated soil, confirmatory soil samples shall be collected at the bottom of the excavation (unless the bottom is below the water table) and walls or perimeter of the excavation;

5. When excavated soil is temporarily stored or stockpiled on-site, the soil shall be placed on an impermeable surface to prevent leachate infiltration and secured in a manner that prevents human exposure to contaminated soil and prevents soil exposure to precipitation that may cause surface runoff, and any excavation shall be secured to prevent entry by the public. Excavated contaminated soil (including excessively contaminated soil) may be returned to the original excavation when petroleum storage tank systems have been removed or replaced, or if contaminated soil was encountered during construction activities, to be addressed pursuant to Rule 62-770.700, F.A.C.; and

6. Excavated contaminated soil (including excessively contaminated soil) shall not be stored or stockpiled on-site for more than 60 days, unless it is stockpiled on a right-of-way, in which case it shall be removed for proper treatment or proper disposal as soon as practical but no later than 30 days after excavation, or unless it is being land farmed pursuant to paragraph 62-770.300(3)(b), F.A.C., at which time the soil shall be returned to the original excavation, or removed and properly treated or properly disposed. Contaminated soil (including excessively contaminated soil) may be containerized in water tight drums and stored on-site for 90 days, after which time proper treatment or proper disposal of the contaminated soil shall occur, or it may be land farmed pursuant to paragraph 62-770.300(3)(b), F.A.C.

(b) Land farming of contaminated soil is allowed, provided the land farming operation is located on the same property as the source of contaminated soil unless it is land farmed at a permitted stationary facility. The following criteria shall be met for contaminated soil land farmed on the source property:

1. The land farm operation shall be at least 200 feet from any residence, school, or park;

2. An area large enough to spread the soil to a thickness of 6 to 12 inches shall be available;

3. The land farming area shall be secured in a manner that prevents entry by the public and prevents human exposure to contaminated soil;

4. The materials used to construct the land farm treatment area shall withstand the rigors of the land farming and weather;

5. The land farmed soil shall be placed over an impermeable liner or surface, and surrounded at all times by an impermeable liner supported by berms;

6. The land farmed soil shall be tilled at least biweekly;

7. The land farmed soil shall be covered when not being tilled to prevent water from entering or leaving the area;

8. A monitoring and sampling program shall be established to evaluate the effectiveness of the land farming operation and the effect on the environment, including monitoring of groundwater to confirm leaching is not occurring and of off gas emissions for air regulatory compliance. Before the land farming operation commences, the responsible party shall submit to the Department or to the FDEP local program the monitoring and sampling program, design specifications of the treatment area, and types and amounts of any proposed additives to the soil, to demonstrate that the objectives of this subparagraph will be met. Prior approval is not required for quantities

less than 20 cubic yards, but the design specifications and results of the monitoring and sampling program shall be submitted in the Interim Source Removal Report;

9. Land farming of soil is limited to 180 days, at the end of which time proper disposal is required except if written approval pursuant to the provisions of subsection 62-770.800(4), F.A.C., to exceed this time frame, is obtained from the Department or from the FDEP local program; and

10. Land farmed soil that does not exceed the lower of the direct exposure residential CTLs and leachability based on groundwater criteria CTLs specified in Chapter 62-777, F.A.C., Table II may be disposed on-site or off-site. Responsible parties are advised that other federal or local laws and regulations may apply to these activities. Land farmed soil that exceeds the applicable CTLs specified in Chapter 62-777, F.A.C., Table II shall not be disposed or returned to the original excavation without obtaining approval from the Department or from the FDEP local program, pursuant to the provisions of Rule 62-770.890, F.A.C.

(c) Soil treatment, storage, or disposal techniques not authorized by applicable rules of the Department, or in paragraph 62-770.300(3)(b), F.A.C., require approval in a Remedial Action Plan submitted pursuant to Rule 62-770.700, F.A.C.

(d) At petroleum contamination sites eligible for State funding assistance under the Inland Protection Trust Fund, soil removal for treatment or disposal, if warranted and cost-effective, shall commence in accordance with the ranking established pursuant to Chapter 62-771, F.A.C., and shall be performed in accordance with the Department's preapproval program procedures pursuant to a preapproval agreement.

(4) Authorizations. Authorization or receipt of approval pursuant to Rule 62-770.300, F.A.C., does not relieve the responsible party from the obligation to comply with other Department rules (for example, Chapters 62-701 and 62-730, F.A.C.) for product recovery, product disposal, groundwater recovery, or the handling, storage, disposal, or treatment of contaminated media. Responsible parties are advised that other federal or local laws and regulations may apply to these activities.

(5) Interim Source Removal Report.

(a) Within 60 days of completion of interim source removal activities, the responsible party shall submit to the Department or to the FDEP local program for review two copies of an Interim Source Removal Report. If analytical results obtained pursuant to paragraph 62-770.300(2)(e), F.A.C., and subparagraphs 62-770.300(3)(a)4. and 62-770.600(4)(m)3., F.A.C., as applicable, after completion of the interim source removal, demonstrate that the applicable No Further Action criteria of subsection 62-770.680(1), F.A.C., are met, a Site Assessment Report pursuant to subsection 62-770.600(7), F.A.C., may be submitted in lieu of the Interim Source Removal Report.

(b) Unless otherwise specified in a preapproval agreement, the Interim Source Removal Report shall contain the following information in detail, as applicable:

1. The volume of product that was discharged, if known;
2. The volume of free product and the volume of groundwater recovered;
3. The volume of contaminated soil excavated and treated or properly disposed;
4. The disposal or recycling methods for free product and contaminated soil;
5. The disposal methods for other contaminated media and any investigation-derived waste;
6. A scaled site map (including a graphical representation of the scale used) that shows the location(s) where free product and groundwater were recovered, the area of soil removed, and the approximate locations where all samples were collected;

7. A table that summarizes free product thickness in each monitoring well or piezometer, the total depth and screened interval of each monitoring well or piezometer, and the dates the measurements were made;

8. The type of field screening instrument, analytical methods, or other methods used;

9. The dimensions of the excavation(s) and location(s), integrity, capacities, and last known contents of storage tanks, integral piping, dispensers, or appurtenances removed;

10. The dimensions of the excavation(s) and location(s) and capacities of replacement underground storage tanks;

11. A table that indicates the identification, depth, and field soil screening results of each sample collected;

12. Separate tables by medium that summarize all available soil and groundwater analytical results, detection limits achieved for non-detected analytes, and analyses performed (listing all contaminants analyzed and their corresponding CTLs);

13. Depth to groundwater at the time of each excavation, measurement locations, and method used to obtain that information;

14. Type of petroleum or petroleum products discharged and a determination, if possible, of how the product was released;

15. A scaled site map (including a graphical representation of the scale used) that shows the locations and results of confirmatory soil samples, in relation to the area of soil removal;

16. Documentation or certification that confirms the proper treatment or proper disposal of the free product, contaminated groundwater, or contaminated soil, including disposal manifests for free product, a copy of the documentation or certification of treatment or acceptance of the contaminated soil, and results of analyses, if performed; and

17. For land farmed soil, a copy of the pre-treatment and post-treatment analytical results.

(c) Within 60 days of receipt of an Interim Source Removal Report, the Department or the FDEP local program shall:

1. Provide the responsible party with written approval of the Interim Source Removal Report submitted pursuant to the criteria of paragraph 62-770.300(5)(b), F.A.C.; or

2. Notify the responsible party in writing, stating the reason(s) why the Interim Source Removal Report does not conform with the applicable Interim Source Removal criteria of paragraph 62-770.300(5)(b), F.A.C.

(6) If the Interim Source Removal Report is incomplete in any respect, or is insufficient to satisfy the criteria of paragraph 62-770.300(5)(b), F.A.C., the Department or the FDEP local program shall inform the responsible party pursuant to subparagraph 62-770.300(5)(c)2., F.A.C., and the responsible party shall submit to the Department or to the FDEP local program for review two copies of an Interim Source Removal Report Addendum that addresses the deficiencies within 60 days after receipt of the notice.

(7) If the interim source removal is performed after submittal of the Site Assessment Report, the responsible party shall submit to the Department or to the FDEP local program for review two copies of a Site Assessment Report Addendum that updates the Site Assessment Report by summarizing the interim source removal activities and all sampling results obtained after submittal of the Site Assessment Report, and that includes a recommendation pursuant to paragraph 62-770.600(8)(b), F.A.C.

COUNTY: Palm Beach

PROJECT: Permit Application

RE: Application for a Waste Tire Processing Facility Permit
Second Request for Information

Facility Location: 857½ Old Belle Glade Rd, Palm Beach County, Florida, 33476

Dear Mr. Perez:

The Florida Department of Health Palm Beach County (DOH) has reviewed the additional information and the revised permit application received on April 23, 2015. As discussed during the meeting at the Department of Health Palm Beach County on May 18, 2015, additional information is still needed to complete your application. Further evaluation of your proposed project will be on hold until all the information requested below has been received by the DOH. **In order to expedite the application review and avoid additional requests for information, please provide a detailed written response to each item below. If you believe an item does not apply, please state so and explain why. A copy of the request for information issued to the facility on April 02, 2015 is attached.**

Please provide the following information promptly in order to complete the review of your application pursuant to Chapters 120 and 403, Florida Statutes (F.S.) and Florida Administrative Code (F.A.C.) Rules 62-4.055, 62-701, and 62-709.

1. Please submit written responses to the following questions/requests included in the Department's April 2, 2015 request for information:
 - a. During a site visit conducted by Mr. Jorge Patino on April 1, 2015, Mr. Emilio Perez indicated that the Applicant and owner of Forever Recycling, LLC is his son, Mr. Emilio Perez, Jr. The application submitted indicates Mr. Emilio Perez as the Applicant and was signed by Emilio Perez/Owner. Please revise the application to show the full legal name of the Applicant and signatory. Also, please describe Mr. Emilio Perez's (father of Mr. Emilio Perez, Jr.) role in Forever Recycling, LLC.
 - b. DOH is in receipt of correspondence dated February 5, 2015 signed by Mr. Daniel Casey and Mr. Emilio Perez, Jr. and witnessed by Ms. Sara Perez. According to this correspondence, Mr. Casey resigned as a member of Forever Recycling, LLC and Mr. Emilio Perez, Jr. is the new registered agent and managing member. A search of the Florida Department of State Division of Corporations website on April 2, 2015 showed Mr. Casey as the Registered Agent and Authorized Person. Please provide written documentation showing that a formal request has been made to update the corporation's records.
 - c. Question A.7 of the application regarding enforcement actions was answered no, indicating no "enforcement actions taken by the Department against applicant relating to the operation of any solid waste management facility in this state." DOH records indicate that the attached Orders were sent to Mr. Emilio Perez on March 12, 2015 as part of an ongoing enforcement (Case No. SW-01-15) against Forever Recycling, LLC. Please revise the application, if necessary, and provide an explanation of any and all ongoing and/or prior enforcement actions and associated resolutions or proposed actions to resolve ongoing violations.

- d. Please provide all information requested in Part III-Attachments, subparts A through F of the application form in accordance with the specified requirements (see below).

Part III – Attachments:

A. Facility design

NOTE: All maps, plan sheets, drawings, isometrics, cross sections, or aerial photographs shall be legible; be signed and sealed by a registered professional engineer responsible for their preparation; be of appropriate scale to show clearly all required details; be numbered, referenced to narrative, titled, have a legend of symbols used, contain horizontal and vertical scales (where applicable), and specify drafting or origination dates; and use uniform scales as much as possible, contain a north arrow and use NGVD for all elevations.

1. A topographic or section map of the facility, including the surrounding area for one mile, no more than one year old, showing land use and zoning within one mile of the facility
2. A plot plan of the facility on a scale of not less than one inch equals 200 feet. At a minimum, the plot plan shall include. (The plan submitted must be drawn to scale and signed and sealed by a professional engineer.)
 - a. The facility design, including the location and size of all storage and processing areas for used tires, unprocessed waste tires, processed waste tires, and waste tire processing residuals. (Please note that dimensions of storage areas must comply with the requirements of 62.711.540)
 - b. All wetlands and water bodies within the facility or within 200 feet of any storage area;
 - c. Stormwater control measures, including ditches, dikes, and other structures;
 - d. Boundaries of the facility, legal boundaries of the land containing the facility, and any easements or rights of way that are within the facility or within 200 feet of any storage area;
 - e. Location, size, and depth of all wells within the facility or within 200 feet of any storage area;
 - f. All structures and buildings that are, or will be, constructed at the facility; include those used in storage and processing operations;
 - g. All areas used for loading and unloading;
 - h. All access roads and internal roads, including fire lanes;
 - i. Location of all fences, gates, and other access control measures; and
 - j. Location of all disposal areas within the facility.

B. Facility operation. (The following items have not been submitted or require additional details)

2. A description of the equipment used for processing tires. This description shall include the make, model, and hourly capacity of each piece of equipment.
5. A description of how the operator will maintain compliance with each of the storage requirements of Rule 62-711.540, F.A.C.
7. A copy of the fire safety survey
8. A description of how 75% of the annual accumulation of waste tires will be removed for disposal or recycling.

