Klean Tires Recycling, Inc. is a used tire processing facility. Used tires are collected from local vendors and sorted into two groups.

Group 1 is suitable for resale and are sorted onsite for a short time period prior to being transported to local vendors.

Group 2 is the car and truck tires that are not suitable for resale. They are immediately processed by the tire shredder and sold as fuel to international paper. If International Paper is not accepting TDF then we will rough shred the tires and transport them to swannie county landfill for proper disposal.

In case the shredder is down for an extended period of time, these tires will be immediately transported to Liberty for proper disposal.

Any material resulted from the shredding process such as the wire, will be properly disposed of at the landfill.

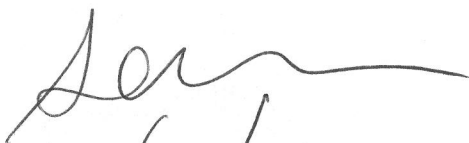

We are expecting to shred 500 car and truck tires per day or 130,000 tires a year.

Tires will not be stored on site for an extended period of time.

OTR tires will not be accepted. If a customer gave us 1 or 2 tires, we will cut them immediately and send them to landfill.

The facility will expect to maintain no more than 10,000 tires on site.
