DEP Form # 62-522.900(2)
Form Title Ground Water Monitoring Report
Effective Date _____
DEP Application No. _____

GROUND WATER MONITORING REPORT Rule 62-522.600(11)

PART I GENERAL INFORMATION

- (1) Facility Name SOUTHEAST LANDFILL
- Address 15960 C. R. 672
- City LITHIA, FL Zip 33503
- Telephone Number (813) 671-7707
- (2) The GMS Identification Number 4029C30075
- (3) DEP Permit Number 35435-006-SO & 35435-012-SO/MM
- (4) Authorized Representative Name BARRY M. BOLDISSAR, DIRECTOR, SOLID WASTE MANAGEMENT DEPT
- Address P O BOX 1110
- City TAMPA, FLORIDA Zip 33601
- Telephone Number (813) 276-2900
- (5) Type of Discharge GROUNDWATER – POTENTIAL ONLY
- (6) Method of Discharge LANDFILL

Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this document and all attachments and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

**Re: Southeast County Landfill
Permit Nos. 35435-006-SO, 35435-007-SO
Analytical Data Report - May 2007**

Dear Mr. Morris:

In accordance with the above-referenced permits, the Hillsborough County Solid Waste Management Department (SWMD) is pleased to provide the May 2007 analytical data report (ADR) for the water quality monitoring at the Southeast County Landfill (SCLF). Samples were collected from May 7 through May 11, 2007 by the SWMD Field Sampling Team. Water quality criteria and the overall impact to the future groundwater monitoring activities at the SCLF are discussed in parameter specific details herein.

FIELD PARAMETERS

pH

The surficial aquifer detection and background water quality monitoring wells continue to exhibit pH values below the SDWS acceptable range of 6.5 to 8.5 pH units. The pH values across the site range in value from 3.97 to 5.99 pH units. The pH at the site has historically been observed to be below the acceptable range. The 1983 Ardaman and Associates, Inc. report titled Hydrogeologic Investigation, Southeast County Landfill, reported pH values ranging from 4.4 to 6.7 pH units in six wells on site. This data was collected prior to construction of the landfill, and supports the position that the pH values observed are consistent with the background water quality.

No unusual conditions or changes in the pH values within any of the detection or background monitoring wells or surface water sites were observed during this sampling event.

Mr. John Morris, P.G.
July 18, 2007
Page 2

Turbidity

Turbidity values in the groundwater at the site remain consistent with the historical data set. The range of values observed in the surficial aquifer 0.2 to 146 nephelometric turbidity units (NTU). The two Floridan wells, TH-19 and TH-40, both exhibited values below 1.0 NTU.

In accordance with the April 3, 2003 Approval of Corrective Action Plan letter from the Florida Department of Environmental Protection (FDEP), the SWMD has recorded turbidity data at the three sampling points along Long Flat Creek. A summary table of data obtained from the surface water sampling points 3A, 3B2B and 3C2 is provided within this ADR. Over the period of record from March 2007 to May 2007, the one required turbidity measurement was observed below the compliance level of 29 NTU above the background (upstream) value.

No unusual conditions or changes in the turbidity values across the site were observed during this sampling event.

GENERAL PARAMETERS

Total Dissolved Solids

The surficial aquifer detection wells, TH-59 and TH-60, exhibited total dissolved solids (TDS) above the Secondary Drinking Water Standard (SDWS) of 500 milligrams per liter (mg/l) with concentrations of 630 mg/l and 620 mg/l. These wells have consistently exhibited TDS above standards, and were constructed in an area that had been reworked during construction and filled with offsite fill materials prior to construction of these detection wells addressing Section 7. All of the other monitoring wells were observed below the SDWS for TDS during this sampling event.

Total Alpha

The Weeks' private supply well exhibited concentrations of total alpha at 17.2 picocuries per liter (pCi/l), which is above the Primary Drinking Water Standard (PDWS) of 15 pCi/l. This supply well has periodically been observed to exhibit total alpha above the PDWS. No unusual conditions or changes were observed during this sampling event, and the home owner has been appropriately notified of this condition. The detection of this radiological parameter in the Weeks' private supply well is not readily attributable to the landfill operations, and is likely attributable to the past strip mining for phosphate in the area.

Radium 226

The Weeks' private supply well exhibited concentrations of radium 226 at 15 picocuries per liter (pCi/l), which is above the Primary Drinking Water Standard (PDWS) of 5 pCi/l. This supply well has periodically been observed to exhibit radium 226 above the PDWS. No unusual conditions or changes in radium 226 values were observed during this sampling event, and the home owner has been appropriately notified of this condition.