D. Attach proof of financial responsibility as requirement by Rule 62-711.500(3) OR a calculation showing that financial assurance documents, currently on file with the Department, are sufficient to assure closing of the waste tire site as well as any other solid waste management facility at that location. (Pursuant to Rule 62-711.500(3), the cost estimate shall be the amount that would be expended to remove, process, and dispose of waste tires on the site and to close the site. The costs shall be based on a third party, who is not a subsidiary or parent company, performing the work, reported on a per unit basis. Quantity estimates shall be certified by a Professional Engineer.) Please contact Mr. Tor Belnar of the Department of Environmental Protection (DEP) at 850-245-8743 regarding financial instrument. Please submit the cost estimates to our office using the attached form.

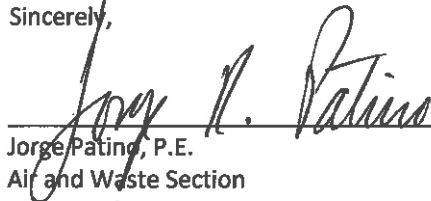

- E. A letter from the land owner (if different from applicant) authorizing use of the land as a waste tire processing facility.*

Note that all submittals must be signed and sealed by a professional engineer (as required), licensed in the State of Florida.

The Health Department must receive a response from you within ninety (90) days of receipt of this letter, unless you (the applicant) request additional time under Rule 62-4.055(1), F.A.C. Failure of an applicant to provide the timely requested information by the applicable deadline shall result in denial of the application.

If you have any questions, please contact me at 561-837-5936. When referring to this project, please use the project number indicated.

Sincerely,

Jorge Patino, P.E.

Project No.: 333423-001-WT

COUNTY: Palm Beach

PROJECT: Permit Application

RE: Application for a Waste Tire Processing Facility Permit

Facility Location: 857½ Old Belle Glade Rd, Palm Beach County, Florida, 33476

Dear Mr. Perez:

The Florida Department of Health Palm Beach County (DOH) has reviewed the referenced permit application, received on 03/01/2015 (correct fee received 03/18/2015), and have determined that additional information is needed to complete your application. Further evaluation of your proposed project will be on hold until all the information requested below has been received by the DOH.

Please provide the following information promptly in order to complete the review of your application pursuant to Chapters 120 and 403, Florida Statutes (F.S.) and Florida Administrative Code (F.A.C.) Rules 62-4.055, 62-701, and 62-709.

1. During a site visit conducted by Mr. Jorge Patino on April 1, 2015, Mr. Emilio Perez indicated that the Applicant and owner of Forever Recycling, LLC is his son, Mr. Emilio Perez, Jr. The application submitted indicates Mr. Emilio Perez as the Applicant and was signed by Emilio Perez/Owner. Please revise the application to show the full legal name of the Applicant and signatory. Also, please describe Mr. Emilio Perez's (father of Mr. Emilio Perez, Jr.) role in Forever Recycling, LLC.
2. DOH is in receipt of correspondence dated February 5, 2015 signed by Mr. Daniel Casey and Mr. Emilio Perez, Jr. and witnessed by Ms. Sara Perez. According to this correspondence, Mr. Casey resigned as a member of Forever Recycling, LLC and Mr. Emilio Perez, Jr. is the new registered agent and managing member. A search of the Florida Department of State Division of Corporations website on April 2, 2015 showed Mr. Casey as the Registered Agent and Authorized Person. Please provide written documentation showing that a formal request has been made to update the corporation's records.
3. Question A.7 of the application regarding enforcement actions was answered no, indicating no "enforcement actions taken by the Department against applicant relating to the operation of any solid waste management facility in this state." DOH records indicate that the attached Orders were sent to Mr. Emilio Perez on March 12, 2015 as part of an ongoing enforcement (Case No. SW-01-15) against Forever Recycling, LLC. Please revise the application, if necessary, and provide an explanation of any and all ongoing and/or prior enforcement actions and associated resolutions or proposed actions to resolve ongoing violations.
4. Please provide all information requested in Part III-Attachments, subparts A through F of the application form in accordance with the specified requirements (see below).

PREHEARING CONFERENCE PROCEDURES

The following procedures shall be followed in all matters set to be heard by the Palm Beach County Environmental Control Hearing Board:

- A. Parties are encouraged to communicate prior to the date of the Prehearing Conference to:
 - 1. Discuss compliance.
 - 2. Discuss settlement/stipulation and civil fines.

- B. The Prehearing Conference is held one week prior to Hearing to:
 - 1. Discuss, simplify, and stipulate to as many facts and issues as possible, including:
 - (a) Ownership or control of the subject property.
 - (b) Codes alleged to have been violated.
 - (c) All stipulated facts.
 - (d) Facts at issue.
 - (e) Issues as to the application and interpretation of laws cited.
 - 2. Discuss possible prehearing settlement/stipulation.

- C. Absent stipulation, disclosure of the following shall be made at the Prehearing Conference:
 - 1. Physical evidence to be used in the Hearing and objections, if any, of opposing party.
 - 2. Any and all witnesses to be presented and give testimony at the Hearing.

- D. Unless otherwise mutually agreed to by both parties, at the Hearing parties shall be limited to exhibits produced, objections reserved, and witnesses disclosed pursuant to Paragraph C, above.

Case No. SW-01-15

ORDER TO SHOW CAUSE
AND
NOTICE OF HEARING

The Acting Environmental Control Officer having filed a Notice of Failure To Comply With A Notice Of Violation, the Palm Beach County Environmental Control Hearing Board hereby orders, **FOREVER RECYCLING, LLC**, ("Respondent"), owner of the property located at 857 1/2 Old Belle Glade Road 441, Pahokee, FL 33476, to appear before it at 800 Clematis Street, Conference Room 112, West Palm Beach, Florida at 9:00 a.m., on Thursday, April 23, 2015 to show cause why it should not be held in violation of Chapter 77-616, Laws of Florida, as amended, ("The Environmental Control Act"); Chapter 11 of the Palm Beach County Code (Ordinance 78-5, as amended); and, more specifically, the following section(s) of the Florida Administrative Code governing Solid Waste for the violation(s) cited below and as set forth in the attached Notice of Failure To Comply With A Notice Of Violation, and further to show cause why it should not be ordered to pay civil fines and take such preventive or corrective action as this Board may deem just and proper:

62-701.300(1)(a) F.A.C., Prohibitions: (1) General prohibition. (a) No person shall store, process, or dispose of solid waste except as authorized at a permitted solid waste management facility or a facility exempt from permitting under this chapter; to wit: On October 27, 2014, December 1, 2014, and February 19, 2015, Health Department Inspectors observed solid waste

being stored by Forever Recycling, LLC, at 857 1/2 Old Belle Glade Road 441, Pahokee, FL; and

62-709.320(2)(a)2, F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation.

Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 2. Dust and litter control methods; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control dust and litter; and

62-709.320(2)(a)3.a., F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation. Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 3. Fire protection and control provisions to deal with accidental burning of solid waste, including a. There shall be an all-weather access road, at least 20 feet wide, all around the perimeter of the site; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to maintain a 20 ft all-weather access road all around the perimeter of its yard trash recycling site; and

62-709.320(2)(b), F.A.C., (2) Design and Operating Requirements....(b) The facility shall be operated in a manner to control vectors; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control vectors; and

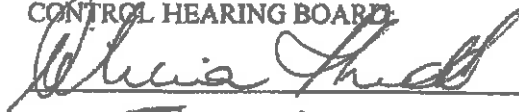

62-711.400(1), F.A.C., Waste Tire Prohibitions. (1) No person may maintain a waste tire site unless such site is an integral part of a permitted waste tire processing facility, except as provided in Rule 62-711.500, F.A.C. For the purpose of this rule, "an integral part of a waste tire processing facility" means the waste tire site is on the same property as the processing facility; to wit: On February 19, 2015, a Health Department inspector observed more than 1500 waste tires being stored onsite at 857 1/2 Old Belle Glade Road 441, Pahokee, FL.

A copy of the Notice of Failure To Comply With A Notice Of Violation is attached hereto and made a part hereof.

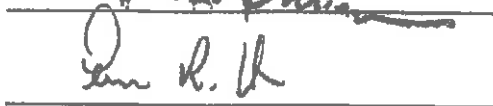

The proceeding is and shall be governed by Palm Beach County Code Section 11-21, as amended (Ordinance No. 78-5, as amended) and the Environmental Control Act.

ORDERED at West Palm Beach, Florida, this 12th day of March, 2015.

ENVIRONMENTAL CONTROL HEARING BOARD
West Palm Beach, Florida**

FLORIDA DEPARTMENT OF HEALTH
IN PALM BEACH COUNTY

Petitioner,

vs.

FOREVER RECYCLING, LLC,

Respondent.

Case No. SW-01-15

NOTICE OF FAILURE TO COMPLY WITH A NOTICE OF VIOLATION

Pursuant to Chapter 77-616, Laws of Florida, as amended ("The Environmental Control Act"), this notice is filed with the Palm Beach County Environmental Control Hearing Board ("Hearing Board") to invoke its jurisdiction over Respondent, **FOREVER RECYCLING, LLC**, owner of the property located at 857 1/2 Old Belle Glade Road 441, Pahokee, FL 33476, and in support thereof the Acting Environmental Control Officer of the Florida Department of Health in Palm Beach County states:

1. Respondent has violated the Environmental Control Act; Chapter 11 of the Palm Beach County Code (Ordinance 78-5, as amended); and, more specifically, the following section(s) of the Florida Administrative Code governing Solid Waste for the violation(s) cited below and as set forth in the attached copy of a Notice issued by an authorized representative of the Florida Department of Health in Palm Beach County. Said Notice is hereby made and shall be considered a part hereof:

62-701.300(1)(a) F.A.C., Prohibitions: (1) General prohibition. (a) No person shall store, process, or dispose of solid waste except as authorized at a permitted solid waste management facility or a facility exempt from permitting under this chapter; to wit: On October 27, 2014, December 1, 2014, and February 19, 2015. Health Department Inspectors observed solid waste

being stored by Forever Recycling, LLC, at 857 1/2 Old Belle Glade Road 441, Pahokee, FL; and

62-709.320(2)(a)2, F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation. Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 2. Dust and litter control methods; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control dust and litter; and

62-709.320(2)(a)3.a., F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation. Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 3. Fire protection and control provisions to deal with accidental burning of solid waste, including a. There shall be an all-weather access road, at least 20 feet wide, all around the perimeter of the site; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to maintain a 20 ft all-weather access road all around the perimeter of its yard trash recycling site; and

62-709.320(2)(b), F.A.C., (2) Design and Operating Requirements....(b) The facility shall be operated in a manner to control vectors; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control vectors; and

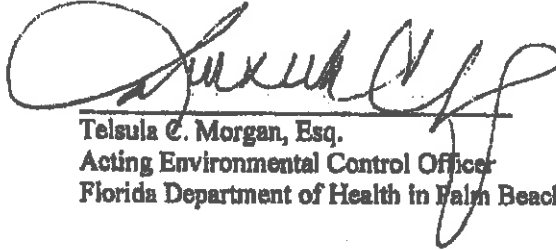

62-711.400(1), F.A.C., Waste Tire Prohibitions. (1) No person may maintain a waste tire site unless such site is an integral part of a permitted waste tire processing facility, except as provided in Rule 62-711.500, F.A.C. For the purpose of this rule, "an integral part of a waste tire processing facility" means the waste tire site is on the same property as the processing facility; to

wit: On February 19, 2015, a Health Department inspector observed more than 1500 waste tires being stored onsite at 857 1/2 Old Belle Glade Road 441, Pahokee, FL.

2. The violation described herein constitutes failure to comply with a Notice of Violation and may result in a fine of up to \$500.00 per day for each day of the violation.

The undersigned Acting Environmental Control Officer respectfully requests the Hearing Board issue an order setting a hearing for the Board's next scheduled meeting date.

DATED this 9th day of March, 2015.

Telsula C. Morgan, Esq.
Acting Environmental Control Officer
Florida Department of Health in Palm Beach County

DEP Form # 62-701.900(23)

Form Title: Waste Tire Processing
Facility Permit Application

Effective Date: January 6, 2010

Incorporated in Rule 62-711.530(6)

Waste Tire Processing Facility Permit Application

Permit No. _____

Renewal ☐ Modification ☐ Existing unpermitted facility ☐ Proposed new facility ☒

Part I-General Information:

A. Applicant Information:

1. Applicant Name: Emilio Perez G
2. Applicant Street Address: 246 East Main Street
3. City: Pahokee County: Palm Beach Zip: 33476
4. Applicant Mailing Address: 246 East Main Street
5. City: Pahokee County: Palm Beach Zip: 33476
6. Contact person: Emilio Phone: (561) 924-9250 FEID No: _____
7. Have any enforcement actions been taken by the Department against the applicant relating to the operation of any solid waste management facility in this state? This includes any Complaint, Notice of Violation, or revocation of a permit or registration, as well as any Consent Order in which a violation of Department rules is admitted. It does not include a Warning Letter, Warning Notice, Notice of Noncompliance, or other similar document which does not constitute agency action.
Yes ☐ No ☒ If yes, attach a history and description of the enforcement actions.

