**COMMENTS:**

Inspector Mark McCorry conducted an annual compliance inspection for the Tire Processing Operation (WACS ID #101313). Inspector was met by Mr. Alfredo Godinez, Facility Supervisor, and conducted a walk through of the Tire Processing Operation. During the inspection the inspector observed two piles of tires, one without rims that were being shredded and one with rims that were having the rims removed. The inspector also observed a 50 ft. all-weather access road separating the piles. Two observations during the inspection were the tire piles being close to the 15 ft. height limit and standing water on the access road, due to recent heavy rainfall. It was recommended to Mr. Godinez to improve the access road and areas of stagnant and ponding water and to make sure the tire piles stay under the 15 ft. height limit. At the time of the inspection the facility was in operation. The facility is fenced and gated restricting illegal dumping. No dust, odor, noise, or vector concerns were observed. Applicable reporting requirements are being met. Facility was found to be in compliance during today's inspection.