Mr. John Morris, P.G.
July 18, 2007
Page 3

Fecal Coliform

Surface water sampling points 3A and Mine Cut #1 exhibited concentrations of fecal coliform at 2,600 colonies per 100 milliliter (col/100ml) and 1,000 col/100ml, which are above the Surface Water Standard of 800 col/100ml. No other surface water sites exceeded the standard during this event, and the SWMD believes that the presence of coliform at elevated concentrations is likely attributable to the thousands of birds that frequent the landfill area on a daily basis.

METALS

Arsenic

Arsenic was observed above the PDWS of 0.01 mg/l in four of the surficial aquifer detection monitoring wells during this sampling event. Detection wells TH-58, TH-59, TH-62, and TH-65 exhibited concentrations of 0.028 mg/l, 0.020 mg/l, 0.017 mg/l, and 0.023 mg/l, respectively. As previously discussed, the mobilization of arsenic in anaerobic environments such as under a lined landfill is the likely source of the slightly elevated concentrations of arsenic in these wells.

Iron

Iron concentrations in sixteen (16) of the eighteen (18) surficial aquifer detection and background water quality monitoring wells were observed above the SDWS of 0.3 mg/l. The highest concentration for iron was 30 mg/l in detection well TH-59. The iron concentrations observed in the surficial aquifer wells across the site have historically been elevated. Additionally, as briefly discussed above, the landfill liner systems at the Southeast Landfill have created anaerobic environments. These environments are known to mobilize iron and other metals, which result in the higher iron concentrations in the areas down gradient of these liner systems. It should also be noted that areas at the SCLF that have been disturbed by mining or landfill construction activities appear to exhibit the highest iron concentrations. Based on the identified potential sources of iron at the site, the SWMD maintains the position that the source of the elevated iron in the surficial aquifer is not the buried wastes within the lined landfills.

The private supply wells owned by Weeks and Holland exhibited levels of iron above the SDWS with concentrations of 0.47 mg/l and 1.5 mg/l, respectively. These wells consistently exhibit iron above the SDWS. No unusual conditions or changes in iron concentrations within any of the groundwater monitoring wells or private supply wells at and adjacent to the site were observed during this event.

Iron exceeded the surface water criteria of 1 mg/l as per Chapter 62-302, F.A.C. at surface water monitoring points 3A, 3B2B, and Mine Cut #1. Values of 3.2 mg/l, 7.7 mg/l, and 3.3 mg/l were observed at these locations during this sampling event. However, the iron value at the surface water discharge point 3C2 was 0.26 mg/l.

Mr. John Morris, P.G.
July 18, 2007
Page 4

Nickel

Nickel was observed in TH-59 and TH-60 above the PDWS of 0.1 mg/l during this sampling event. Concentrations of 0.2 mg/l and 0.14 mg/l were observed. Nickel has consistently been observed in these wells since the initial samples were collected in October 2003 prior to waste being placed in the Section 7 cell.

ORGANIC PARAMETERS

The organic parameters were analyzed by EPA Method 8260. The results of analyses are discussed in detail in the following paragraphs.

Benzene was observed in the Section 7 detection monitoring well TH-59 below the PDWS of 1 microgram per liter (ug/l) at a concentration of 0.63 ug/l. Cis-1,2-dichloroethene was observed in Section 7 detection wells TH-59 and TH-60 with results of 2.5 ug/l and 1.3 ug/l, respectively. These results were below the PDWS of 70 ug/l. Toluene was observed below the SDWS of 1,000 ug/l in Section 7 detection well TH-60C with result of 10 ug/l. Organic parameter 1,1-dichloroethane was observed in piezometer TH-30 with a result of 0.58 ug/l which is below the GCTL of 700 ug/l. Detection monitoring well TH-60 exhibited acetone at a concentration of 26 ug/l. However, this constituent is a common laboratory contaminant, and historically, acetone has never been a contaminant of concern in any of the monitoring wells on site. The SWMD believes the acetone observed in this well is a false positive value. The SWMD is sampling the six detection wells down gradient of Sections 7 and 8 this month, and the results should support this position.