B. Facility Information:

1. Facility Name: Forever Recycling
2. Facility Street Address (Main Entrance): 857 1/2 Old Belle Glade Rd
3. City: Pahokee County: Palm Beach Zip: 33476
4. Facility Mailing Address: 246 East Main Street
5. City: Pahokee State: FL Zip: 33476
6. Contact Person: Emilio G PEREZ Phone: (561) 924-9250
7. Facility Location Coordinates:
Section: 20 Township: 42 Range: 37
Latitude: _____ Longitude: _____
8. Anticipated date for starting construction _____ and for completion of construction _____
9. Anticipated date for receipt of tires 2/1/2015 and for start of processing 3/1/2015

C. Land Owner Information (if different from applicant):

1. Owner's name: Perez Investments, Inc.
2. Land owner's mailing address: 246 East Main Street
3. City: Pahokee State: FL Zip: 33476
4. Authorized Agent: Emilio Perez Agent's phone (561) 924-9250
5. Current lease expires: _____

D. Facility Operator Information (if different from applicant):

1. Operator's name: SAA
2. Operator's mailing address: _____
3. City: _____ State: _____ Zip: _____
4. Contact person: _____ Phone: () _____

E. Preparer of Application:

1. Name of person preparing application: Sara Perez
2. Mailing address: 246 East Main Street
3. City: Pahokee State: FL Zip: 33476
4. Phone: (561) 924-9250
5. Affiliation with facility: Supervisor

Part II-Operations:

A. Facility type (check appropriate box):

- ☒ Waste tire processing facility.
- ☐ Waste tire processing facility with on-site disposal of processed tires or processing residuals.
- ☐ Waste tire processing facility with on-site consumption of waste tires or processing residuals.
- ☐ Permitted solid waste management facility modification to allow waste tire site and processing.

B. Type of processing facility (check as many as apply):

- ☒ Shredder ☐ Cutter ☐ Chopper ☐ Incinerator only ☐ Incinerator with energy recovery
- ☐ Pyrolysis ☐ Supplemental fuel user ☐ Other, explain Tire Bundling and Transport for fuel

C. Storage: Indicate the maximum quantities of whole waste tires, processed waste tires, and processing residuals, expressed in tons, to be stored at the facility, in accordance with Rule 62-711.530(2), F.A.C.

| | Outdoor Storage(tons) | Outdoor Storage (sq.ft) | Indoor Storage (tons) | Indoor Storage (sq.ft) | Total Storage (tons) |
|-----------------------|--------------------------|----------------------------|--------------------------|---------------------------|-------------------------|
| Whole waste tires: | <u>250 tons</u> | <u>9,000</u> | _____ | _____ | _____ |
| Processed tires: | <u>0</u> | <u>0</u> | _____ | _____ | _____ |
| Processing residuals: | <u>0</u> | <u>0</u> | _____ | _____ | _____ |
| TOTALS: | <u>350 tons</u> | <u>9,000</u> | _____ | _____ | _____ |

- D. For reporting quantity of tires in tons, tires will be: weighed on site ☐ weighed off site ☒
weights will be calculated ☐
- E. Facilities that will not be disposing of processed tires or processing residual on the facility site must indicate the permitted solid waste management facility where processed tires or residuals will be disposed.

1. Name of facility Wheelabrator Ridge Energy

2. Street address: 3131 K-Ville Ave

3. City: Auburndale County: Polk County Zip: 33823

- F. Facilities that will be delivering processed tires to consuming facilities must describe the existing or proposed markets for those processed tires.
- _____
- _____
- _____

Part III-Attachments:

A. Facility design

NOTE: All maps, plan sheets, drawings, isometrics, cross sections, or aerial photographs shall be legible; be signed and sealed by a registered professional engineer responsible for their preparation; be of appropriate scale to show clearly all required details; be numbered, referenced to narrative, titled, have a legend of symbols used, contain horizontal and vertical scales (where applicable), and specify drafting or origination dates; and use uniform scales as much as possible, contain a north arrow and use NGVD for all elevations.

1. A topographic or section map of the facility, including the surrounding area for one mile, no more than one year old, showing land use and zoning within one mile of the facility
2. A plot plan of the facility on a scale of not less than one inch equals 200 feet. At a minimum, the plot plan shall include
 - a. The facility design, including the location and size of all storage and processing areas for used tires, unprocessed waste tires, processed waste tires, and waste tire processing residuals;
 - b. All wetlands and water bodies within the facility or within 200 feet of any storage area;
 - c. Stormwater control measures, including ditches, dikes, and other structures;
 - d. Boundaries of the facility, legal boundaries of the land containing the facility, and any easements or rights of way that are within the facility or within 200 feet of any storage area;
 - e. Location, size, and depth of all wells within the facility or within 200 feet of any storage area;
 - f. All structures and buildings that are, or will be, constructed at the facility; include those used in storage and processing operations;
 - g. All areas used for loading and unloading;
 - h. All access roads and internal roads, including fire lanes;
 - i. Location of all fences, gates, and other access control measures; and
 - j. Location of all disposal areas within the facility.

B. Facility operation.

1. A description of the facility's operation, process and products including how waste tires will be received and stored.
2. A description of the equipment used for processing tires. This description shall include the make, model, and hourly capacity of each piece of equipment.
3. Description of the waste from the process, the amount of waste expected and how and where this waste will be disposed of.
4. Statement of the maximum daily throughput and the planned daily and annual throughput.
5. A description of how the operator will maintain compliance with each of the storage requirements of Rule 62 - 711.540, F.A.C.
6. A copy of the emergency preparedness manual for the facility with a statement of the on site and off site locations where that manual will be maintained.
7. A copy of the fire safety survey
8. A description of how 75% of the annual accumulation of waste tires will be removed for disposal or recycling.

- C. Completed closing plan for the facility as required by Rule 62-711.700(2) and (3), F.A.C.

- D. Attach proof of financial responsibility as requirement by Rule 62-711.500(3) OR a calculation showing that financial assurance documents, currently on file with the Department, are sufficient to assure closing of the waste tire site as well as any other solid waste management facility at that location.
- E. A letter from the land owner (if different from applicant) authorizing use of the land as a waste tire processing facility.
- F. If waste tires will be consumed or disposed of at the facility, attach a description of the other environmental permits that the applicant has for this use, including, permit number, date of issue, and name of issuing agency
- G. The permit fee as required in Rule 62-4, F.A.C.

Part IV-Certification:**A. Applicant:**

The undersigned applicant or authorized representative of Forever Recycling
is aware that statements made in this form and attached information are an application for a
Waste Tire Processing Permit from the Florida Department of Environmental Protection and certifies that
The information in this application is true, correct and complete to the best of his knowledge and belief.
Further, the undersigned agrees to comply with the provisions of Chapter 403, Florida Statutes, and all rules and
regulations of the Department. It is understood that the Department will be notified prior to the sale or legal transfer
of the facility.

Signature of Applicant or Authorized Agent

Forever Recycling

857 ½ Old Belle Glade Road

Pahokee FL, 33476

Estimate of Site Closure Costs

Amount of tires stored on site: 350 Tons

Number of Trailers to Haul Tires: $14 \times 25 \text{ Tons} = 350 \text{ Tons}$

Cost to haul per trailer: \$200.00

Total Hauling Cost $\$200.00/\text{Trailer} \times 14 \text{ Trailers} = \$2,800.00$

Total Cost = \$2,800.00

Closing Plan
For
Forever Recycling
(Tire Processing Facility)
Located at
857 ½ Old Belle Glade Road
Pahokee Fl, 33476

1. Notification of closing

- a) Post a sign at the front access gate indicating the site is closed. The notice is to show the phone number of the Solid Waste Authority of Palm Beach County 561-687-1100
- b) Contact the Florida Department of Environmental Protection and the Palm Beach County Health Department to notify them of the site closing.

Florida Dpt. Of Environmental Protection
400 North Congress Avenue
West Palm Beach, Florida 33401
561-681-6667

Palm Beach County Health Department
800 Clematis Street, 4th Floor
West Palm Beach, Florida 33402

2. Secure Site
 - a) Stop public access to the site.
 - b) Verify all access to property is operable and locked. As required
3. Remove Solid Waste
 - a) Transport all waste tires and residuals to the Solid Waste Authority of Palm Beach County's Jog Rd site for disposal. Retain the disposal receipts.
 - b) Remove any other solid waste to a permitted facility.
4. Environmental Site Assessment
 - a) After the tires have been removed from the site, conduct an environmental site assessment. Either a professional engineer or professional geologist, licensed in the State of Florida, shall conduct this assessment.
 - b) The assessment shall include examination of potential soil contamination, groundwater quality, and surface water quality.
 - c) The professional that examined the site shall prepare a report documenting the findings.
 - d) If it is determined that there is a site contamination, a more detailed investigation shall be conducted.
 - e) If contamination is detected, remediation will be required.
5. Final Notification
 - a) Notify the Florida Department of Environmental Protection and Palm Beach County Health Department when closing is complete.
 - b) The site is to be closed within 30 days of the last date of tire recycling activities.

857 ½ Old Belle Glade Road Pahokee FL 33476

Forever Recycling

Facility Operation

857 ½ Old Belle Glade Road

Pahokee FL 33476

Tel: 561-924-9250

Fax: 561-924-9252

1. Purpose of the Facility

The purpose of this facility is to reduce waste tires. Tire Baling reduces the space.

2. Capacity

- a) Weight of tires Received Each Day: 70 Tons
- b) Weight of tires Processed Each Day: 70 Tons
- c) Tire Storage 350 Tons

3. Source and Type of Materials

- a) Waste tires from retail and commercial tire stores.

4. Equipment

Tire Baler

5. Operation

- a) Operating Hours are Monday through Friday, 8:00 AM to 5:00 PM
- b) Waste Tires are delivered to the site and dropped off at the designated drop-off area.

- c) Tires are sorted by staff into two groups:
 - I. Tires for Baling
 - II. Tires for resale
- d) Tires for resale are placed into tire racks.
- e) Tires that are baled are loaded into a container.
- f) Container filled with bale tires is picked up to delivery destination.

6. Vehicle Traffic Control And Unloading

- a) Signage shall be clearly posted to direct all incoming Waste Tire Traffic to the waste tire unloading area.
- b) Signage shall be clearly posted that will designate the unloading area.
- c) Signage shall be clearly posted that will direct the traffic towards the exit.
- d) Staff shall assist in directing traffic as needed to maintain clearance of the access path and fire lanes.

7. Safety

- a) The surface in the areas where the equipment shall be even and stable.
- b) All onsite workers shall wear the following at all times:
 - I. Long Pants
 - II. T-shirts
 - III. Gloves
 - IV. Glasses
- c) All onsite workers shall wear the following at all times
 - I. Gloves
 - II. Steel toed construction boots.
- d) Location of nearest hospital and emergency numbers shall be posted in a visible location.
- e) Appropriately sized First-Aid kit shall be located in a clearly visible and easily accessible.

8. People Responsible for operation, control, maintenance and training.

a) Reinerio Reina

9. Procedure for controlling Non-Processible Waste

a) Tools such as brooms, rakes, shovels, mops and absorbents will be accessible for use at a location under cover.

b) Waste collection containers with secure covers will be placed in a clearly vision and accessible location under cover.

10. Procedure if prohibited waste is discovered:

a) Use the tools in section 9.a and 9.b as necessary to collect any prohibited waste to prevent contamination.

b) Properly dispose of the prohibited waste once the container reaches the maximum allowable capacity.

11. Environmental Controls

a) Dust Control:

I. During dry conditions, control dust by spraying water on exposed soil areas.

b) Noise Control:

I. Limit truck movement and equipment operation to the daylight hours

c) Litter Control:

I. Before leaving the site at the end of each working day, pick up litter and place in a trash receptacle.

d) Vector Control:

I. Cover tire piles with plastic sheets or other impermeable barrier in order to prevent the entrapment of water.

II. Chemical treat to eliminate vector breeding.

12. Security Plan

- a) The gates are to be locked at all times when there is nobody present on site.

13. In House training program

- a) Employees will be trained in the proper operation of the machinery and emergency procedures.

EMERGENCY PREPAREDNESS MANUAL

For

Forever Recycling

857 ½ Old Belle Glade Road

Pahokee FL 33476

Tel: 561-924-9250

1.0 INTRODUCTION

This document is intended for the use of the Site Operator for the Forever Recycling whose facilities are located at 857 ½ Old Belle Glade Road, Pahokee, Florida. The procedures contained in the manual shall be followed in the event of an emergency which poses a threat to the public health or the environment, including fire, flood or other emergencies.

