**COMMENTS:**

On April 28, 2017, the facility was granted a waiver from the provision of Rule 62-701.300(2)(b) which prohibits the storage or disposal of solid waste within 500 feet of an existing or approved potable water well. Permit 0019600-011-SO, issued on June 6, 2017, modified permit # 00196000-008-SO-24 by incorporating the waiver and authorizing the use of the remaining 3.9 acres of subcell 2B for C&D disposal (0.5 acres originally authorized in 2014). Previously, only clean debris was authorized to be stored in this area. Subcell 2B is located on the west side of the facility. The limits of waste disposal are marked by poles located on the north and south of the cell and marked by a berm to the west.

The Waiver Justification Report, dated January 16, 2017 (additional information sent on March 17), indicated that the existing potable water wells are hydraulically upgradient from the facility and there have been no groundwater exceedances or impacts in the area, which is covered by monitoring well MW-6.

The operational permit expiration date is 6/19/2023.

A separate permit (Permit # 0019600-010-WT-06) was issued on October 28, 2016 for the operation of the waste tire processing facility (WTPF). This permit expires on 10/5/2021. The WTPF was inspected in February, 2017.

Item 1.6 marked unknown: The water quality report is reviewed as a separate function and is not deemed a part of this inspection report.