Other observations

Review of the laboratory's report of analysis showed that the equipment blanks collected in the field were analyzed for and included total ammonia. This constituent was present in all five equipment blank samples as well as a majority of the groundwater monitoring well samples collected at the site. Based on the questionable nature of these results, the SWMD immediately requested that our contracted laboratory, STL, look into the analysis and specifically if any cross contamination of the sample could be identified. STL conducted their investigation into the analytical processes and found nothing to indicate a problem at the lab. The SWMD then looked into alternative sources of ammonia that could have potentially contributed to the ammonia contamination. The SWMD discovered a broken cold pack in the first aid kit stored inside of the field sampling vehicle, and it appeared that the cold pack had been disintegrating over time. The chemical composition of these cold packs commonly consists of ammonium nitrate, which likely contaminated the groundwater samples. The SWMD will continue to evaluate this matter, and specifically the results from the next round of groundwater samples collected at the site.

Mr. John Morris, P.G.
July 18, 2007
Page 5

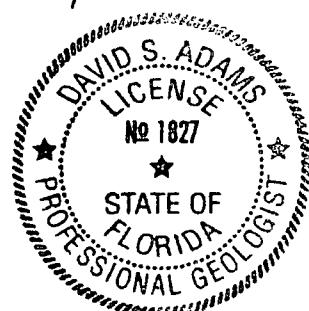

Enclosed for your review is a detailed site location map, the analytical data summary tables for groundwater monitoring wells, the surface water sites, leachate sums, and the private supply wells. Additionally this report provides the groundwater elevation data summary table, a surficial aquifer groundwater elevation and contour diagram, a data summary table of the required turbidity measurements in the tributary to Long Flat Creek, copies of the letters sent to the owners of the private supply wells, and the complete laboratory analytical data report sheets. The next sampling event for the Southeast County Landfill site is scheduled for August 2007. Should you have any questions, require any additional information, or would like to discuss the information provided within this submittal, please feel free to contact me at (813) 276-2944 or via e-mail at adamsds@hillsboroughcounty.org.

