COMMENTS:

An annual routine inspection was conducted at the Class I Landfill, C&D material recovery facility, and waste tire collection area. The annual operations inspection for the source separated organics processing facility (SOPF) was conducted on February 28, 2018, after the facility experienced a fire.

Each area inspected appeared to be well organized and operating in an efficient manner. The landfill has taken extra precautions to maintain storm water controls in the working face area of landfill. No violations or areas of concern were noted during this inspection.

The first 2018 Semiannual Groundwater Monitoring Report and the 2015-2017 Water Quality Monitoring Technical Report were reviewed and are accepted by the Department.