A copy of this manual shall be kept on the site at all times. A second copy of this manual shall be kept at an off-site location designated by the operator. This manual shall be updated at least once a year and upon changes in operations at the site.

Location of off-site manual:

3.0 ON-SITE EMERGENCY RESPONSE EQUIPMENT

- 3.1 First Aid Kits**
- 3.2 Eye flushing station**
- 3.3 Safety Equipment**
- 3.4 Each fuel-fired vehicle operating at the site shall be equipped with at least one portable fire extinguisher with a U/L rating of 2A10BC or higher.**
- 3.5 Earth moving equipment**
 - 3.5.1 Shovels**
 - 3.5.2 Picks**
 - 3.5.3 Rakes**
 - 3.5.4 Brooms**
 - 3.5.5 Forklift**
- 3.6 25 pound bags of granular absorbent material**
- 3.7 Universal spill containment kit**
- 3.8 Domestic Potable Water Supply**
- 3.9 The nearest fire hydrant is located 225 feet from the building (See Attachment "A").**

4.0 FIRE PREVENTION PRACTICES

- 4.1. Exit doors are to remain clear at all times.
- 4.2. Aisles are to remain clear at all times.
- 4.3. Report damaged fire safety equipment to building maintenance.
- 4.4. Know the locations of all exits.
- 4.5. No open flame devices allowed in buildings.
- 4.6. Flammable gases are not to be stored in buildings.
- 4.7. Turn electrical appliances off when not in use.
- 4.8. Report unusual odors or smoke immediately.
- 4.9. Do not tamper with any fire safety equipment.
- 4.10. Storage is only allowed in approved storage areas.
- 4.11. Do not place any items on any stairs.
- 4.12. Extension cords are not to be used as permanent wiring.
- 4.13. Damaged electrical cords or appliances shall not be used.
- 4.14. Do not overload electrical outlets.
- 4.15. All fires are to be reported, even if extinguished.
- 4.16. Participate in fire drills and employee training.
- 4.17. Electrical work is to be performed by licensed individuals.

5.0 PROCEDURES IN THE EVENT OF FIRE

- 5.1 Contact 911 to report the emergency.
- 5.2 Alert all on-site personnel of the fire and direct them to a safe area away from the fire and smoke.
- 5.3 Shut off any equipment involved in the fire.
- 5.4 Move portable fuel containers and other flammable items a safe distance away from the fire.

- 5.5 If the fire is controllable, attempt to contain and extinguish the fire using the on-site emergency response equipment.
- 5.6 Notify the Facility Operations Manager.
- 5.7 Notify the Florida Department of Environmental Protection and Palm Beach County Health Department if the fire poses a threat to the public health or the environment.
- 5.8 Upon approval of the Facility Operations Manager and Fire Marshal, initiate procedures to cleanup the site. Contain and dispose of all materials generated by the fire, including the oily material from burned tires as follows:
 - 5.8.1 Identify burned materials and delineate the burn area with caution tape.
 - 5.8.2 Remove unburned/salvageable materials from the burn area and return unburned tires to the tire storage piles.
 - 5.8.3 Conduct Emergency Response Action or Interim Source Removal procedures in accordance with Rule 62-780.500 F.A.C. (see Attachment B) within 24 hours of discovering a situation that threatens human health, public safety, or the environment. Depending on the degree of severity, an independent contractor specializing in source removal may need to be hired (see Emergency Contacts).
 - 5.8.4 If petroleum was released/ spilled, conduct cleanup procedures in accordance with Rule 62-770 F.A.C. Rule does not apply to any discharge of petroleum or petroleum products of less than 25 gallons onto a pervious surface, as long as the discharge is removed and properly treated or properly disposed, or otherwise remediated in accordance with Rule 62-770.300, F.A.C. (see Attachment C), so that no contamination from the discharge remains on-site.
- 5.9 Within two weeks of the emergency, submit to the Florida Department of Environmental Protection and Palm Beach County Health Department a written report on the emergency. The report shall describe:
 - 5.9.1 The origins of the emergency
 - 5.9.2 The actions taken to deal with the emergency
 - 5.9.3 The results of the action taken
 - 5.9.4 An analysis of the success or failure of the actions

- 5.10 If the fire results in a discharge of contaminants in excess of a "De Minimus Discharge", conduct a Site Assessment in accordance with Rule 62-780 F.A.C. within 60 days of the release of contaminants, and coordinate with the Department of Environmental Protection to develop a Remedial Action Plan for long term recovery of contaminants. A "De Minimus Discharge" is defined in Rule 62-780.200 F.A.C. as a discharge that is removed from the soil, sediment, surface water, and groundwater to cleanup target levels or background concentrations pursuant to subsection 62-780.880(1), F.A.C., within a period of 30 days from the discovery of the discharge.

5.0 CONTINGENCY OPERATIONS

In the event normal operations are disrupted by an emergency, such as fire, proceed as follows until normal operations can be restored:

- 5.1 If the primary tire equipment fails, continue operating the secondary equipment, if desired. Reduce the rate at which waste tires are delivered to the site accordingly. Do not store waste tires beyond the limits of the designated storage areas.
- 5.2 If the waste storage is reduced as a result of fire and shredding equipment remains operational, adjust rate at which waste tires are delivered accordingly. Do not store waste tires beyond the limits of the designated storage areas.
- 5.3 If the tire processing operation is completely suspended for more than 24 hours, discontinue delivery of waste tires to the site and place stored waste tires in designated sealed containers.

6.0 HAZARDS APPROACH

The means of carrying out the responsibility to evaluate, notify and implement the emergency response plan will vary with the type and significance of the emergency. The following serves as a guideline for required actions:

6.1 ACCIDENT

- 6.1.1 Call 911 for assistance
- 6.1.1 Notify Emergency Coordinator or other key personnel
- 6.1.2 Administer first aid ONLY if trained to do so
- 6.1.3 DO NOT attempt to move a seriously injured person

6.2 BOMB THREAT

- 6.2.1 Take all threats seriously
- 6.2.2 Report threats to 911 and notify a supervisor immediately
- 6.2.3 Do not search for a device or touch suspicious objects.
- 6.2.4 If you receive a bomb threat try to note the caller's age, gender and unique speech attributes
- 6.2.5 If a threat is received, try to make note of and describe any suspicious persons in the area
- 6.2.6 Evacuation decisions should remain with local authorities

6.3 TORNADO WATCH / WARNING

Tornado Watch: Tornadoes are possible. Remain alert for approaching storms. Watch the sky and stay tuned to NOAA Weather Radio, commercial radio, or television for information.

Tornado Warning: A tornado has been sighted or indicated by weather radar. Take shelter immediately.

- 6.3.1 Listen to NOAA Weather Radio or to commercial radio or television newscasts for the latest information.
- 6.3.2 Look for approaching storms
- 6.3.3 Look for the following danger signs:
 - Dark, often greenish sky
 - Large hail
 - A large, dark, low-lying cloud (particularly if rotating)
 - Loud roar, similar to a freight train.
- 6.3.4 **TORNADO SIGHTING:** Go to a pre-designated shelter area such as the center of an interior room on the lowest level (closet, interior hallway) away from corners, windows, doors, and outside walls. Put as many walls as possible between you and the outside. Get under a sturdy table and use your arms to protect your head and neck. Do not open windows.

6.4 HURRICANE WATCH / WARNING – 24 to 36 HOURS PRIOR

Hurricane Watch - Hurricane/tropical storm conditions are possible in the specified area, usually within 36 hours. Tune in to NOAA Weather Radio, commercial radio, or television for information.

Hurricane Warning - Hurricane/tropical storm conditions are expected in the specified area, usually within 24 hours.

- 6.4.1 Removing all loose outdoor storage or equipment
- 6.4.2 Anchor all trailers and other portable equipment to the ground
- 6.4.3 Secure outdoor storage or equipment that cannot be moved
- 6.4.4 Raise critical equipment off floors (e.g. PC towers)
- 6.4.5 Cover any critical equipment with waterproof tarpaulins
- 6.4.6 Initiate orderly shutdown of production equipment and systems that rely on power.
- 6.4.7 Turn off any non-essential electrical systems
- 6.4.8 Verify that all fire protection systems are in service (i.e. water supplies, fire pumps, sprinklers, fire alarms)
- 6.4.9 All buildings should be closed and locked after ensuring there is no one in the building.
- 6.4.10 Leave locked building and go to a safe place until emergency officials announce that conditions are safe to travel.

6.5 POST HURRICANE

- 6.5.1 Survey the site for:
 - Live electrical wires
 - Broken glass or sharp metal
 - Damaged building features or contents that could shift or collapse
 - Verify the status of protection systems, water supplies, fire pumps, automatic sprinklers, fire alarms and security systems.
- 6.5.2 Begin salvage and/or repairs as soon as possible to prevent further damage
- 6.5.3 Clear roofs drains and ground level catch basins

Tel: 561-924-9250

62-780.500 Emergency Response Action or Interim Source Removal.

(1) Within 24 hours of discovery of an unexpected situation or sudden occurrence of a serious and urgent nature that demands immediate action to alleviate a threat to human health, public safety, or the environment, or within 24 hours after being notified by the Department of such a condition, the PRSR shall commence an emergency response action. For purposes of an emergency response action, "commence" means that the PRSR has employed or contracted with a response action contractor to evaluate, design, plan, engineer, construct, implement, and complete the requirements of the emergency response action, and has given the contractor the authority to proceed with the required work. The emergency response action shall include performing all tasks described in this section that are necessary to eliminate the immediate and serious threat posed by the site conditions. In addition, any PRSR may conduct an interim source removal in accordance with this section. The objectives of the emergency response action or interim source removal are to remove specific known contaminant source(s) and provide temporary control to prevent or minimize contaminant migration, and to protect human health and the environment prior to the approval of a Remedial Action Plan prepared and submitted pursuant to Rule 62-780.700, F.A.C.

(2) Free Product Removal and Disposal.

(a) The PRSR may, and for emergency response actions shall, if necessary to alleviate a threat to human health, public safety, or the environment, perform free product recovery consistent with the following requirements:

1. The PRSR shall provide to the Department a written notification in accordance with the time schedule in Table A (Notices for Field Activities) or the CAD that includes a description of the type and estimated volume of free product to be removed, and proposed free product recovery and disposal methods to be utilized;

2. The free product recovery shall not spread contamination into previously uncontaminated or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

3. Flammable products shall be handled in a safe manner; and

4. The recovered product shall be characterized and properly disposed or recycled; and all sampling and analyses shall be performed pursuant to Rule 62-780.300, F.A.C.

(b) The following passive and active methods of free product recovery may be implemented without requesting approval from the Department:

1. Absorbent pads;

2. Skimmer pumps that include pumps with mechanical, electrical, or hand-bailed purging operations;

3. Hand or mechanical bailing; and

4. Fluid vacuum techniques (for example, vacuum pump trucks) or total fluid displacement pumps, as long as the technique used shall not smear or spread free product, or contaminate previously uncontaminated or less contaminated media.

(c) In addition to the free product recovery methods specified in paragraph 62-780.500(2)(b), F.A.C., the PRSR may evaluate, propose, and submit other product recovery methods to the Department for approval prior to implementation. The submittal, as an Interim Source Removal Proposal, shall include the results of the evaluation performed to determine the potential for product smearing or spreading and the potential for air emissions. The free product recovery methods proposed may include:

1. Dewatering or groundwater extractions that may influence the depth to the water table;

2. Air/fluid extraction; or

3. Excavation of soil saturated with non-aqueous phase liquid into, or below, the water table.

(d) The Department shall:

1. Provide the PRSR with written approval of the Interim Source Removal Proposal; or

2. Notify the PRSR in writing, stating the reason(s) why the Interim Source Removal Proposal does not contain information adequate to support a free product recovery method pursuant to paragraph 62-780.500(2)(c), F.A.C.

(e) Free product recovery as an Interim Source Removal task shall be deemed complete when the objectives of subsection 62-780.500(1), F.A.C., have been met.

(f) Within the time frames specified in Table A or the CAD, written notification of initiation of free product recovery shall be provided by the PRSR to the Department on Form 62-780.900(2).

(g) Within the time frames and frequencies specified in Table A or the CAD, an Interim Source Removal Status Report documenting the recovery progress and summarizing all recovery activities for a specified period shall be submitted by the PRSR to the Department for review.

(3) Short-term Groundwater Recovery.

