Re: Lena Road Class I Landfill
Facility ID: 44795
Manatee County

Dear Mr. Gore:

Department personnel conducted a compliance site inspection of the above-referenced facility on November 18, 2020. Based on the information provided during and following the inspection, the facility was determined to be in compliance. A copy of the inspection report is attached for your records.

The Department appreciates your compliance efforts. Should you have any questions or comments, please contact Kaitlyn Newsome at (813) 470-5877, or via e-mail at:
Kaitlyn.Newsome@floridadep.gov.

Sincerely,

COMMENTS:

Item 1.6: As indicated in the 05/21/2020 Inspection Report issued by the Department on June 11, 2020, Arsenic was noted above the MCL of 50 ug/L for SW-2 during a review of the 2nd Half 2018 - 2nd Half 2019 Groundwater Monitoring Reports. The 2nd Semi-Annual 2019 submittal attributed these exceedances to the sample's elevated turbidity. Please provide the Department with supporting information and/or additional clarification in the next submittal if Arsenic continues to be detected. Per discussion with Ms. Rodriguez (dated 09/01/2020) following review of the 1st Semi-Annual 2020 GWMR, the County continues to track the metals concentrations in MW-10, MW-13 and MW-18 during routine groundwater monitoring events prior to proposing any further assessment. The County is currently evaluating trend data for Arsenic, Vanadium and other leachate indicator compounds and will include this discussion in the upcoming 2020 Groundwater Technical Report (due 12/01/20 following recent 11/24/20 extension request approval).

Item 2.6.5: At the time of inspection, a paper copy of the Department's "Disposal of Deceased Domestic Animals" guidance document, dated 11/09/2018, was supplied to the facility.

Item 2.8-2.10; 9.12: Random load check documentation was reviewed from July 6, 2020 through November 09, 2020. Training records were reviewed for Mr. Juan Garza, Mr. Danny Newman and Mr. Keith Jones, the current operators and spotters on-site. Precipitation records and leachate quantity records are reviewed as part of the regular monthly submittals received by the Department. The Operation Plan (last revised September 2017 w/ included Contingency Plan) as well as the WTPF Emergency Preparedness Manual were confirmed to be located on-site and readily accessible. Asbestos records with corresponding GPS coordinates were reviewed from 2003-current indicating the most recent load of friable Asbestos was accepted on April 8, 2014. Following the inspection, the facility provided HAZWOPER Annual Refresher documentation for Mr. Scott Wood dated November 18, 2019. Per discussion with Ms. Metcalfe (Administrative Assistant), Mr. Wood will complete his refresher course for 2020 after the Thanksgiving holiday.

Item 2.13: Per discussion with facility representatives, the facility is currently in Phase II, Sequence 3 working South to North as per the approved Fill & Sequence Plan (last revised September 2017).

Item 2.19/2.21: At the time of inspection, Department staff noted areas of absent and/or sparse cover associated with the recent gas collection system expansion performed in early Summer 2020. Specifically, intermediate cover located on both the top and South side slope of Stage III appeared to be in need of reseeding. Per discussion with Mr. Detweiler, Manatee County has recently purchased a new seeder and plans to reseed these areas within the next month. Please provide the Department with photo documentation of Phase III within 30 days of the reseeding event. Additionally, please continue to monitor these areas and regrade/reseed as necessary.

Item 2.37: All groundwater wells were not inspected during this inspection. All of the wells that were inspected were secured and labeled.

Item 9.10/9.11: The most recent annual fire safety survey for the waste tire processing facility was completed on August 5, 2020 by the East Manatee Fire Rescue indicating compliance. The report however, was not included in the 3rd Quarter 2020 Waste Tire Processing Report received by the Department on October 8, 2020. Moving forward, please ensure that the annual fire safety survey is included as part of the following quarterly report.

Item 9.30: At the time of the inspection, a 50 feet wide fire lane was not established around the perimeter of the waste tire pile. On November 23, 2020, Mr. Detweiler provided photo documentation to the Department via email detailing the pile had been consolidated with the perimeter road re-established.
