**FACILITY INFORMATION:**

**Facility Name:** SOUTHEAST COUNTY SLF (PICNIC LF)

**On-site Inspection Start Date:** 04/21/2021

**On-site Inspection End Date:** 04/21/2021

**WACS No.:** 41193

**Facility Street Address:** 15960 CR 672

**City:** LITHIA

**County Name:** HILLSBOROUGH

**Zip:** 33547

**INSPECTION PARTICIPANTS:**

(Include ALL Landfill and Department Personnel with Corresponding Titles)

**Principal Inspector:** Kaitlyn Newsome, Environmental Specialist II

**Other Participants:** Ron Weisman, Facility Representative; Larry Ruiz, Manager of Landfill Operations;

**INSPECTION TYPE:**

Routine Operation Inspection for Landfill - Class I

Routine Operation Inspection for WPF - Waste Tire Processing Facility

**ATTACHMENTS TO THE INSPECTION CHECKLIST:**

This Cover Page to the Inspection Checklist may include any or all of the following attachments as appropriate.

**Note: Checklist items with shaded boxes are for informational purposes only.**

1.0 - SECTION 1.0 - FILE REVIEW

2.0 - SECTION 2.0 - LANDFILL OPERATION AND MAINTENANCE

9.0 - SECTION 9.0 - WASTE TIRE FACILITIES

Inspection Date: 04/21/2021

**1.0 - SECTION 1.0 - FILE REVIEW****Requirements:**

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Item No.	FILE REVIEW (Pre- or Post-Inspection, as appropriate.)	Ok	Not Ok	Unk	N/A
1.1	For landfills and C&D disposal facilities, does the facility have a current plan for the method and sequence of filling wastes? 62-701.500(2)(f) for landfills; 62-701.730(7)(a) for C&D debris sites	✓			
1.2	For landfills, are the following records being reported to the Department?(Check any that are Not OK) <input type="checkbox"/> Waste reports (annually) 62-701.500(4) <input type="checkbox"/> Annual estimate of remaining life 62-701.500(13)(c)	✓			
1.3	Is gas monitoring being performed as required by the permit? 62-701.500(9), 62-701.530(2)	✓			
1.4	Are the results of the gas sampling reported to the Department quarterly? 62-701.530(2)(c)	✓			
1.5	Is water quality sampling and testing performed according to standard procedures and at the required frequencies? 62-701.510(2) for landfills; 62-701.730(8) and 62-701.730(10) for C&D debris sites; 62-713.400(3) for stationary soil treatment facilities.	✓			
1.6	Do the results of the water quality testing suggest there may be adverse impacts to water quality from the operation of the solid waste facility? 62-701.510(3) and (4); 62-701.730(4)(c) and (10) for C&D debris sites; 62-713.400(3) for stationary soil treatment facilities.		✓		
1.7	For closed landfills and C&D disposal facilities with final elevations higher than 20 feet above grade, has a final survey report verifying the final elevations and contours of the facility been submitted to the Department? 62-701.600(6)(b), 62-701.730(9)(e)				✓
1.8	Is financial assurance adequate? 62-701.630 for landfills; 62-701.710(7)(a) and 62-701.710(1)(d)1. for waste processing facilities; 62-701.730(11)(a) for C&D debris facilities; 62-713.600(6)(a) for stationary soil treatment facilities; 62-711.500(3) for waste tire facilities. NOTE: The Solid Waste Financial Coordinator in Tallahassee can assist with this information.	✓			
1.9	Are cost estimates current and adjusted every year? 62-701.630(4) for landfills; 62-701.710(7)(a) and 62-701.710(1)(d)1. for waste processing facilities; 62-701.730(11)(a) for C&D debris facilities; 62-713.600(6)(b) and 62-713.600(6)(c) for stationary soil treatment facilities; 62-711.500(3) for waste tire facilities.	✓			
1.10	For C&D debris disposal and disposal with recycling facilities, is an Annual Report submitted to the Department for the disposal operation by February 1st of each year? 62-701.730(12)				✓
1.11	For C&D recycling facilities with no disposal, is an Annual Report for the recycling facility submitted to the Department by February 1st of each year? 62-701.710(8)(b)				✓
1.12	For compost facilities, has the compost product been sampled and analyzed every 20,000 tons or every 3 months (whichever is sooner)? 62-709.530(1)				✓
1.13	For compost facilities, has the annual report been submitted by June 1st? 62-709.530(3)				✓

**Current Areas of Concern:**

Rule: 62-701.510(3), 62-701.510(4), 62-701.730(10), 62-701.730(8)(f), 62-713.400(3)

Question Number: 1.6

Explanation: As detailed in the Notice of Evaluation Monitoring Letter ("Letter") issued to Hillsborough County on November 20, 2020, a review of the last ten supplemental sampling events (1st Quarter 2018 through the 2nd Quarter 2020) indicates that TH-83 (WACS Testsite No. 30399), a detection well in the surficial aquifer, exceeded groundwater standards/minimum criteria and/or resulted in concentrations significantly above background levels for Sodium, Total Dissolved Solids (TDS), Chlorides, pH, and Ammonia.

Per the Letter, the Permittee was requested to initiate evaluation monitoring, prevention measures and corrective actions as described in Rule 62-701.510(6)(a), Florida Administrative Code (F.A.C.). Specifically, the permittee was required to complete the following actions by no later than February 18, 2021.

1) Perform sampling of detection well TH-83 and background well TH-22A for the parameters listed in Rule 62-701.510(7)(c), F.A.C, with a groundwater lab analysis report submitted to the Department.