Sincerely,

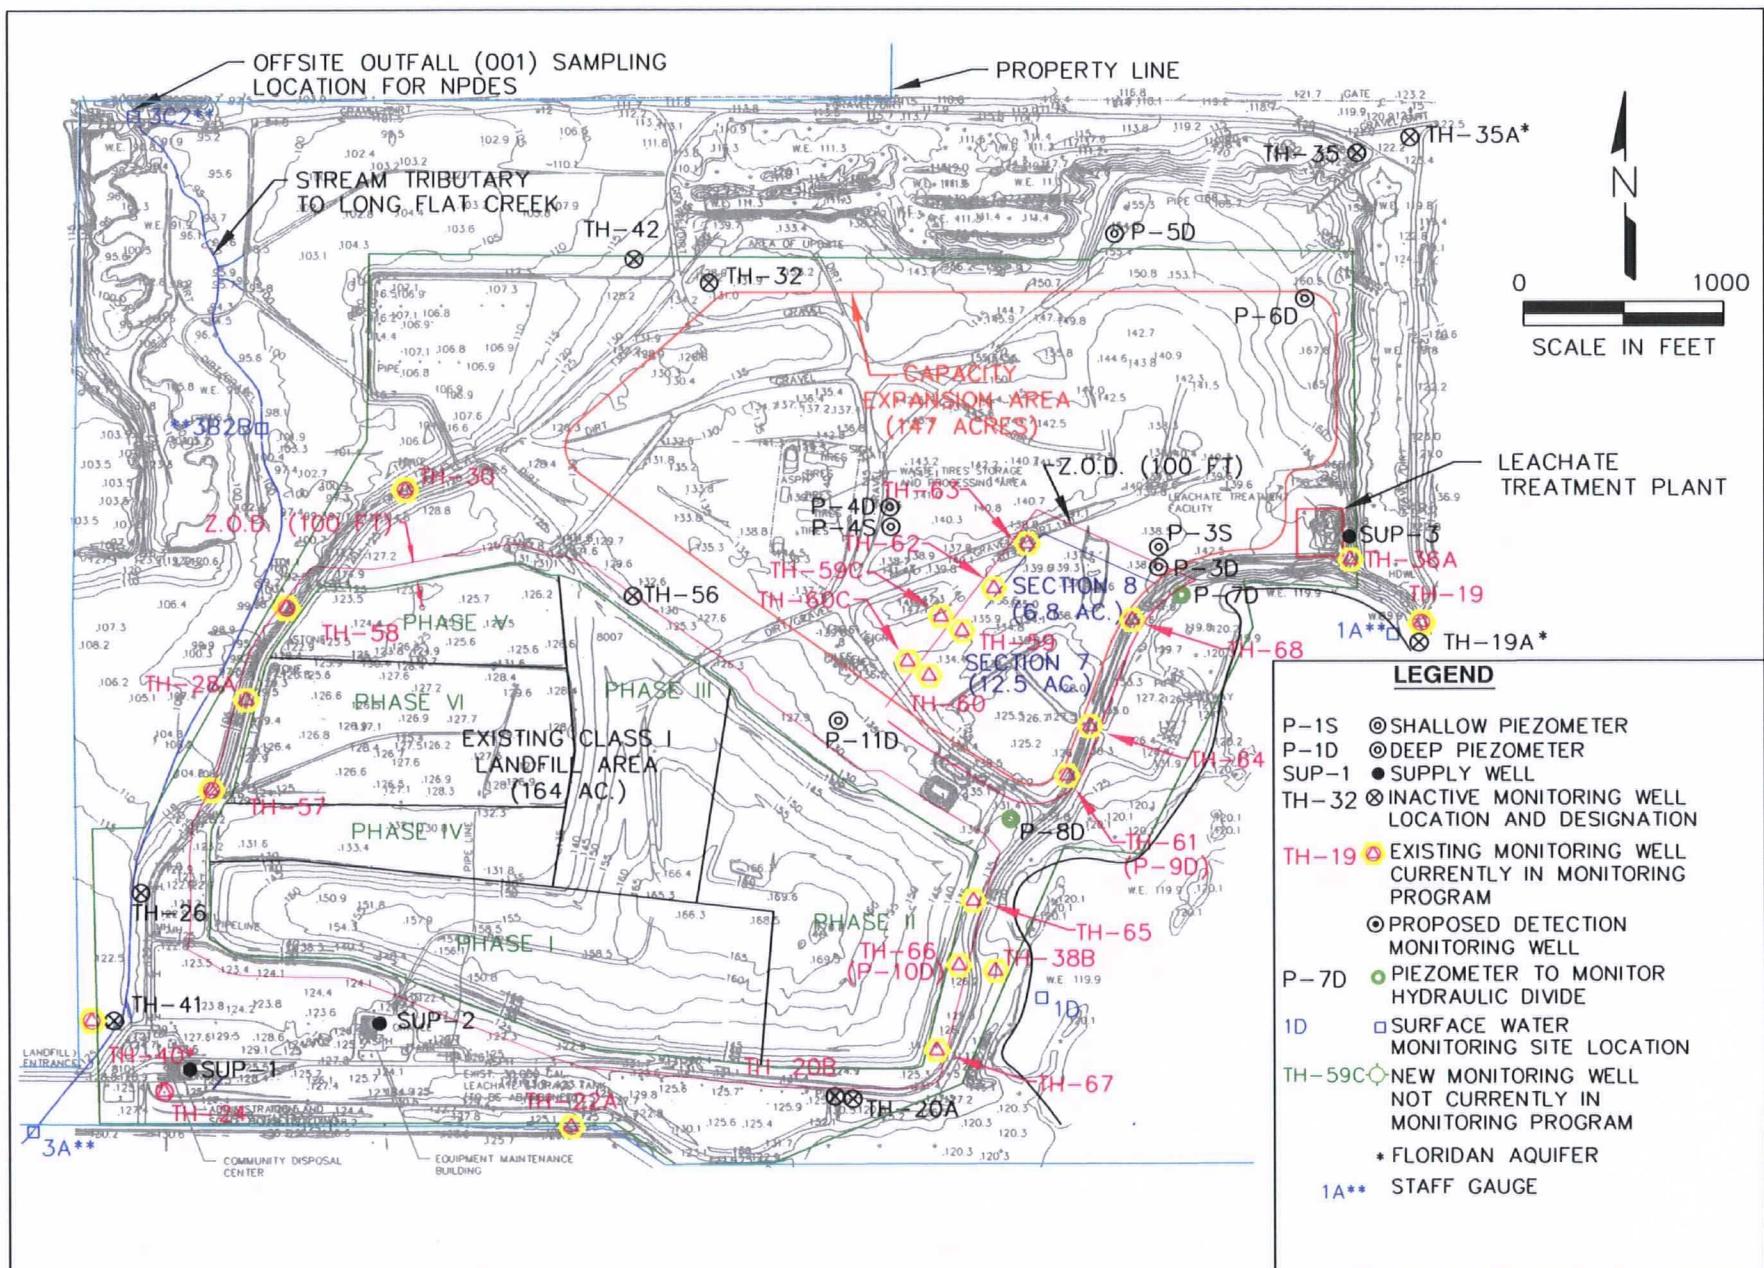

7/18/2007

Subject: Analytical Data
Domestic Supply Well
17502 County Road 672

Dear Mr. Barnes:

The Hillsborough County Solid Waste Management Department (SWMD) is pleased to provide the analytical data for your domestic supply well which was sampled on May 7, 2007. All parameters tested are within Florida Primary and Secondary Drinking Water Standards (FAC Ch 62-550.310-.320).

