Nolin:

We wanted to make you aware of a revision to the WTPF Financial Assurance cost estimate that we needed to do from when you reviewed the draft estimate to the final submittal that you have now. The County needed to use a different cost for delivery and transport of the roll-off containers for removal of the waste tires. The new cost estimate for the containers to be provided by Waste Management was higher than the one used in the draft. This change in container quotes caused the financial assurance cost estimate for removal of the tires to increase to just over \$150K. This value is greater than the current amount provided for the WTPF in the approved financial assurance for the CCSWDC; however, we feel that the cost is sufficiently covered by the overall value and contingency of the total financial assurance cost estimate for the CCSWDC which is greater than \$20M. In addition, I am currently in the process of preparing a minor modification for the CCSWDC Ops Permit which includes an update to the full financial assurance cost estimate to be submitted later this year. I will use the new WTPF cost estimate shown in the permit renewal when I submit the new FA cost estimate.

Again, just wanted to make you aware of this change and if you have any questions please do not hesitate to contact George or myself.

Thank you and have a great weekend.

Jason

Nolin,

The Permit Renewal Application for the Waste Tire Processing Facility at the Sarasota County Central County Solid Waste Disposal Complex was sent yesterday to your attention by UPS. You will have it today.

The package also contains a check for the permit application fee and a pdf of the application.

Please feel free to contact me if you have any questions.

Dear Dr. Reinhart,

I spoke with several folks about the financial assurance and status. We agree that the facility's status as a Processing Facility with a maximum storage of 500 tons is correct. We won't need any additional information about the equipment.

A closure cost estimate for 500 tons will need to be provided. We would compare that to the existing financial assurance for the landfill.

Importance: High

Nolin,

Thank you for discussing the draft Sarasota County Central County Solid Waste Disposal Complex (CCSWDC) Waste Tire Processing Facility (WTPF) Permit Renewal Application on Friday, May 26th. There were a few items that came up during the CCSWDC TPF Permit Renewal discussion that you were going to follow up on and get back with us. Please let me know if you have any suggested revisions by

the end of the day tomorrow if possible (6/2/17). If I do not hear back from you by then we will proceed with producing and submitting the application in a very similar format to what we provided previously. In general, the items you were going to look further into are:

1. Financial Assurance – I think the way we are approaching it will be fine but let me know if anything needs to be revised.
2. Facility status as a Processing Facility based on current processing practices – Based on our reading of the rule, we feel that we should be able to renew the permit for the facility as a processing facility. Let me know if there is any additional information we can provide to support this classification.

Dear Mr. Toms,

One of my team will process your application. I am able to answer questions you may have about

permitting waste tire facilities. I will be available Thursday after 11:00 and all day Friday.

Sincerely,

Nolin W. Moon, P.E.
