-FDOH-PBC representatives Jaime Morales and Javiera Lara conducted an annual compliance inspection for the Tire Processing Operation on September 9th, 2022. A facility-wide walkthrough was conducted and consisted of observing two piles of tires, one with rims and the other without rims. Both piles were observed to be less than 15 feet in height and less than 50 feet in width.

- Onsite storage at the facility was observed to be less than 3,500 tires (approximate 900 tires observed).

-During the inspection a 50-foot-wide fire lane around the perimeter was observed, however some loose mud, potholes, and stagnant water were noted next to the pile.

- Stagnant water was observed to be collected inside of waste tires. Observations were discussed with the facility representatives due to potential concerns of mosquitoes. Compliance assistant was provided, and corrective measures will be taken to ensure pest management compliance. Facility will provide copy of pest management contract as per email communication received on 09/14/2022.

- At the time of the visit no objectionable odors or fugitive/unconfined emissions/dust were observed.

-FDOH-PBC representatives met with Ixzel Carbajal and Rhina Gadea, Administrative Assistants, and reviewed observations and items of concerns.
