Current Violations:

Rule:	62-701.300(1)(a)
Question Number:	9.1.1
Explanation:	In excess of 10,000 waste tires were observed on the ground, in several large, oblong piles in between rows of trailers in the "Inventory Storage Area". Additionally, no 50 foot fire lane existed at the east, west and south property boundaries, nor between rows of trailers. Permit No. 321853-003-WT Section 2 C.4. provides "No tires shall be kept in piles on the ground (outside)." Section 2 C.6.b) of the permit provides "A minimum of 50-foot wide fire lane from the property line to the trailers and 50-foot wide fires lane between rows of trailers shall be maintained at any time."
Corrective Action:	The facility was shall place all tires currently piled on the ground into trailers and shall establish 50 foot fire lanes at the property boundaries and between rows of trailers within 30 days. Report corrective action to the Department, via email, immediately upon completion to arrange for a confirming inspection.

COMMENTS:

Item Number 1.8 "unknown" since the annual update has been approved, but the mechanism has not yet been reviewed.

The facility asserted they were in the process of reorganizing the warehouse and as a result had removed tires intended for resale from the warehouse and were temporarily storing them on the ground in the exterior tire storage area. The warehouse contained a very low number of tires supporting this assertion, however they were advised this was a violation and that failure to resolve it in a timely fashion would result in enforcement..

The facility is not authorized to store tires outside and therefore that portion of the checklist was marked as N/A.
