Florida Department of Environmental Protection (FDEP)

Solid Waste Section, MS 4565

2600 Blair Stone Road

Tallahassee, Florida 32399-2400

Transmitted via email to: Elizabeth.kromhout@dep.state.fl.us and DEP_CD@dep.state.fl.us

**Subject: Estimate of Remaining Life
J.E.D. Solid Waste Management Facility
Osceola County, Florida
WACS Facility ID No. 89544
Permit No. 0199726-033-SO-01**

To Whom It May Concern:

Geosyntec Consultants is submitting this Estimate of Remaining Life Report on behalf of Omni Waste of Osceola County, LLC (Omni) in compliance with the above listed permit for the J.E.D. Solid Waste Management (JED) Facility and 62-701.500(13)(c), F.A.C. Specifically, this estimate is provided as required by Specific Condition No. C.14.b. of the above listed permit.

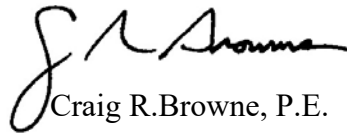

The following table summarizes the calculated remaining capacity and life for the existing, constructed landfill (Cells 1-11 and 13) and an estimate of life and capacity for other permitted areas not yet constructed (i.e., Cells 12 and 14-23). The remaining capacity estimates are based on a topographic survey performed by Metropolitan Aerial Surveys of Fort Worth, Texas, dated 10 May 2017. The remaining life is calculated based on an assumed disposal rate of 4,900 tons per day (7 days per week) and an airspace utilization factor of 1,673 pounds per cubic yard (cy), which corresponds to the waste disposal tonnage and corresponding airspace consumption between the most recent topographic surveys.

Landfill Area	Calculated Remaining Capacity (CY)	Calculated Remaining Life (Years)
Existing Constructed Footprint	4,187,358	2
Footprint Not Yet Constructed	57,999,487	27
Total Footprint	62,186,845	29

JED Estimate of Remaining Life
