**Re: Closure Cost for Estimate for Florida Tire Terminal Facility**  
400 Feagin St., Avon Park, FL 33825

If a closing should have to occur at the Florida Tire Terminal facility in Avon Park, FL, the following costs would apply. Florida Tire Terminal has a letter from Global Tire Recycling (attached) stating the cost to load and remove all tires is \$80.00/ton.

The actual waste tire quantities on hand and the weights associated with each category are the results of an inventory taken on 02/20/2019 in cooperation with Polston Engineering. These figures indicate the maximum capacities of the various tire storage cells that are indicated on the Facility Plan.

Passenger Tires - 600 units at 25 lbs/unit = 15,000 lbs. This is equivalent to 7.5 tons.

Light Truck Tires - 250 units at 35 lbs/unit = 8,750 lbs. This is the equivalent to 4.4 tons.

Medium Truck Tires - 1,364 units at 70 lbs/unit = 94,220. This is the equivalent to 47.1 tons.

Semi Truck Tires - 2,623 units at 120 lbs/unit = 314,760. This is the equivalent to 157.4 tons.

Large Truck Tires - 807 units at 150 lbs/unit = 121,050 lbs. This is the equivalent to 60.5 tons.

The total of waste tires equals 276.89 tons. The following calculations applies.

276.89 tons of waste tires X \$80 = \$22,151.20

The 276.89 tons represent 5,626 total units, which is well below the maximum 15,000 maximum units that are agreed to in the alternative procedures plan by maximum capacities will vary by the size of the tires inventoried.

This figure of \$22,151.20 represents the total closing cost using \$80 as the per ton cost to remove the tires.