(a) The PRSR may, and for emergency response actions shall, if necessary to alleviate a threat to human health, public safety, or the environment, perform a short-term groundwater recovery event as an interim source removal activity. Groundwater recovery from well(s) within the plume with screened intervals that intercept the water table, with the intent of achieving cleanup progress, may be performed prior to Department approval of a Remedial Action Plan submitted pursuant to Rule 62-780.700, F.A.C., provided the following criteria are met:

1. Prior to initiation, the PRSR shall provide to the Department a written notification in accordance with the time frames in Table A (Notices for Field Activities) or the CAD that includes a description of the type of contamination, estimated volume of groundwater to be removed, and proposed disposal methods to be utilized;

2. The groundwater contamination has been established to be less than 1/4 acre and confined to shallow aquifer well(s) with screened intervals that intercept the water table, such that the pumping of a shallow aquifer well(s) within the plume may result in the site meeting the No Further Action criteria of Rule 62-780.680, F.A.C., or the Natural Attenuation with Monitoring criteria of Rule 62-780.690, F.A.C.;

3. Free product is not present;

4. The duration of the groundwater recovery does not exceed 30 days, unless the PRSR demonstrates to the Department that extended groundwater recovery will not result in the spread of contamination;

5. The recovered groundwater is not treated on-site and is properly disposed at a permitted industrial water treatment facility, at a publicly-owned treatment works with the approval of the sanitary sewer authority, or at a permitted Hazardous Waste Treatment, Storage, or Disposal facility if the recovered groundwater is a hazardous waste; and

6. Sampling of representative monitoring wells to determine the effectiveness of the Short-term Groundwater Recovery event shall be performed at least 30 days after completion of the groundwater recovery.

(b) Within the time frames and frequencies specified in Table A or the CAD, the PRSR shall submit to the Department for review two copies of an Interim Source Removal Status Report that documents the recovery progress and summarizes all recovery activities for a specified period.

(4) Groundwater Recovery, Treatment, and Disposal.

(a) The PRSR may perform groundwater recovery prior to the approval of a Remedial Action Plan prepared and submitted pursuant to Rule 62-780.700, F.A.C., provided the PRSR submits an Interim Source Removal Proposal that includes the same level of engineering detail as a Remedial Action Plan pursuant to Rule 62-780.700, F.A.C. Applicable sections shall be signed and sealed pursuant to Rule 62-780.400, F.A.C.

(b) The Department shall:

1. Provide the PRSR with written approval of the proposal; or
2. Notify the PRSR in writing, stating the reason(s) why the proposal does not contain information adequate to perform groundwater recovery pursuant to paragraph 62-780.500(4)(a), F.A.C.

(c) Within the time frames and frequencies specified in Table A or the CAD, the PRSR shall submit to the Department for review two copies of an Interim Source Removal Status Report documenting the recovery progress and summarizing all recovery activities for a specified period.

(5) Soil and Sediment Removal, Treatment, and Disposal.

(a) The PRSR may, and for emergency response actions shall, excavate contaminated soil or contaminated sediment for proper treatment or proper disposal as an interim source removal activity provided the following criteria are met:

1. Prior to initiation, the PRSR shall provide to the Department a written notification in accordance with the time frames in Table A or the CAD, that includes a description of the type of contamination, estimated volume of soil or sediment to be removed, and proposed disposal methods to be utilized;
2. Contamination shall not be spread into previously uncontaminated areas or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;
3. Flammable products shall be handled in a safe manner;
4. When a soil vacuum extraction system is necessary to abate an imminent threat to human life, health, or safety within a structure or utility conduit, then the vacuum extraction system shall be designed and operated only to abate the imminent threat. The Department shall be notified, within 24 hours, of the imminent threat and the intent to use a soil vacuum extraction system. The air emissions monitoring and frequency of monitoring shall be performed pursuant to paragraphs 62-780.700(4)(a) and (12)(i), F.A.C.;
5. If one of the objectives of the interim source removal is to excavate all the contaminated soil or sediment, confirmatory soil or sediment samples shall be collected. Soil samples shall be collected at the bottom of the excavation (unless the bottom is below the water table) and walls or perimeter of the excavation. Sediment samples shall be collected at the bottom and perimeter of the excavation, if applicable;
6. A determination shall be made as to whether or not the contaminated soil or sediment contains hazardous waste. If the soil or sediment is known to be contaminated by hazardous waste, listed in 40 CFR Part 261 Subpart D, testing is not required to make the determination. If the soil or sediment is not known to be contaminated with

listed hazardous waste, but is contaminated with any of the toxic constituents identified in 40 CFR 261.24(b) (and the contamination does not result solely from manufactured gas plant waste), then USEPA Test Method 1311, Toxicity Characteristic Leaching Procedure (TCLP) and subsequent analysis of the leachate, shall be performed on a number of samples sufficient to determine whether or not the contaminated soil or sediment exceeds maximum concentrations for the toxicity characteristics. [Refer to the contaminated media guidelines referenced in subsection 62-780.100(6), F.A.C., for guidance in managing soil or sediment that contains hazardous waste.]; and

7. When excavated soil or sediment is temporarily stored or stockpiled on-site, the soil or sediment shall be placed on an impermeable surface to prevent leachate infiltration and secured in a manner that prevents human exposure to contaminated soil or sediment and prevents soil or sediment exposure to precipitation that may cause surface runoff. Any excavation shall be secured to prevent entry by the public. The temporary storage or stockpiling of excavated contaminated soil or sediment shall not exceed 60 days, unless the excavated contaminated soil or sediment contains hazardous waste and a different time frame is authorized pursuant to Chapter 62-730, F.A.C. The PRSR is advised that other federal or local laws and regulations may apply to these activities.

(b) Consistent with the goals set forth in Section 403.061(33), F.S., the Department encourages treatment over disposal options to address contaminated soil.

(c) Soil or sediment treatment, storage, or disposal techniques not authorized by applicable rules of the Department require approval in an Interim Source Removal Proposal submitted pursuant to paragraph 62-780.500(5)(d), F.A.C., or in a Remedial Action Plan submitted pursuant to Rule 62-780.700, F.A.C.

(d) The Interim Source Removal Proposal shall include the information outlined in subsections 62-780.700(3) and (4), F.A.C., as applicable.

(e) The Department shall:

1. Provide the PRSR with written approval of the Interim Source Removal Proposal submitted pursuant to paragraph 62-780.500(5)(d), F.A.C.; or

2. Notify the PRSR in writing, stating the reason(s) why the Interim Source Removal Proposal does not contain information adequate to support the selection of an alternative soil or sediment treatment or disposal technique.

(6) Authorization or receipt of approval pursuant to Rule 62-780.500, F.A.C., does not relieve the PRSR from the obligation to comply with other Department rules (for example, Chapters 62-701 and 62-730, F.A.C.) for product recovery, product disposal, groundwater recovery, or the handling, storage, disposal, or treatment of contaminated media. [Refer to the contaminated media guidelines referenced in subsection 62-780.100(6), F.A.C., for guidance on management of environmental media that contain hazardous waste.] The PRSR is advised that other federal or local laws and regulations may apply to these activities.

(7) Interim Source Removal Report.

(a) Within the time frames specified in Table A or the CAD, two copies of an Interim Source Removal Report shall be submitted by the PRSR to the Department for review. If analytical results obtained pursuant to subparagraphs 62-780.500(3)(a)6., 62-780.500(5)(a)5., and 62-780.600(5)(l)3., F.A.C., as applicable, after completion of the interim source removal, demonstrate that the No Further Action criteria of subsection 62-780.680(1), F.A.C., are met, a Site Assessment Report pursuant to subsection 62-780.600(7), F.A.C., may be submitted in lieu of an Interim Source

Removal Report. The Interim Source Removal Report shall contain the following information in detail, as applicable:

1. The type and an estimated volume of non-aqueous phase liquids that were discharged to the environment, if known;
2. The volume of non-aqueous phase liquids and the volume of groundwater recovered;
3. The volume of contaminated soil or sediment excavated and treated or properly disposed;
4. The disposal or recycling methods for non-aqueous phase liquids and contaminated soil or sediment;
5. The disposal methods for other contaminated media and any investigation-derived waste;
6. A scaled site map (including a graphical representation of the scale used) that shows the location(s) of all known on-site structures (including any buildings, underground storage tanks, storm drain systems, and septic tanks), locations where free product was recovered and the area of soil removal or treatment, and the approximate locations where all samples were collected;
7. A table that summarizes free product thickness in each monitoring well or piezometer, the total depth and screened interval of each monitoring well or piezometer, and the dates the measurements were made;
8. The type of field screening instrument, analytical methods, or other methods used;
9. The dimensions of the excavation(s) and location(s), integrity, capacities and last known contents of storage tanks, integral piping, dispensers, or appurtenances removed;
10. A table that indicates the identification, depth, and field soil screening results of each sample collected;
11. Separate tables by media that summarize all available soil, sediment, groundwater, and surface water analytical results, detection limits achieved for non-detected analytes, and analyses performed (listing all contaminants analyzed and their corresponding CTLs);
12. Depth to groundwater at the time of each excavation, measurement locations, and method used to obtain that information;
13. A scaled site map (including a graphical representation of the scale used) that shows the locations and results of confirmatory soil or sediment samples in relation to the area of the soil or sediment removal; and
14. Documentation or certification that confirms the proper treatment or proper disposal of the non-aqueous phase liquids, contaminated groundwater, contaminated soil, or contaminated sediment, including disposal manifests for non-aqueous phase liquids or hazardous waste, and a copy of the documentation or certification of treatment or acceptance of the contaminated soil or contaminated sediment.

(b) The Department shall:

1. Provide the PRSR with written approval of the Interim Source Removal Report submitted pursuant to the criteria of paragraph 62-780.500(7)(a), F.A.C.; or
2. Notify the PRSR in writing, stating the reason(s) why the Interim Source Removal Report does not conform with the applicable Interim Source Removal criteria of paragraph 62-780.500(7)(a), F.A.C.

(8) If the Interim Source Removal Report is incomplete in any respect, or is insufficient to satisfy the criteria of paragraph 62-780.500(7)(a), F.A.C., the Department

shall inform the PRSR pursuant to subparagraph 62-780.500(7)(b)2, F.A.C., and the PRSR shall submit to the Department two copies of an Interim Source Removal Report Addendum that addresses the deficiencies within 60 days after receipt of the notice.

(9) If the interim source removal is performed after submittal of the Site Assessment Report, the PRSR shall submit to the Department two copies of a Site Assessment Report Addendum that updates the Site Assessment Report by summarizing the interim source removal activities and all sampling results obtained after submittal of the Site Assessment Report, and that includes a recommendation pursuant to paragraph 62-780.600(8)(b), F.A.C.

Specific Authority 376.30701 FS. Law Implemented 376.30701 FS. History--New 4-17-05.

62-770.300 Interim Source Removal.

(1) Free Product Removal and Disposal.

(a) Except for those sites described in paragraph (1)(g) of this rule, within three days of discovery of free product the responsible party shall take steps to obtain cleanup services for product recovery or initiate product recovery. Product recovery shall be performed pursuant to paragraph 62-770.300(1)(b), F.A.C. The responsible party is required to complete product recovery provided that:

1. The product recovery method shall be selected pursuant to paragraph 62-770.300(1)(b), F.A.C.;

2. The product recovery shall not spread contamination into previously uncontaminated or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

3. Flammable products shall be handled in a safe manner; and

4. All sampling and analyses shall be performed pursuant to Rule 62-770.400, F.A.C.

(b) The following passive and active methods of product recovery may be implemented without requesting approval from the Department or FDEP local program:

1. Absorbent pads;

2. Skimmer pumps that include pumps with mechanical, electrical, or hand-bailed purging operations;

3. Hand or mechanical bailing; and

4. Fluid vacuum techniques (for example, vacuum pump trucks) or total fluid displacement pumps, as long as:

a. The technique used shall not smear or spread free product or contaminate previously uncontaminated or less contaminated media; and

b. The volume of groundwater recovered shall not be greater than two times the volume of free product recovered, except that the first 1,000 gallons of the total fluid recovered per discharge are exempt from meeting the required ratio of groundwater to free product.

(c) In addition to the product recovery methods specified in paragraph 62-770.300(1)(b), F.A.C., the responsible party may evaluate, propose, and submit other product recovery methods to the Department or to the FDEP local program for approval pursuant to Rule 62-770.890, F.A.C., prior to implementation. During the submittal and approval process, implementation of one or more of the collection methods specified in paragraph 62-770.300(1)(b), F.A.C., is required. The submittal shall include the results of the evaluation performed to determine the potential for product spreading or smearing, and the potential for air emissions, and a justification as to the environmental and economical benefits of the selected recovery method. The product recovery methods proposed may include:

1. Excavation of soil saturated with petroleum or petroleum products into, or below, the water table;

2. Dewatering or groundwater extractions that may influence the depth to the water table; or

3. Air/fluid extraction.

(d) Product recovery as an Interim Source Removal shall be deemed complete when free product has been removed to the maximum extent practicable pursuant to paragraphs 62-770.300(1)(a) and 62-770.300(1)(b), F.A.C.

(e) Within 10 days after initiation of product recovery, the responsible party shall

provide written notification to the Department or to the FDEP local program on Form 62-770.900(1).

(f) Unless a different reporting period is approved pursuant to the provisions of subsection 62-770.800(4), F.A.C., the responsible party shall submit to the Department or to the FDEP local program for review two copies of an annual status report documenting the recovery progress and summarizing all recovery activities.