2) Install a compliance well at the edge of the zone of discharge and downgradient from monitoring well TH-83, at a previously agreed upon location.

In addition to the above noted actions, the permittee is required to submit a Contamination Evaluation Plan to the Department within 180 days of the date of the Letter's issuance, which is May 19, 2021. This report has not yet been received by the Department.

Corrective Action: 1) On April 27, 2021, the Department received the facility's ADaPT groundwater data and groundwater monitoring report for sampling completed on January 28, 2021. Per this submittal, groundwater samples for TH-22A, TH-83, and TH-84 were collected on January 8, 2021 in accordance with the Letter's requirements to initiate Evaluation Monitoring at the facility. The groundwater data for these three monitoring wells was submitted in accordance with the Department's 30-day extension to submit preliminary groundwater results for the Evaluation Monitoring, which was granted on March 29, 2021.

2) A newly installed compliance well (TH-84) located approximately 99 feet from the Phase II edge of liner, was installed on November 25, 2020. On December 21, 2020, the Permittee provided a memorandum documenting the TH-84 well installation alongside the corresponding Soil Boring Log, Well Construction Log, Well Construction Diagram, Field Screening Purge Logs, Calibration Logs, Field Screening Logs, and As-Built Survey.

3) As a reminder, please ensure that the Contamination Evaluation Plan Report is submitted to the Department (SWD\_Waste@floridadep.gov) by no later than May 19, 2021.

#### COMMENTS:

Item 1.8/1.9: Inflation-adjusted cost estimates were received on February 18, 2021, reviewed and subsequently approved on March 15, 2021 for the 2021 year. A copy of these estimates was forwarded, via email, to the Solid Waste Financial Coordinator (Mr. Tor Bejnar) in Tallahassee. Please work with the coordinator directly to assess the facility's compliance with the funding mechanism requirements of Rule 62-701 and 62-711, Florida Administrative Code (F.A.C.).

Item 2.1.1/9.1.1: At the time of inspection, Department staff noted a small pile as well a separate roll-off of unprocessed tires stored outside of the permitted Waste Tire Processing area. Photo documentation received on April 26, 2021 demonstrated that the roll-off and small pile of tires had been relocated inside of the permitted site plan. Moving forward, please ensure that waste tires are stored in accordance with the facility's approved site plan configuration.

Item 2.8/2.9: Operator and Spotter training certifications were reviewed for Mr. Stephen Bailey, Jr. and Mr. Martin Bocanegra, Jr, the current packer and dozer operators at the time of the inspection. All reviewed training certifications appeared to be active and in compliance.

Item 2.10/9.14: The following documentation was reviewed on-site and appeared in compliance: Random Load Inspections (February - April 2021); Asbestos Disposal Records (September 2020 - April 2021); Percent Solids Content of Biosolids Delivered Records (April 2021); Weekly Inspection Records for T1/T6 (September 2020 - April 2021); Leachate Management Daily Field Data Records (April 2021); Aquaclean Hauling Records (April 2021); and Facility Operation Plan and Emergency Preparedness Plan (Last Revised: June 2020). Records reviewed off-site as part of this file review include the 3rd Quarter 2020 - 1st Quarter 2021 Waste Tire Processing Reports and Leachate Reports with associated rainfall data.

Item 2.11/2.22: Per Section 8.2.1 of the revised Leachate Management Plan received by Tallahassee Solid Waste Permitting on April 16, 2021 (associated with the Leachate Evaporator Addition and Ash Relocation Modification), the runoff within the Temporary Ash Storage Area located on top of Section 7 and 8 of the CEA is bermed, treated as leachate and drained into a sump. At the time of the inspection, Mr. Weisman confirmed that a sump was not present in this location and that all ash runoff ponds and percolates down into Sections 7 and 8 of the CEA. Prior to this permit modification's issuance, please ensure that the facility's Operation Plan reflects current leachate management operations on-site to maintain compliance.

Item 2.13: The active working face at the time of inspection was Phase II, Lift 18A.

Item 2.19/2.21: During the inspection, Department staff observed a large area of sparse vegetation on the West side of Phase V. Per discussion with Mr. Weisman, this area was recently reseeded in March but has not yet reestablished itself due to a lack of rain. Please continue to monitor this area for erosion, and regrade and/or reseed as necessary.

Inspection Date: 04/21/2021

Item 2.37: All groundwater wells were not inspected during this inspection. All of the wells that were inspected were secured and labeled.

Item 2.38: During the inspection, the electronic scrap roll-off was noted to be full, consequently causing additional electronic waste to be stored on the ground. Following the Department's request, the facility provided photo documentation on April 26, 2021 demonstrating the roll-off had been removed and the additional e-waste removed from the ground. Please ensure that this roll-off is hauled off-site as needed so that waste is stored in accordance with permit requirements.

Item 9.10: On February 17, 2021, Mr. Weisman provided the 2021 Fire Safety Survey (conducted February 16, 2021) for the Waste Tire Processing Area, with no violations noted.

Item 9.30: At the time of the inspection, Department staff noted that the perimeter road surrounding the North-West Side of the Western tire pile did not appear to meet the 50-foot wide requirement. Per discussion with Mr. Weisman, the facility has been unable to widen this perimeter road without encroaching on the stormwater conveyance ditch located behind it. Within 30 days of receiving this inspection report, please provide photo documentation demonstrating that the waste tire pile has been tightened around this portion of the pile to allow for a 50 foot wide perimeter road.