If you have any questions on the analysis, you may call me at 276-2955. Thank you for permission to test this well.

Sincerely,

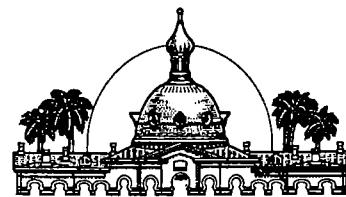

A handwritten signature in black ink, appearing to read "Michael D. Townsel".

Mr. Tom Holland
121 Carter Road
Lithia, FL 33547

Subject: Analytical Data
Domestic Supply Well
121 Carter Road

Dear Mr. Holland:

The Hillsborough County Solid Waste Management Department (SWMD) is pleased to provide the analytical data for your domestic supply well which was sampled on May 7, 2007. Iron was observed at a concentration of 1.5 mg/l which is above the Florida Secondary Drinking Water Standard (FAC Ch 62-550.320) of 0.3 mg/l. All other parameters are within Primary and Secondary Drinking Water Standards (FAC Ch 62-550.310-.320).

For health effects information you may call the Hillsborough County Health Department at (813) 307-8001. If you have any questions on the analysis, you may call me at 276-2955. Thank you for your permission to test this well.

Sincerely,

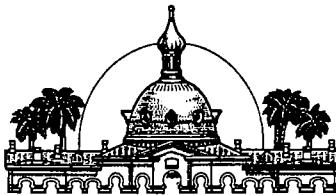

A handwritten signature of Michael D. Townsel.

Mr. & Mrs. Harold Weeks
116 Wendel Ave.
Lithia, FL 33547

Subject: Analytical Data
Domestic Supply Well
116 Wendel Ave.

Dear Mr. & Mrs. Weeks:

The Hillsborough County Solid Waste Management Department (SWMD) is pleased to provide the analytical data for your domestic supply well which was sampled on May 7, 2007. Iron was observed at a concentration of 0.47 mg/l. This value exceeds the Florida Secondary Drinking Water Standard (FAC Ch 62-550.320) of 0.3 mg/l. Total alpha and Radium 226 was also observed at concentrations of 17.2 pCi/l and 15 pCi/l, respectfully. These values exceed the Florida Primary Drinking Water Standards (FAC Ch 62-550.310) of 15 pCi/l and 5 pCi/l. All other parameters tested are within Florida Primary and Secondary Drinking Water Standards (FAC Ch 62-550.310-.320).

For health effects information you may call the Hillsborough Health Department at (813) 307-8001. If you have any questions on the analysis, you may call me at 276-2955. Thank you for your permission to test this well.

Sincerely,

Michael D. Townsel 7/18/2007

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-15505-1

Lab Section	Qualifier	Description
GC/MS VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
GC Semi VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
Metals	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-15504-1

Lab Section	Qualifier	Description
GC/MS VOA	U	Indicates that the compound was analyzed for but not detected.
GC Semi VOA	U	Indicates that the compound was analyzed for but not detected.
Metals	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-15529-1

Lab Section	Qualifier	Description
GC/MS VOA	U	Indicates that the compound was analyzed for but not detected.
GC Semi VOA	U	Indicates that the compound was analyzed for but not detected.
Metals	J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-15559-1

Lab Section	Qualifier	Description
GC/MS VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
GC Semi VOA	U	Indicates that the compound was analyzed for but not detected.
Metals	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry	J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-15586-1

<u>Lab Section</u>	<u>Qualifier</u>	<u>Description</u>
GC/MS VOA		
	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
GC Semi VOA		
	U	Indicates that the compound was analyzed for but not detected.
Metals		
	J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry		
	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-15615-1

Lab Section	Qualifier	Description
GC/MS VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
GC Semi VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
	J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.
Metals	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
	J3	Estimated value; value may not be accurate. Spike recovery or RPD outside of criteria.

DATA REPORTING QUALIFIERS

Client: Hillsborough County

Job Number: 660-16292-1

<u>Lab Section</u>	<u>Qualifier</u>	<u>Description</u>
GC/MS VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
GC Semi VOA	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
Metals	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
General Chemistry	U	Indicates that the compound was analyzed for but not detected.
	I	The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