(g) At petroleum contamination sites eligible for State funding assistance under the Inland Protection Trust Fund where the discharge occurred prior to March 29, 1995, product recovery shall commence in accordance with the ranking established pursuant to Chapter 62-771, F.A.C., and shall be performed pursuant to paragraphs 62-770.300(1)(b) and 62-770.300(1)(c), F.A.C., and pursuant to Section 376.30711, F.S.

(2) Short-term Groundwater Recovery. A short-term groundwater recovery event may be performed as an interim source removal activity. Groundwater recovery from well(s) within the plume with screened intervals that intercept the water table, with the intent of achieving cleanup progress, may be performed prior to Department or FDEP local program approval of a Remedial Action Plan submitted pursuant to Rule 62-770.700, F.A.C., provided the following criteria are met:

(a) The groundwater contamination shall be established to be less than 1/4 acre and confined to shallow aquifer well(s) with screened intervals that intercept the water table, such that the pumping of a shallow aquifer well(s) within the plume may result in the site meeting the No Further Action criteria of Rule 62-770.680, F.A.C., or the Natural Attenuation Monitoring criteria of Rule 62-770.690, F.A.C.;

(b) Free product shall not be present;

(c) The duration of the groundwater recovery shall not exceed 30 days;

(d) The recovered groundwater shall not be treated on-site and shall be properly disposed at a permitted industrial water treatment facility, or at a publicly-owned treatment works with the approval of the sanitary sewer authority; and

(e) Sampling of representative monitoring wells to determine the effectiveness of the Short-term Groundwater Recovery event shall be performed at least 30 days after completion of the groundwater recovery.

(3) Soil Removal, Treatment, and Disposal.

(a) If contaminated soil exists at a site, excavation of contaminated soil for proper treatment or proper disposal may be performed. Consistent with the goals set forth in Section 403.061(33), F.S., the Department encourages treatment over disposal options to address contaminated soil. The treatment or disposal of contaminated soil may be performed prior to Department or FDEP local program approval of a Remedial Action Plan submitted pursuant to Rule 62-770.700, F.A.C., provided the following criteria are met:

1. Contamination shall not be spread into previously uncontaminated or less contaminated areas through untreated discharges, improper treatment, improper disposal, or improper storage;

2. Flammable products shall be handled in a safe manner;

3. When a soil vacuum extraction system is necessary to abate an imminent threat to human life, health, safety, or welfare within a structure or utility conduit, then the vacuum extraction system shall be designed and operated only to abate the imminent threat. The Department or the FDEP local program shall be notified, within 24 hours, of the imminent threat and the intent to use a soil vacuum extraction system. The air emissions monitoring and frequency of monitoring shall be performed pursuant to

paragraphs 62-770.700(5)(a) and 62-770.700(11)(i), F.A.C.;

4. If one of the objectives of the interim source removal is to excavate all the contaminated soil, confirmatory soil samples shall be collected at the bottom of the excavation (unless the bottom is below the water table) and walls or perimeter of the excavation;

5. When excavated soil is temporarily stored or stockpiled on-site, the soil shall be placed on an impermeable surface to prevent leachate infiltration and secured in a manner that prevents human exposure to contaminated soil and prevents soil exposure to precipitation that may cause surface runoff, and any excavation shall be secured to prevent entry by the public. Excavated contaminated soil (including excessively contaminated soil) may be returned to the original excavation when petroleum storage tank systems have been removed or replaced, or if contaminated soil was encountered during construction activities, to be addressed pursuant to Rule 62-770.700, F.A.C.; and

6. Excavated contaminated soil (including excessively contaminated soil) shall not be stored or stockpiled on-site for more than 60 days, unless it is stockpiled on a right-of-way, in which case it shall be removed for proper treatment or proper disposal as soon as practical but no later than 30 days after excavation, or unless it is being land farmed pursuant to paragraph 62-770.300(3)(b), F.A.C., at which time the soil shall be returned to the original excavation, or removed and properly treated or properly disposed. Contaminated soil (including excessively contaminated soil) may be containerized in water tight drums and stored on-site for 90 days, after which time proper treatment or proper disposal of the contaminated soil shall occur, or it may be land farmed pursuant to paragraph 62-770.300(3)(b), F.A.C.

(b) Land farming of contaminated soil is allowed, provided the land farming operation is located on the same property as the source of contaminated soil unless it is land farmed at a permitted stationary facility. The following criteria shall be met for contaminated soil land farmed on the source property:

1. The land farm operation shall be at least 200 feet from any residence, school, or park;

2. An area large enough to spread the soil to a thickness of 6 to 12 inches shall be available;

3. The land farming area shall be secured in a manner that prevents entry by the public and prevents human exposure to contaminated soil;

4. The materials used to construct the land farm treatment area shall withstand the rigors of the land farming and weather;

5. The land farmed soil shall be placed over an impermeable liner or surface, and surrounded at all times by an impermeable liner supported by berms;

6. The land farmed soil shall be tilled at least biweekly;

7. The land farmed soil shall be covered when not being tilled to prevent water from entering or leaving the area;

8. A monitoring and sampling program shall be established to evaluate the effectiveness of the land farming operation and the effect on the environment, including monitoring of groundwater to confirm leaching is not occurring and of off gas emissions for air regulatory compliance. Before the land farming operation commences, the responsible party shall submit to the Department or to the FDEP local program the monitoring and sampling program, design specifications of the treatment area, and types and amounts of any proposed additives to the soil, to demonstrate that the objectives of this subparagraph will be met. Prior approval is not required for quantities

less than 20 cubic yards, but the design specifications and results of the monitoring and sampling program shall be submitted in the Interim Source Removal Report;

9. Land farming of soil is limited to 180 days, at the end of which time proper disposal is required except if written approval pursuant to the provisions of subsection 62-770.800(4), F.A.C., to exceed this time frame, is obtained from the Department or from the FDEP local program; and

10. Land farmed soil that does not exceed the lower of the direct exposure residential CTLs and leachability based on groundwater criteria CTLs specified in Chapter 62-777, F.A.C., Table II may be disposed on-site or off-site. Responsible parties are advised that other federal or local laws and regulations may apply to these activities. Land farmed soil that exceeds the applicable CTLs specified in Chapter 62-777, F.A.C., Table II shall not be disposed or returned to the original excavation without obtaining approval from the Department or from the FDEP local program, pursuant to the provisions of Rule 62-770.890, F.A.C.

(c) Soil treatment, storage, or disposal techniques not authorized by applicable rules of the Department, or in paragraph 62-770.300(3)(b), F.A.C., require approval in a Remedial Action Plan submitted pursuant to Rule 62-770.700, F.A.C.

(d) At petroleum contamination sites eligible for State funding assistance under the Inland Protection Trust Fund, soil removal for treatment or disposal, if warranted and cost-effective, shall commence in accordance with the ranking established pursuant to Chapter 62-771, F.A.C., and shall be performed in accordance with the Department's preapproval program procedures pursuant to a preapproval agreement.

(4) Authorizations. Authorization or receipt of approval pursuant to Rule 62-770.300, F.A.C., does not relieve the responsible party from the obligation to comply with other Department rules (for example, Chapters 62-701 and 62-730, F.A.C.) for product recovery, product disposal, groundwater recovery, or the handling, storage, disposal, or treatment of contaminated media. Responsible parties are advised that other federal or local laws and regulations may apply to these activities.

(5) Interim Source Removal Report.

(a) Within 60 days of completion of interim source removal activities, the responsible party shall submit to the Department or to the FDEP local program for review two copies of an Interim Source Removal Report. If analytical results obtained pursuant to paragraph 62-770.300(2)(e), F.A.C., and subparagraphs 62-770.300(3)(a)4. and 62-770.600(4)(m)3., F.A.C., as applicable, after completion of the interim source removal, demonstrate that the applicable No Further Action criteria of subsection 62-770.680(1), F.A.C., are met, a Site Assessment Report pursuant to subsection 62-770.600(7), F.A.C., may be submitted in lieu of the Interim Source Removal Report.

(b) Unless otherwise specified in a preapproval agreement, the Interim Source Removal Report shall contain the following information in detail, as applicable:

1. The volume of product that was discharged, if known;
2. The volume of free product and the volume of groundwater recovered;
3. The volume of contaminated soil excavated and treated or properly disposed;
4. The disposal or recycling methods for free product and contaminated soil;
5. The disposal methods for other contaminated media and any investigation-derived waste;
6. A scaled site map (including a graphical representation of the scale used) that shows the location(s) where free product and groundwater were recovered, the area of soil removed, and the approximate locations where all samples were collected;

7. A table that summarizes free product thickness in each monitoring well or piezometer, the total depth and screened interval of each monitoring well or piezometer, and the dates the measurements were made;

8. The type of field screening instrument, analytical methods, or other methods used;

9. The dimensions of the excavation(s) and location(s), integrity, capacities, and last known contents of storage tanks, integral piping, dispensers, or appurtenances removed;

10. The dimensions of the excavation(s) and location(s) and capacities of replacement underground storage tanks;

11. A table that indicates the identification, depth, and field soil screening results of each sample collected;

12. Separate tables by medium that summarize all available soil and groundwater analytical results, detection limits achieved for non-detected analytes, and analyses performed (listing all contaminants analyzed and their corresponding CTLs);

13. Depth to groundwater at the time of each excavation, measurement locations, and method used to obtain that information;

14. Type of petroleum or petroleum products discharged and a determination, if possible, of how the product was released;

15. A scaled site map (including a graphical representation of the scale used) that shows the locations and results of confirmatory soil samples, in relation to the area of soil removal;

16. Documentation or certification that confirms the proper treatment or proper disposal of the free product, contaminated groundwater, or contaminated soil, including disposal manifests for free product, a copy of the documentation or certification of treatment or acceptance of the contaminated soil, and results of analyses, if performed; and

17. For land farmed soil, a copy of the pre-treatment and post-treatment analytical results.

(c) Within 60 days of receipt of an Interim Source Removal Report, the Department or the FDEP local program shall:

1. Provide the responsible party with written approval of the Interim Source Removal Report submitted pursuant to the criteria of paragraph 62-770.300(5)(b), F.A.C.; or

2. Notify the responsible party in writing, stating the reason(s) why the Interim Source Removal Report does not conform with the applicable Interim Source Removal criteria of paragraph 62-770.300(5)(b), F.A.C.

(6) If the Interim Source Removal Report is incomplete in any respect, or is insufficient to satisfy the criteria of paragraph 62-770.300(5)(b), F.A.C., the Department or the FDEP local program shall inform the responsible party pursuant to subparagraph 62-770.300(5)(c)2., F.A.C., and the responsible party shall submit to the Department or to the FDEP local program for review two copies of an Interim Source Removal Report Addendum that addresses the deficiencies within 60 days after receipt of the notice.

(7) If the interim source removal is performed after submittal of the Site Assessment Report, the responsible party shall submit to the Department or to the FDEP local program for review two copies of a Site Assessment Report Addendum that updates the Site Assessment Report by summarizing the interim source removal activities and all sampling results obtained after submittal of the Site Assessment Report, and that includes a recommendation pursuant to paragraph 62-770.600(8)(b), F.A.C.

COUNTY: Palm Beach

PROJECT: Waste Tire Processing Facility

RE: Closure Cost Estimate Approval

Permit Applicant: Forever Recycling, LLC

Facility Location: 857½ Old Belle Glade Rd, Palm Beach County, Florida, 33476

Dear Mr. Perez:

I have reviewed the attached financial assurance cost estimates (received on 08/14/2015), and approve it for the stated amount(s) of \$ **2,800.00** for closing the subject facility for the year 2015. This cost estimate is based on 35 tons of tires.

Please submit the financial assurance instrument to:

Solid Waste Financial Coordinator
Department of Environmental Protection (DEP)
2600 Blair Stone Road MS 4565
Tallahassee, Florida 32399-2400
(Contact: Mr. Tor Bejnar at (850)-245-8743)

Please note that proof of financial assurance must be provided (to the Department of Health) as part of the permit application, pursuant to Rule 62-711.500(a), F.A.C. Please contact Mr. Tor Bejnar (above) for additional information and provide proof of DEP's approval as soon as it becomes available.

Please contact me at (561) 837-5939 if you have any questions.

Sincerely,

Jorge Patino, P.E.

III. ESTIMATE ADJUSTMENT

40 CFR Part 264 Subpart H as adopted by reference in Rule 62-701.630, Florida Administrative Code, (F.A.C.) sets forth the method of annual cost estimate adjustment. Cost estimates may be adjusted by using an inflation factor or by recalculating the maximum costs of closure in current dollars. Select one of the methods of cost estimate adjustment below.

☐ (a) Inflation Factor Adjustment

☐ (b) Recalculated or New Cost Estimates

Inflation adjustment using an inflation factor may only be made when a Department approved closure cost estimate exists and no changes have occurred in the facility operation which would necessitate modification to the closure plan. The inflation factor is derived from the most recent Implicit Price Deflator for Gross National Product published by the U.S. Department of Commerce in its survey of Current Business. The inflation factor is the result of dividing the latest published annual Deflatory by the Deflator for the previous year. The inflation factor may also be obtained from the Solid Waste website www.dep.state.fl.us/waste/categories/swfr or call the Financial Coordinator at (850) 245-8706.

This adjustment is based on the Department approved closing cost estimate dated:

| Latest Department Approved Closing Cost Estimate: | Current Year Inflation Factor, e.g. 1.02 | | Inflation Adjusted Closing Cost Estimate: |
|--|---|---|--|
| _____ | x _____ | = | _____ |

This adjustment is based on the Department approved long-term care cost estimate dated:

| Latest Department Approved Annual Long-Term Care Cost Estimate: | Current Year Inflation Factor, e.g. 1.02 | | Inflation Adjusted Annual Long-Term Care Cost Estimate: |
|---|---|---|---|
| _____ | x _____ | = | _____ |

Number of Years of Long Term Care Remaining:

Inflation Adjusted Long-Term Care Cost Estimate:

VI. CERTIFICATION BY ENGINEER

This is to certify that the Cost Estimates pertaining to the engineering features of this solid waste management facility have been examined by me and found to conform to engineering principles applicable to such facilities. In my professional judgment, the Cost Estimates are a true, correct and complete representation of the financial liabilities for closing and/or long-term care of the facility and comply with the requirements of Rule 62-701.630 F.A.C. and all other Department of Environmental Protection rules, and statutes of the State of Florida. It is understood that the Cost Estimates shall be submitted to the Department annually, revised or adjusted as required by Rule 62-701.630(4), F.A.C.

| Belle Glade Transfer Station 1701 State Road 15, Belle Glade | 7:30 A.M. to 4:00 P.M. | Mon. through Fri. |

- The landfill and transfer stations will be closed on: Thanksgiving and Christmas. **Authority facilities are not open on Sundays.**
- All customers are required to weigh out unless they have a tare weight on file. If you leave the Weigh Station without weighing out, your fee will be based on the full weight of the load as well as the vehicle.
- Transfer stations **cannot** accept the following **prohibited materials**: concrete, chain link fencing, farm plastic, block, brick, tile, steel, rebar, roofing material, construction lumber, trusses, pallets, trailers, dirt, fill, sod, stumps and tree remains greater than 50 pounds or 6 feet in length, and other similar materials which may damage the facility or equipment. Loads containing more than a small quantity of these materials will be rejected. Additionally, loads of tires, animals, animal waste, sludge, loads delivered in a tractor trailer and other items that require special handling are never accepted at transfer stations. The Landfill will accept these items. Acceptance or rejection of loads at a Transfer Station is at the Authority's discretion.
- Mixed loads will be charged at the higher waste category rate.
- The SWA accepts only cash or business checks at the Weigh Stations. Payment by check requires prior approval and completion of a Check Cashing Application. Credit Cards are not accepted at this time.

PROJECT: Permit Application

RE: Approval of 90 day Extension - Request for Additional Information
Forever Recycling Waste Tire Processing Facility Permit Application

Dear Mr. Perez:

We reviewed your request (attached), dated July 9, 2015 for additional 90 days to provide response to the Department's second request for information sent on May 18, 2015 (attached).

Pursuant to Rule 62-4.055(1), F.A.C., your request for additional 90 days is approved and the response to the Department's request is due November 16, 2015.

Please note that the Rule 6204.055(1), F.A.C. states that "additional extensions shall be granted for good cause shown by the applicant. A showing that the applicant is making a diligent effort to obtain the requested additional information shall constitute good cause. Failure of an applicant to provide the timely requested information by the applicable deadline shall result in denial of the application."

If you have any questions or assistance, please contact me or Mr. Jorge Patino at 561-837-5900. When referring to this project, please use the project number indicated.

Sincerely,

For the Director

Dear Applicant:

This email was auto generated as a courtesy to remind you that it has been 34 days since the Department requested additional information (RAI) associated with your application referenced above. If you have already submitted the information, or have made other arrangements with the Permitting Processor, please disregard this courtesy notification.

We recognize that additional time may be needed to provide the requested information, and encourage you to contact us if you feel that additional discussions may facilitate the preparation of the response, or our understanding of the application. If you believe an additional extension is warranted, we are willing to work with you to review the circumstances for the requested extension.

It is the goal of this letter to better assist you and to facilitate the active processing of your permit application. Where a permit application is not completed by an extended deadline without good cause, the Department may propose an agency action to deny the permit.

If you have any questions regarding this Permitting Application, please contact the Permitting Processor - LAXMANA TALLAM at Laxmana.Tallam@flhealth.gov or by phone at 561-837-5900.

If you feel you have received this email in error, please contact LAXMANA TALLAM at Laxmana.Tallam@flhealth.gov.

PROJECT: Permit Application

RE: Application for a Waste Tire Processing Facility Permit
Second Request for Information

Facility Location: 857½ Old Belle Glade Rd, Palm Beach County, Florida, 33476

Dear Mr. Perez:

The Florida Department of Health Palm Beach County (DOH) has reviewed the additional information and the revised permit application received on April 23, 2015. As discussed during the meeting at the Department of Health Palm Beach County on May 18, 2015, additional information is still needed to complete your application. Further evaluation of your proposed project will be on hold until all the information requested below has been received by the DOH. **In order to expedite the application review and avoid additional requests for information, please provide a detailed written response to each item below. If you believe an item does not apply, please state so and explain why. A copy of the request for information issued to the facility on April 02, 2015 is attached.**

Please provide the following information promptly in order to complete the review of your application pursuant to Chapters 120 and 403, Florida Statutes (F.S.) and Florida Administrative Code (F.A.C.) Rules 62-4.055, 62-701, and 62-709.

1. Please submit written responses to the following questions/requests included in the Department's April 2, 2015 request for information:
 - a. During a site visit conducted by Mr. Jorge Patino on April 1, 2015, Mr. Emilio Perez indicated that the Applicant and owner of Forever Recycling, LLC is his son, Mr. Emilio Perez, Jr. The application submitted indicates Mr. Emilio Perez as the Applicant and was signed by Emilio Perez/Owner. Please revise the application to show the full legal name of the Applicant and signatory. Also, please describe Mr. Emilio Perez's (father of Mr. Emilio Perez, Jr.) role in Forever Recycling, LLC.
 - b. DOH is in receipt of correspondence dated February 5, 2015 signed by Mr. Daniel Casey and Mr. Emilio Perez, Jr. and witnessed by Ms. Sara Perez. According to this correspondence, Mr. Casey resigned as a member of Forever Recycling, LLC and Mr. Emilio Perez, Jr. is the new registered agent and managing member. A search of the Florida Department of State Division of Corporations website on April 2, 2015 showed Mr. Casey as the Registered Agent and Authorized Person. Please provide written documentation showing that a formal request has been made to update the corporation's records.
 - c. Question A.7 of the application regarding enforcement actions was answered no, indicating no "enforcement actions taken by the Department against applicant relating to the operation of any solid waste management facility in this state." DOH records indicate that the attached Orders were sent to Mr. Emilio Perez on March 12, 2015 as part of an ongoing enforcement (Case No. SW-01-15) against Forever Recycling, LLC. Please revise the application, if necessary, and provide an explanation of any and all ongoing and/or prior enforcement actions and associated resolutions or proposed actions to resolve ongoing violations.

- d. Please provide all information requested in Part III-Attachments, subparts A through F of the application form in accordance with the specified requirements (see below).

Part III – Attachments:

A. Facility design

NOTE: All maps, plan sheets, drawings, isometrics, cross sections, or aerial photographs shall be legible; be signed and sealed by a registered professional engineer responsible for their preparation; be of appropriate scale to show clearly all required details; be numbered, referenced to narrative, titled, have a legend of symbols used, contain horizontal and vertical scales (where applicable), and specify drafting or origination dates; and use uniform scales as much as possible, contain a north arrow and use NGVD for all elevations.

1. A topographic or section map of the facility, including the surrounding area for one mile, no more than one year old, showing land use and zoning within one mile of the facility
2. A plot plan of the facility on a scale of not less than one inch equals 200 feet. At a minimum, the plot plan shall include. (The plan submitted must be drawn to scale and signed and sealed by a professional engineer.)
 - a. The facility design, including the location and size of all storage and processing areas for used tires, unprocessed waste tires, processed waste tires, and waste tire processing residuals. (Please note that dimensions of storage areas must comply with the requirements of 62.711.540)
 - b. All wetlands and water bodies within the facility or within 200 feet of any storage area;
 - c. Stormwater control measures, including ditches, dikes, and other structures;
 - d. Boundaries of the facility, legal boundaries of the land containing the facility, and any easements or rights of way that are within the facility or within 200 feet of any storage area;
 - e. Location, size, and depth of all wells within the facility or within 200 feet of any storage area;
 - f. All structures and buildings that are, or will be, constructed at the facility; include those used in storage and processing operations;
 - g. All areas used for loading and unloading;
 - h. All access roads and internal roads, including fire lanes;
 - i. Location of all fences, gates, and other access control measures; and
 - j. Location of all disposal areas within the facility.

B. Facility operation. (The following items have not been submitted or require additional details)

2. A description of the equipment used for processing tires. This description shall include the make, model, and hourly capacity of each piece of equipment.
 5. A description of how the operator will maintain compliance with each of the storage requirements of Rule 62-711.540, F.A.C.
 7. A copy of the fire safety survey
 8. A description of how 75% of the annual accumulation of waste tires will be removed for disposal or recycling.
- D. Attach proof of financial responsibility as requirement by Rule 62-711.500(3) OR a calculation showing that financial assurance documents, currently on file with the Department, are sufficient to assure closing of the waste tire site as well as any other solid waste management facility at that location. (Pursuant to Rule 62-711.500(3), the cost estimate shall be the amount that would be expended to remove, process, and dispose of waste tires on the site and to close the site. The costs shall be based on a third party, who is not a subsidiary or parent company, performing the work, reported on a per unit basis. Quantity estimates shall be certified by a Professional Engineer.) Please contact Mr. Tor Belnar of the Department of Environmental Protection (DEP) at 850-245-8743 regarding financial instrument. Please submit the cost estimates to our office using the attached form.**

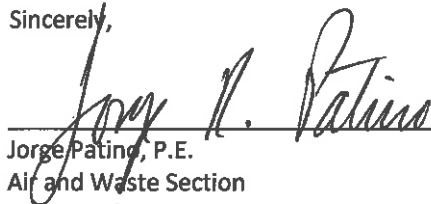

- E. A letter from the land owner (if different from applicant) authorizing use of the land as a waste tire processing facility.*

Note that all submittals must be signed and sealed by a professional engineer (as required), licensed in the State of Florida.

The Health Department must receive a response from you within ninety (90) days of receipt of this letter, unless you (the applicant) request additional time under Rule 62-4.055(1), F.A.C. Failure of an applicant to provide the timely requested information by the applicable deadline shall result in denial of the application.

If you have any questions, please contact me at 561-837-5936. When referring to this project, please use the project number indicated.

Sincerely,

Jorge Patino, P.E.

**PALM BEACH COUNTY
ENVIRONMENTAL CONTROL HEARING BOARD
West Palm Beach, Florida**

PREHEARING CONFERENCE PROCEDURES

The following procedures shall be followed in all matters set to be heard by the Palm Beach County Environmental Control Hearing Board:

- A. Parties are encouraged to communicate prior to the date of the Prehearing Conference to:
 - 1. Discuss compliance.
 - 2. Discuss settlement/stipulation and civil fines.

- B. The Prehearing Conference is held one week prior to Hearing to:
 - 1. Discuss, simplify, and stipulate to as many facts and issues as possible, including:
 - (a) Ownership or control of the subject property.
 - (b) Codes alleged to have been violated.
 - (c) All stipulated facts.
 - (d) Facts at issue.
 - (e) Issues as to the application and interpretation of laws cited.
 - 2. Discuss possible prehearing settlement/stipulation.

- C. Absent stipulation, disclosure of the following shall be made at the Prehearing Conference:
 - 1. Physical evidence to be used in the Hearing and objections, if any, of opposing party.
 - 2. Any and all witnesses to be presented and give testimony at the Hearing.

- D. Unless otherwise mutually agreed to by both parties, at the Hearing parties shall be limited to exhibits produced, objections reserved, and witnesses disclosed pursuant to Paragraph C, above.

PALM BEACH COUNTY
ENVIRONMENTAL CONTROL HEARING BOARD
West Palm Beach, Florida

FLORIDA DEPARTMENT OF HEALTH
IN PALM BEACH COUNTY

Petitioner,

vs.

FOREVER RECYCLING, LLC,

Respondent.

Case No. SW-01-15

ORDER TO SHOW CAUSE
AND
NOTICE OF HEARING

The Acting Environmental Control Officer having filed a Notice of Failure To Comply With A Notice Of Violation, the Palm Beach County Environmental Control Hearing Board hereby orders, **FOREVER RECYCLING, LLC**, ("Respondent"), owner of the property located at 857 1/2 Old Belle Glade Road 441, Pahokee, FL 33476, to appear before it at 800 Clematis Street, Conference Room 112, West Palm Beach, Florida at 9:00 a.m., on Thursday, April 23, 2015 to show cause why it should not be held in violation of Chapter 77-616, Laws of Florida, as amended, ("The Environmental Control Act"); Chapter 11 of the Palm Beach County Code (Ordinance 78-5, as amended); and, more specifically, the following section(s) of the Florida Administrative Code governing Solid Waste for the violation(s) cited below and as set forth in the attached Notice of Failure To Comply With A Notice Of Violation, and further to show cause why it should not be ordered to pay civil fines and take such preventive or corrective action as this Board may deem just and proper:

62-701.300(1)(a) F.A.C., Prohibitions: (1) General prohibition. (a) No person shall store, process, or dispose of solid waste except as authorized at a permitted solid waste management facility or a facility exempt from permitting under this chapter; to wit: On October 27, 2014, December 1, 2014, and February 19, 2015, Health Department Inspectors observed solid waste

being stored by Forever Recycling, LLC, at 857 1/2 Old Belle Glade Road 441, Pahokee, FL; and

62-709.320(2)(a)2, F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation.

Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 2. Dust and litter control methods; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control dust and litter; and

62-709.320(2)(a)3.a., F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation. Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 3. Fire protection and control provisions to deal with accidental burning of solid waste, including a. There shall be an all-weather access road, at least 20 feet wide, all around the perimeter of the site; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to maintain a 20 ft all-weather access road all around the perimeter of its yard trash recycling site; and

62-709.320(2)(b), F.A.C., (2) Design and Operating Requirements....(b) The facility shall be operated in a manner to control vectors; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control vectors; and

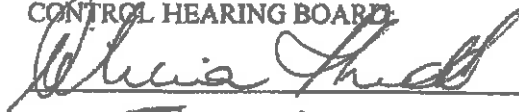

62-711.400(1), F.A.C., Waste Tire Prohibitions. (1) No person may maintain a waste tire site unless such site is an integral part of a permitted waste tire processing facility, except as provided in Rule 62-711.500, F.A.C. For the purpose of this rule, "an integral part of a waste tire processing facility" means the waste tire site is on the same property as the processing facility; to wit: On February 19, 2015, a Health Department inspector observed more than 1500 waste tires being stored onsite at 857 1/2 Old Belle Glade Road 441, Pahokee, FL.

A copy of the Notice of Failure To Comply With A Notice Of Violation is attached hereto and made a part hereof.

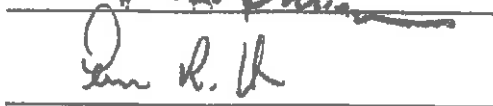

The proceeding is and shall be governed by Palm Beach County Code Section 11-21, as amended
(Ordinance No. 78-5, as amended) and the Environmental Control Act.

ORDERED at West Palm Beach, Florida, this 12th day of March, 2015.

FLORIDA DEPARTMENT OF HEALTH
IN PALM BEACH COUNTY

Petitioner,

vs.

FOREVER RECYCLING, LLC,

Respondent.

Case No. SW-01-15

NOTICE OF FAILURE TO COMPLY WITH A NOTICE OF VIOLATION

Pursuant to Chapter 77-616, Laws of Florida, as amended ("The Environmental Control Act"), this notice is filed with the Palm Beach County Environmental Control Hearing Board ("Hearing Board") to invoke its jurisdiction over Respondent, **FOREVER RECYCLING, LLC**, owner of the property located at 857 1/2 Old Belle Glade Road 441, Pahokee, FL 33476, and in support thereof the Acting Environmental Control Officer of the Florida Department of Health in Palm Beach County states:

1. Respondent has violated the Environmental Control Act; Chapter 11 of the Palm Beach County Code (Ordinance 78-5, as amended); and, more specifically, the following section(s) of the Florida Administrative Code governing Solid Waste for the violation(s) cited below and as set forth in the attached copy of a Notice issued by an authorized representative of the Florida Department of Health in Palm Beach County. Said Notice is hereby made and shall be considered a part hereof:

62-701.300(1)(a) F.A.C., Prohibitions: (1) General prohibition. (a) No person shall store, process, or dispose of solid waste except as authorized at a permitted solid waste management facility or a facility exempt from permitting under this chapter; to wit: On October 27, 2014, December 1, 2014, and February 19, 2015. Health Department Inspectors observed solid waste

being stored by Forever Recycling, LLC, at 857 1/2 Old Belle Glade Road 441, Pahokee, FL; and

62-709.320(2)(a)2, F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation. Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 2. Dust and litter control methods; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control dust and litter; and

62-709.320(2)(a)3.a., F.A.C., (2) Design and Operating Requirements. (a) The facility shall have the operational features and equipment necessary to maintain a clean and orderly operation. Unless otherwise specified in Rule 62-709.330 or 62-709.350, F.A.C., these provisions shall include: 3. Fire protection and control provisions to deal with accidental burning of solid waste, including a. There shall be an all-weather access road, at least 20 feet wide, all around the perimeter of the site; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to maintain a 20 ft all-weather access road all around the perimeter of its yard trash recycling site; and

62-709.320(2)(b), F.A.C., (2) Design and Operating Requirements....(b) The facility shall be operated in a manner to control vectors; to wit: On October 27, 2014 and December 1, 2014, Forever Recycling, LLC, failed to operate in a manner to control vectors; and

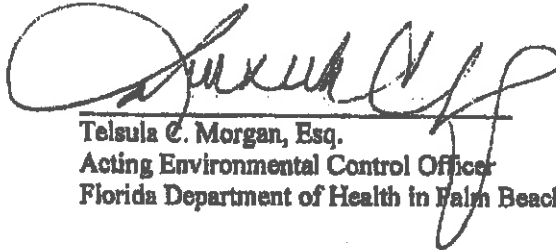

62-711.400(1), F.A.C., Waste Tire Prohibitions. (1) No person may maintain a waste tire site unless such site is an integral part of a permitted waste tire processing facility, except as provided in Rule 62-711.500, F.A.C. For the purpose of this rule, "an integral part of a waste tire processing facility" means the waste tire site is on the same property as the processing facility; to

wit: On February 19, 2015, a Health Department inspector observed more than 1500 waste tires being stored onsite at 857 1/2 Old Belle Glade Road 441, Pahokee, FL.

2. The violation described herein constitutes failure to comply with a Notice of Violation and may result in a fine of up to \$500.00 per day for each day of the violation.

The undersigned Acting Environmental Control Officer respectfully requests the Hearing Board issue an order setting a hearing for the Board's next scheduled meeting date.

DATED this 9th day of March, 2015.

Inspection Checklist

FACILITY INFORMATION:

Facility Name: FOREVER RECYCLING

On-Site Inspection Start Date: 04/01/2015

On-Site Inspection End Date: 04/01/2015

WACS No.: 102298

Facility Street Address: 857 1/2 OLD BELLE GLADE RD

City: PAHOKEE

County Name: PALM BEACH

Zip: 33476

INSPECTION PARTICIPANTS:

(Include ALL Landfill and Department Personnel with Corresponding Titles)

Principal Inspector: Jorge R Patino, Inspector

Other Participants: Emilio Perez (Senior), Representative

INSPECTION TYPE:

Routine Operation Inspection for WPF - Waste Tire Processing Facility

ATTACHMENTS TO THE INSPECTION CHECK LIST:

This Cover Page to the Inspection Checklist may include any or all of the following attachments as appropriate.

SECTION 1.0 - FILE REVIEW

Inspection Date: 04/01/2015

SECTION 1.0 - FILE REVIEW**Requirements:**

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

| Item No. | FILE REVIEW (Pre- or Post-Inspection, as appropriate.) Completed | Ok | Not Ok | Unk | N/A |
|----------|--|----|--------|-----|-----|
| 1.1 | For landfills and C&D disposal facilities, does the facility have a current plan for the method and sequence of filling wastes? 62-701.500(2)(f) for landfills; 62-701.730(7)(a) for C&D debris sites | | | | ✓ |
| 1.2 | For landfills, are the following records being reported to the Department?(Check any that are Not OK) <input type="checkbox"/> Waste reports (annually) 62-701.500(4) <input type="checkbox"/> Annual estimate of remaining life 62-701.500(13)(c) | | | | ✓ |
| 1.3 | Is gas monitoring being performed as required by the permit? 62-701.500(9), 62-701.530(2) | | | | ✓ |
| 1.4 | Are the results of the gas sampling reported to the Department quarterly? 62-701.530(2)(c) | | | | ✓ |
| 1.5 | Is water quality sampling and testing performed according to standard procedures and at the required frequencies? 62-701.510(2) for landfills; 62-701.730(4)(b) and (10) for C&D debris sites; 62-713.400(3) for stationary soil treatment facilities. | | | | ✓ |
| 1.6 | Do the results of the water quality testing suggest there may be adverse impacts to water quality from the operation of the solid waste facility? 62-701.510(3) and (4); 62-701.730(4)(c) and (10) for C&D debris sites; 62-713.400(3) for stationary soil treatment facilities. | | | | ✓ |
| 1.7 | For closed landfills and C&D disposal facilities with final elevations higher than 20 feet above grade, has a final survey report verifying the final elevations and contours of the facility been submitted to the Department? 62-701.600(6)(b), 62-701.730(9)(d) | | | | ✓ |
| 1.8 | Is financial assurance adequate? 62-701.630 for landfills; 62-701.710(7)(a) and (10)(a) for waste processing facilities; 62-701.730(11)(a) for C&D debris facilities; 62-713.600(6)(a) for stationary soil treatment facilities; 62-711.500(3) for waste tire facilities. NOTE: The Solid Waste Financial Coordinator in Tallahassee can assist with this information. | | | | ✓ |
| 1.9 | Are cost estimates current and adjusted every year? 62-701.630(4) for landfills; 62-701.710(7)(b) and (10)(a) for waste processing facilities; 62-701.730(11)(b) and (c) for C&D debris facilities; 62-713.600(6)(b) and (c) for stationary soil treatment facilities; 62-711.500(3) for waste tire facilities. | | | | ✓ |
| 1.10 | For C&D debris disposal and disposal with recycling facilities, is an Annual Report submitted to the Department for the disposal operation by February 1st of each year? 62-701.730(12) | | | | ✓ |
| 1.11 | For C&D recycling facilities with no disposal, is an Annual Report for the recycling facility submitted to the Department by February 1st of each year? 62-701.710(8)(b) | | | | ✓ |
| 1.12 | For compost facilities, has the compost product been sampled and analyzed every 20,000 tons or every 3 months (whichever is sooner)? 62-709.530(1) | | | | ✓ |
| 1.13 | For compost facilities, has the annual report been submitted by June 1st? 62-709.530(3) | | | | ✓ |

COMMENTS:

04/01/2015

Only the file review inspection form was utilized for the purpose of documenting the site visit. An actual permitted tire processing facility does not yet exist. This inspection was only for permitting purposes. Therefore, all questions were marked not applicable.

04/01/2015

I, Jorge Patino, visited the Forever Recycling facility on 4/1/15 at approximately 10 a.m. as part of the permit application review (see attached photos). The facility is located in Belle Glade, just southwest of the intersection of three roads: Belle Glade Road (U.S. 441), State Market Road (15A), and Muck City Road (717).

Inspection Date: 04/01/2015

I met Mr. Emilio Perez (Sr.) onsite. He informed me that his son, Emilio Perez, Jr. is the applicant for this permit. He also informed me that he owns the land upon which Forever Recycling operates and that the previous owner of Forever Recycling, Mr. Casey, used to lease the land from him.

Mr. Perez stated his son, Emilio Perez, Jr. is the owner of Forever Recycling. I informed him that the application needs to clearly show the correct applicant name - it currently does not indicate "Jr." after the applicant's name. I also mentioned that as of last week the state corporations website still showed Mr. Casey as the company owner. Mr. Perez said he believes they have done what is required to change ownership and expects the change to take effect soon. I explained we would need proof of ownership.

Mr. Perez said Forever recycling has a contract with an electric company in Lakeland to supply 1 million tires per year. They are currently baling tires onsite and he estimates they currently are storing approximately 4,000 tires onsite. Tires are stored primarily on the north half of the property. Mulch is stored on the south side of the property. A wood chipper is staged midway along the east side of the property. A double-wide trailer (possibly of residential use) is located near the entrance of the property, which is located off of 87th PL N. A machine metal shop/garage building is located near the center of the property. Tires were being baled east of this building.

We went over some of the Chapter 62-711, F.A.C. requirements such as setbacks from property boundaries, fire lanes, storage area dimensions, etc. I stressed the importance of having the facility owner and/or operator become very familiar with these requirements. I also let him know that based on our preliminary review of the application, it appeared many of the required attachments were missing. He said he was working on providing additional information. I suggested that whoever is preparing the application should check off every item of the application and rule requirements to ensure completeness.
